RE: Permit No. G-22233

Mr. Mateo Zubizarreta
Bruneau, Idaho

Dear Mr. Zubizarreta:

We acknowledge receipt of the Deposition of Holder and two witnesses, also affidavit of publication in The Owyhee Nugget, all submitted in proof of completion of works and beneficial use on Permit No. G-22233.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Permit No. G-22233

Proof of Application of Water to Beneficial Use

and Completion of Works

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. Mateo Zubizarreta, residence 8 miles South of Pruneau, Idaho, occupation is farming, P. O. Address is Bruneau, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Acting as an individual

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. G-22233, date of the permit is July 7th, 1951, and the date of priority is July 5, 1951

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Source is a drilled well which flows artesian, and is located in SW¹/₄ NE¹/₄, Sec. 26, T 7 S - R 6 E.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. My well is 355' deep, 6" hole. This is cased 125' deep. The water flows from this and all the irrigation is by gravity through my private ditches. The way I have measured this well, I have seen a lot of wells measured and we actually have a well and the best measurement I could give here is 60". My ditches are made with V type ditcher, 1¹/₂' deep and 3¹/₂' wide at the top and they will carry plenty of water. More than these works will produce. I have ditches going north, also to the east.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. All used for irrigation. In the SE¹/₄ NE¹/₄, 12 acres, in the SW¹/₄ NE¹/₄, 25 acres, in the SE¹/₄ NT¹/₄, 15 acres and in the NE¹/₄ SW¹/₄, 8 acres, (all being in Sec. 26, T 7 S - R 6 E.) from this well. All the land is cultivated. I raise hay and grain on this and all the improvement has been done as a result of this permit and water development. I have at lease \$6,000.00 to \$6,500.00 in this work, well and getting all this ready for use as a direct result of this permit.

J-22233

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. Only for irrigation

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. The water produced here now is the least I could get by with. In fact I really need another well here to get as much water as I could use.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. I am the same person that applied.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. I started work on this well just as soon as I had a permit and I have continued the work clear through and I have used it on this land. I had this land all ready and had the water all ready in use in 1955 and I have irrigated all these acres in 1956 and 1957.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. The only water that is on any of these 40's is I have under permit #G-24188 another permit and I have a well that I get irrigation for probably 40 acres. This is just used on a part of it. I am making separate proof on this.

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Boni Bilao, age 68, residence is 8 miles South of Bruneau, occupation is farming and P. O. Address is Bruneau, Idaho.

Ques. 2. Are you acquainted with Mateo Zubizarreta, the holder of Permit No. G-22233? How long have you known him and where does he reside?

Ans. I have known him since 1914 and I know that he lives 8 miles South of Bruneau, Idaho.

Ques. 3. Have you read or heard read said Permit No. G-22233, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. From a drilled well located in the SW 1/4, Sec. 26, T. 7, S-R. 6 E. This well flows artesian, and is drilled 355' with a 6" hole and cased 125'. This is all gravity irrigated and the ditches are V type about 3 1/2' wide and 1 1/2' deep.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. 60" and I have seen this much conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. I helped measure this water and I know it measured 60" and I have seen a lot of water measured. There is no pump here, it flows artesian.

G-22233

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation. In the SE¹/₄NE¹/₄ of Sec. 26, 12 acres irrigated, in the SW¹/₄NE¹/₄, Section 26, 25 acres irrigated in the NE¹/₄SW¹/₄, Sec. 26, 8 acres and in the SE¹/₄NW¹/₄ Sec. 26, 25 acres irrigated. This is all in T-7-S-R-6-E. There is no natural meadow land here, and all improvements have been as a result of this water use.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Irrigation only.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. This is a clay loam soil, and he could use more water than he has from this well.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have been familiar with it since it was first started, and I helped drill the well, and I have seen it ever since.

Ans. From a drilled well located in the SW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 26, T 7 S - R 6 E. This is 355' well with 6" hole and is cased 125'. This is artesian, and is all gravity irrigation through his private ditches. The ditches are v-shaped, about 1 $\frac{1}{2}$ ' deep and 3 $\frac{1}{2}$ ' wide at the top and will carry all the water he has here.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. I think it will produce 60" and I have seen this much conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. I helped measure this and we did run it over a Wier and to my best measurement that is what I think there is here.

G-22233

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation on SE $\frac{1}{4}$ NE $\frac{1}{4}$, 12 acres, SW $\frac{1}{4}$ NE $\frac{1}{4}$, 25 acres, NE $\frac{1}{4}$ SW $\frac{1}{4}$, 8 acres and SE $\frac{1}{4}$ NW $\frac{1}{4}$, 15 acres, in Sec. 26, T 7 S - R 6 E. This is all cultivated land, and all improvements have been made as a direct result of this use.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Irrigation only.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Sandy clay loam soil, and I figure it needs all the water he has, and he could use more here.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I live close here and I have seen this ever since it first started.

RE: Permit No. G-22233

Date December 1, 1957

Mateo Zubisaretta
Bruneau, Idaho

Dear Sir:

The date for proofs of completion of works and application of water to beneficial use, as set out under the terms of Permit No. G-22233 are due not later than February 20, 1958.

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper with the county.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least forty (40) days before the above mentioned date, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed on, for what purpose it is used, the point or points of diversion and the location of use or the lands which are irrigated--all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named and before the notary public, as advertised in the publication notice.

Very truly yours,

MARK R. KULP
State Reclamation Engineer
