Re: Application for transfer for water right 34-2392

Dear Mr. Stennett,

Thank-you for the opportunity to perform a preliminary review of the above referenced transfer application. I have the following comments that require addressing for processing the application. They are:

1. Transfer Application item #2. Describe the reason for the proposed changes. It is stated that you sold off all of the property in section 28 and that the well to irrigate that land and land in section 33 went with that land. Under this circumstance, it appears that you would then need to apply for a "change point of diversion" rather than "add diversion point" in #1.
2. The water right that you had written down for transfer (34-2392) has since been split reflecting the change in ownership that you refer to. The resulting new water right number for lands in section 33 is 34-13647.
3. My review of associated water rights for the land involved in the transfer reveal another water right (based upon enlargement), which the source is also from groundwater. Since this right also lists a well in section 28, I assume that you need to change the point of diversion for this right as well. Hence, I have listed it in the transfer as well.
4. I have corrected the description of the lands retained based upon your entry and what was shown on the proof reports. I require you to initial approving this change.
5. Page 2 has been left blank. Please fill out the top portion of the page. Of specific interest is item #6b. If you answer yes, I will require a letter from that entity approving the proposed change.
6. We require either recent tax notices for lands that were retained in section 33 and continue to be owned by you or a warranty deed that indicates that you are still the rightful owner of the lands involved in this transfer.
7. We require a map detailing the shape of the lands being retained. For your convenience, I have included a layout of section 33 based upon the recent change of ownership filing. Please look over the map for correctness of the proposed new well. I assume that the lands shown irrigated are correct. If not, please revise.
8. We require a notarized signature on the last page.

9/14/04
Thank you Roger - I believe I have addressed the issues you set forth in this letter -

Thank you very much for your help on this matter

*Sincerely
Clint Stett*

9. The cost of the transfer based upon 3.09 cfs is \$370. Please remit when you return the application.
10. I am enclosing the old proof report for water right 34-2392. It is no longer needed for the transfer since it has been split. It is now consider a parent right.
11. Please note all changes that I have made upon the transfer application and initial for approval of these changes.

If this looks like what you want to accomplish, send the original application back with a check and we will get started on it. As always, feel free to call if you have any questions.

Sincerely,

W. Roger Warner
