Application for Transfer of Water Right #37-7455

Supporting Narrative

The proposed water right transfer requests a change of a point of diversion, an addition of a point of diversion, and a change in the place of use for Water Right #37-7455. The right has historically supplied potable water to the Picabo water system via an elevated storage tank and underground distribution system privately owned by Picabo Livestock Company. Due to concerns with water quality in the existing POD, the well was replaced with a new 12" diameter municipal quality well located in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 27. The existing well has been disconnected from the system. This transfer requests a change in the POD to reflect the new well location.

The Picabo Water System has incorporated a back-up well for use in emergency situations and during maintenance of the main well & pump. This well is located in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 27 and is known as the "Porter Well". Since this well is part of the system and may be used at times to supply this right, this well has been added under this transfer as a new point of diversion.

The distribution system has been improved over time to provide potable water to additional residents. The distribution system currently has service connections to 24 residential customers, 2 commercial customers, and the Blaine County Park. Maximum build out for the system is anticipated to be 60 residential and 8 commercial customers.

In addition to this existing right, Picabo Livestock Company has applied for additional flow and volume to complete its current and future municipal needs. The combined total flow and volume under this water right and the pending permit application is for 1.00 cfs and 83.0 acre-feet per annum.

The existing well will be capped and not used unless a viable right is obtained for this well.
