Re: Water Rights for L&M Farms

Dear Reagon,

You and I spoke about the above mentioned water rights earlier this month. This letter should serve as an outline of that discussion.

There are four licensed rights apputenant to the land in question. Three of these rights (51-02260, 51-2261 and 51-02262) were combined under Transfer #1949 in 1974. According to the terms of that Transfer, the three rights were tied together for a combined diversion rate of 10.49 cfs (cubic feet per second). When license 51-07200 was finalized, it was determined that no new water had been developed from the existing wells and the diversion rate under this right is not additive. To summarize: five wells are licensed under these four rights for the delivery of 10.49 cfs on lands currently owned by L&M Farms.

Please let me know if I can be of further assistance. If you have any questions, please contact me at 327-7925 in Boise.

Sincerely,

MEMORANDUM

TO: Files 51-2260, 51-2261, 51-2262 and 51-7200

FROM: Glen Saxton *WJS*

DATE: February 26, 1985

A question recently arose questioning the effect of the limiting condition shown on License No. 51-7200 and on the three other above-referenced transferred rights.

Transfer No. 1947 provides that any or all of the 10.49 cfs can be diverted from one or more wells approved on the transfer, with 10.49 cfs being the maximum total combined rate.

License No. 41-7200, issued later in time than the transfer, essentially limits the rate of diversion from wells in NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 2, to the measured capacity of the wells (from prior exams) to 5.68 cfs. No additional rate of diversion was created by License No. 51-7200.

The effect of the condition on License No. 51-7200 is not to reduce the maximum of 10.49 cfs which can be diverted under the transfer, but to show that the rate licensed under 51-7200 is not additive to the rates diverted from ~~some~~ *the same* wells under the transfer.

Another way to consider the effect of the condition shown on License No. 51-7200 on Transfer No. 1949 can be described in the following scenario:

If all four licensed water rights were considered together for the irrigation of all the land described under the four licenses, the maximum rate of diversion could not exceed 10.49 cfs.

Dear Mr. Potucek:

This letter is to notify you as a permit holder in the Blue Gulch area that a portion of the land west of Salmon Falls Creek has been declared a critical ground-water area and closed to further appropriation of ground water. This designation went into effect December 9, 1970 and will remain until it is shown that ground-water withdrawals do not exceed the estimated natural recharge to the area.

A public hearing will be held at the Buhl Senior High School, January 7, 1971 at 8:00 P.M., to accept any testimony or comment regarding the closure. A copy of the notice and hearing and description of the area is enclosed for your information.

Gentlemen:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- 28075 are due not later than **Feb. 21, 1967**

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated - - all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.
