Memorandum

**DIRK KEMPTHORNE
GOVERNOR**

**KARL J. DREHER
DIRECTOR**

To: Transfer 69309

From: John Freitag, Water Resource Agent

Re: Review notes

Date: 08/03/01

This transfer is proposing to dry up 78.7 acres of water right 47-4287 to be converted to commercial and stockwater use. The remaining 49.3 acres will be left for irrigation use. Water right 47-4287 is supplemental to TFCC shares, thus the reason for drying up 78.7 acres for 75.4 AFA (see Brockway's analysis with the transfer).

Physically the transfer proposes to no longer irrigate 25.1 acres with either TFCC shares or groundwater See part 1, 6c on original application

Also the flow rate needed at the dairy is not proportionate to what is being dried up so the proposal is to transfer 1.01 cfs to the dairy and retain 0.99 cfs or 0.02 cfs per acre for irrigation (see Brockway's analysis included with transfer).

There appear to be several water rights out of the same well listed as the POD for this transfer. these are... 47-8434 (application for permit to be withdrawn pending approval of this transfer-per conversation with Chuck Brockway Jr. 8-3-01, 47-8241).
