Subject: Water Right Transfer

Dear Dave:

Enclosed is an application for transfer of water right 51-04048 + 51-04049. We seek to increase the permissible place of use for this groundwater right. The transfer will not increase or change the amount of water presently diverted under the above referenced right.

GENERAL DESCRIPTION OF THE TRANSFER

We presently own 78 inches (1.56 cfs) of Bruneau Buckaroo Ditch Company water which is used to irrigate 90 acres of land, 73 acres are sprinkle irrigated. The groundwater (51-04049) is used on the same 73 acres of land. The groundwater is commingled with the Ditch right.

expansion? After managing this farm for the past several years it is obvious that additional lands could be irrigated and not exceed the total amount allocated. Under normal conditions adequate surface rights (Buckaroo Ditch shares) exist to irrigate all lands presently farmed. During those periods of drought a combination of Ditch rights and groundwater rights allow the continued farming of the existing cultivated lands.

The proposed transfer will increase the acreage of cultivated lands by 40 acres. A total cultivated acreage of 130 acres can easily be serviced by rights as they presently exist.

The lands involved in this transfer are shown on the attached map. The additional places of use will allow us to upgrade our sprinkler irrigation system. The water will continue to be commingled with Buckaroo Ditch water to service those acres presently irrigated by both sources.

The pump located at the well will be equipped with a valve to control pumping rate, a flow meter will be installed to assure we do not exceed our permit.

I've enclosed a check with the application. Please contact me if you have any additional questions.

Sincerely yours,

Frank
