Proof of Application of Water to Beneficial Use

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. My name is Angel Bilbao; residence, 7 miles south of Bruneau, Idaho; occupation, farmer; postoffice address, Bruneau, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Individual.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. Permit #G-28266; date of permit, 11/20/59; date of priority, 11/16/59.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. The source of this water is a subterranean well which flows artesian and is located in SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 23, T7S-R6E., B.M., Ida.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. Works consist of my own private ditch approx. 1/2 mile long until I go into my own distribution. It will carry 200" of water at least. The well is drilled to a depth of 1,000', cased 340' and the water flows. There is no pump and all irrigation is by surface. No sprinkler. This flows 125". I have drilled a lot of wells and seen a lot of wells measured over a weir and this is my best estimate.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. This is used for irrigation of T7S-R6E., Sec. 23, NW $\frac{1}{4}$ SW $\frac{1}{4}$, 35 acres; NE $\frac{1}{4}$ SW $\frac{1}{4}$, 20 acres; SE $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres; SW $\frac{1}{4}$ SE $\frac{1}{4}$, 12 acres. Sec. 26, NW $\frac{1}{4}$ NE $\frac{1}{4}$, 6 acres. There is no natural meadow and all expenditures have been a direct result of this and I have spent about \$10,000 on the development.

The well was drilled by Irvin Gylinski of Bruneau, Idaho.

28266

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. Irrigation only.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. See below.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. Original holder.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. I started to drill the well immediately after the permit was applied for and have gone right through with it and developed the whole thing.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. I have another permit here actually filed by Grover W. Pence under #16388 with a point of diversion in SW 1/4 Sec. 23. This flows about 65" although this well loses at least 20" of water before it ever gets out of the tunnel and comes through. By the time, I get it to the land, I probably don't get over half of what is actually licensed for.

Question 8: The land is sandy on top and gravelly underneath and in order to get enough head of water here and in order to cover the land, I need at least 2" to the acre. A lot of times like right now, with the water I have, I am still short. I cannot get by with any less water than is provided here. I have irrigated this place for almost 25 years and know that I need this much water to raise good crops of hay and grain, corn and the things I have to raise.

Mr. and Mrs. William E. Rose

Dear Mr. and Mrs. Rose:

We enjoyed talking to you on January 2, 1969 and hope we may help you. Pursuant to our telephone conversation we are enclosing copies of License Nos. G-28266 and 16388 and Permit Nos. G-32825 and 17823 (cancelled).

License Nos. G-28266 and 16388 are perfected water rights and there are no further requirements. The department has no means in which to record the conveyance of the right, however, as a water right license is real property it is appurtenant to the land. Therefore, it is not necessary to initiate any name changes.

Permit No. G-32825 is not perfected, however, and it would be wise for you to obtain an assignment from Angel Bilbao so that you may complete the permit. Enclosed is an assignment form for your use. Please have Mr. Angel Bilbao complete the form and return it to the department for processing.

In our conversation, you indicated that the land under Permit No. G-32825 was being irrigated and that the well was complete. If this is so, you may submit proof of beneficial use and secure a water license. Enclosed are proof forms for your use. Complete the form per the enclosed instructions and return to this department for processing.

The only other permit filed under the names you listed was Permit No. 17823 which was cancelled on March 6, 1939 for failure to submit proof. If you are at this time using the well indicated in the permit, you will be required to submit an application for a new permit to the Department of Reclamation. Enclosed are application forms for your use.
