

I have been unable to get together with Flaris and agree on a date for making a full and complete inspection.

At present the water is flowing more or less wild thru a channel of its own making toward Little Valley Creek and apparently no attempt is being made to raise it.

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

STATE OF IDAHO
DEPARTMENT OF RECLAMATION

MEMORANDUM
April 21, 1955

Subject Permit No. 22015

File _____

I called upon Frank Faria as per notice in letter of April 16. Mrs. Faria said that Frank was away with a friend buying cattle and that he did not get the letter in time. Later, I talked to Carl Agenbroad and he told me that his letter came two or three days ago and that Mr. Faria had left late yesterday morning. The letters were mailed the same day. Mrs. Faria said that Mr. Thompson, who had rented the place, could go along to make the inspection.

Mr. Thompson and Mr. Jacobson, another young fellow, accompanied me and we went to the well. I said since this had been measured once before there was really no use measuring it unless you want it measured. Whereupon, Mr. Thompson advised that he most decidedly wanted it measured and advised me that there was over 200 inches and that the opening in the end of the sump box was a weir and he wanted it measured through that. I told him the only measurement I was willing to make would have to be under standard conditions and that if there was any question regarding the measurement, Mr. Faria who was the owner of the Permit would have to be present.

We got in the car and drove back to the house. On the way back, Mr. Thompson complained bitterly that everyone was against them and it didn't matter whether it was roads or water, it was the same, and that he wanted that water measured and measured right and wanted it measured three separate times at various times and then have the average for the amount of the well.

He stated that the top of the casing had been cut off about two feet since it was measured before. If this is true, there probably is a small amount more water now than at the time of the other measurement. Further, there is no certainty that a well will have the same flow every day throughout the year.

NOTICE OF PROOF APPLICATION OF WATER TO BENEFICIAL USE.

Notice is hereby given that at 10 A. M. on the 11th day of December, 1954, at 519 Idaho Bldg., Boise, County of Ada, State of Idaho, before Harley M. McDowell, Notary Public, proof will be submitted of the application to beneficial use of 6.4 cubic feet per second of the waters of subterranean source in accordance with the terms and conditions of Permit No. 22015 heretofore issued by the State Dept. of Reclamation of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are Frank Faria, Bruneau, Idaho.

The use to which said water has been applied is Irrigation.

The amount applied to beneficial use is 6.4 cu. ft.

The place where said water is used: N $\frac{1}{2}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$, Sec. 12, T. 7 S., R. 4 E., B. M.; N $\frac{1}{2}$ NW $\frac{1}{4}$, Section 7; SW $\frac{1}{4}$, Section 6, T. 7 S., R. 5 E., B. M.

The name of the canal or ditch or other works by which said water is conducted to such place of use is private ditch

The right to take water from such works is based upon Permit No. 22015.

The source of supply from which such water is diverted is subterranean water from a drilled well in the SE $\frac{1}{4}$ NW $\frac{1}{4}$, Section 12, T. 7 S., R. 4 E., B. M.

The date of priority which said user is prepared to establish is March 31, 1951.

APPLICATION FOR PERMIT
To Appropriate the Public Waters of the State of Idaho

APPLICATION No. 29738
PERMIT No. 22015
DISTRICT No.

1. Name of Applicant: FRANK FARIA

Postoffice address: Bruneau

County: Owyhee

State: Idaho

I. If applicant is a corporation, give:

- (a) Date and place of incorporation:
- (b) Amount of capital stock:
- (c) Amount paid in:
- (d) Names and addresses of directors:

II. The financial resources of the applicant are:

(b) Treasury stock:

(d) Other resources:

(a) Cash on hand:

(c) Bonds to be issued:

2. Quantity of water claimed: 320 miner's inches or 6.4 cubic feet per second.

3. Source of water supply: Underground water by pumping / from a drilled well which is a tributary of

4. Location of point of diversion: feet distant from the

corner of Section , T. , R. , B. M., and is in the N W corner of the NW $\frac{1}{4}$ NW $\frac{1}{4}$

of Section 12 , T. 7 S. , R. 4 E. , B.M., County of Owyhee

5. Water is to be used for Irrigation and domestic purposes.

6. If for mining, milling, power or manufacturing purposes, give:

(a) Point of use of water: feet distant from corner of Section

T. , R. , B.M., in the of Section , T. , R. , B.M.

(b) Amount of power generated: H.P., under feet head.

(c) Water is to be returned to at a point feet

distant from the corner of Section , T. , R. , B.M., in the
of Section , T. , R. , B.M.

7. Estimated cost of works: \$ 5,000.00

8. Kind of works: Consists of drilled well, cased, with a pump turbine type for raising water.

9. Height of dam feet; length of dam at top feet; length of dam at bottom

feet; material used in dam:

10. Size of headgate: Width feet; height feet.

11. Ditch: Width at bottom 1 $\frac{1}{2}$ feet; width at water line 2 feet; depth of water 2 feet;
Approximately 1 $\frac{1}{2}$ miles long
dimensions of flume:

Diameter of pipe inches; length of conduit miles.

Average grade per mile feet.

12. The time required for the completion of such work is Five (5) years.

13. The time required for the complete application of the water to the proposed use is Six (6) additional years.

14. The land to be irrigated is described in the following tabulation: See remarks.

15. Existing water rights and/or valid permits appurtenant to the lands to be irrigated are: None

16. (a) Is reservoir to be used? No If so, fill in (b) and (c) below:
 (b) Name of Reservoir and number of Storage Permit:
 (c) Date of filing of Application for Storage Permit and Name of Applicant:

BE IT KNOWN THAT The undersigned hereby makes application for permit to appropriate the public water of the State of Idaho as herein set forth.

Dear Mr. Faria:

Enclosed herewith is your Water License issued on the above numbered permit.

The quantity of water diverted was measured by our field examiner using a Cipolletti weir. The quantity was measured on March 30, 1954 and found to be 3.13 cubic feet per second and then again on May 27, 1957 the quantity was found to be 3.21 cubic feet per second.

If you have further questions concerning this matter, please feel free to contact us.

Very truly yours,

Dear Mr. Faria:

A representative of this department has made an examination of the works covered by your Permit No. 51-2121 and has found the following:

Quantity of water diverted: 3.2 c.f.s.

Amount of water that can be recognized as beneficially used under Idaho law: 3.2 c.f.s.

The maximum quantity of water diverted shall not exceed 1,581.6 acre feet per season.

Beneficial Use: Irrigation of 460 acres within the SW $\frac{1}{4}$ Sec. 6, N $\frac{1}{2}$ NW $\frac{1}{4}$ Sec. 7, Twp. 7 S., Rge. 5 E., B.M. ; N $\frac{1}{2}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ Sec. 12, Twp. 7 S., Rge. 4 E., B.M.

The priority date established is : March 31, 1951

A fee totaling \$ 24.00 must be received within 30 days from the date of this letter in order that we can issue you a Water License as set forth in this letter.

Re: Permit No. 22015
Frank Faria

Faria Brothers, Inc.
519 Manor Blvd.
San Leandro, Calif.

Dear Sirs:

Enclosed are Forms 10 and 11, with instructions.

It will be necessary for the legal notice, Form 10, to be published in four consecutive weekly issues of an Owyhee County paper before beneficial use of the water can be proved. Only the holder of the permit can make the proof.

The date of priority which can be allowed on the Water License must be advanced the same length of time the proofs are late. The proof of beneficial use was due April 7, 1962, the original priority was March 31, 1951. Provided the proof is made August 7, 1963, the priority allowed would be July 31, 1962.

Very truly yours,

RALPH W. THOMAS, Deputy
State Reclamation Engineer

Re: Permit No. 22015
Frank Faria

Faria Brothers, Inc.
519 Manor Blvd.
San Leandro, Calif.

Dear Mr. Faria:

The Certificate of Completion of Works was issued to Frank Faria, showing 6.4 cubic feet per second from a well in SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 12, priority March 31, 1951, to irrigate land in N $\frac{1}{2}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$, Sec. 12, T. 7 S., R. 4 E. and N $\frac{1}{2}$ SW $\frac{1}{4}$, Sec. 7, T. 7 S., R. 5 E. The permit was later amended changing the well location to SE $\frac{1}{4}$ W $\frac{1}{4}$, said Sec. 12, and land to N $\frac{1}{2}$ NW $\frac{1}{4}$, Sec. 7; SW $\frac{1}{4}$, Sec. 6, T. 7 S., R. 5 E.; and N $\frac{1}{2}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$, Sec. 12, T. 7 S., R. 4 E., . . M.

Proof of beneficial use of the water was made December 11, 1954, for use of about 5.0 c.f.s. on the land last described above.

The engineer's report, dated May 31, 1957, shows that the well produced about 3.2 c.f.s. At that time the well was not controlled and apparently no use was being made of the water. There were about 460 acres leveled however the inspector could not find Mr. Faria to check the actual use of the water.

No license can be issued for water from an artesian well which is not controlled.

Very truly yours,

PAL H W. THOMAS, Deputy
State Reclamation Engineer

BOISE, IDAHO
REPORT OF ENGINEER

Permit No. 22015

This proof is for Beneficial use In Water District No. _____1. Name of applicant Frank Faria, Bruneau, Idaho2. Source of water supply: Subterranean through a well3. Location of point of diversion: Is in the SE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 12T. 7 S. R. 4 E. County of Owyhee4. Describe works as they exist, giving dimensions and capacities of same: Flowing well.

14" d. Arma-co vertical gate into wooden sump box. Also
connected to small reservoir to west by 10" x 60' pipe. It was
intended to control this well but we have heard that when
closed the ground gets wet and well leaks water
to lower grounds by gravity. Sprinkler system on highest ground

5. Water is used for: Irrigation6. State whether or not water has been turned into works of diversion: Yes

Most of farm laying untilled (not farmed this year)

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

N $\frac{1}{2}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ Section 12, Twp. 7 South, Range 4 East, B. M.N $\frac{1}{2}$ NW $\frac{1}{4}$ Section 7, Twp. 7 South, Range 5 East, B. M.SW $\frac{1}{4}$ Section 6, " "See map

This well was measured on Mar. 30-1954 in presence of Faria
by weir at 156 1/2 inches.

Measured again by Humphrey on May 27, 1957 in
presence of Carl Agembroad. H = 1.61' over d. chip weir. This was

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach? _____

Remarks: very highest reading possible (pile up on weir paddle)
Q = 3.2 cfs. Measured about 2 to 300 feet west of road
center of S. 12 water backed up and calm for approx. 50 feet

My 31-57 Land area inspected by Humphrey & Marr

Water measured by square method. H.S.R. by Marr. Q = 165
stretched a wire across top of pipe 5" = 1/2 on a steel rule.

Talked to Harrell Randall - helped Merritt measure water.This examination was made on the 31 day of May, 1957(Signed) E. N. Humphrey
Examiner.

Merritt measured water with wooden weir made by Randall
Floated a chip to get velocity correction factor.

Examination for Beneficial use

County Owyhee 12-75-4E

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

ALLEN C. MERRITT
CIVIL AND MINING ENGINEER
BOISE, IDAHO

RAYMOND J. BRIGGS
AND ASSOCIATES
619 GROVE STREET

December 5, 1956

PC. Box 1824 = Faria.
Boise.

150" Schults.

Mr. Frank Faria
Boise
Idaho

Dear Mr. Faria:

The measurements we made December 2, 1956 on the flow from your artesian well located in the Southwest corner of the SE 1/4 of NW 1/4, of Sec. 12, Tp. 7 S., R. 4 E., B.M., Owyhee County, have been computed with the following result:

H = head over crest of Cippolletti weir	0.44 ft.
l = length of crest	4.00 ft.
Q ₁ = cubic ft. per sec.	3.93 sf.
V = approach velocity measured	1.0 ft/sec.
f = correction factor	1.048
Q = total flow = 3.93 x 1.048 =	4.128 sf.
in miner's inches	208.4

This flow would cover 4.128 x 1.983 = 8.186 acres 1 foot deep every 24 hours or for 100 days average irrigation season, about 820 acres 1 foot deep or 410 acres 2 feet. Evaporation would lose about 25% of this amount but for the soil in this area this should furnish ample water for at least 400 acres of normal crops.

I trust this will supply you with the information you desired.

Very truly yours

Allen C. Merritt

ACM nh

CERTIFICATE

I certify that the foregoing computations made by me are the result of setting a 4-foot Cippolletti weir in the ditch 60 feet from the well, measuring the head over the crest of the weir and measuring the approach velocity, and that they are correct.

RE: Permit No. 22015

Mr. Frank Faria
Bruneau
Idaho

Dear Mr. Faria:

I am very sorry you were unable to be home on the date I notified you that I would be there to check in connection with your Permit No. 22015.

Mr. Thompson, who rents your place, advised me that you wanted a very accurate check on the delivery of the water and suggested that it should be measured at least three times on separate occasions.

We will be glad to accomodate you regarding this even though it is an exceptional request.

However, it will be necessary for you to construct a large stilling basin and equip it with weirs so that a reading under standard conditions can be quickly and easily taken.

We would be very glad to have you go see the method for measuring well water used by the U. S. Bureau of Reclamation on the Minidoka Pumping Project. There is one on the west side of the county road leading North out of Paul and out nine and one-half miles, located in Section 8, Township 8 South, Range 23 East, B.M., near the quarter corner between Sections 8 and 9 right alongside the road. It is best to go during the pumping season.

I am also sending you two bulletins published by the University of Idaho that explains what constitutes standard conditions for measuring water.

As soon as you have equipped the delivery from your well so that measurements can be made under standard conditions, please advise this office and suggest a series of dates, well in advance during the regular irrigation season, as to when you will be present to accompany one on an inspection and measurement of the water. Thereupon, we will arrange our schedule to accomodate you.

Yours truly,

STATE OF IDAHO
DEPARTMENT OF RECLAMATION

MEMORANDUM

April 21, 1955

Subject Permit No. 22015

File

I called upon Frank Faria as per notice in letter of April 16. Mrs. Faria said that Frank was away with a friend buying cattle and that he did not get the letter in time. Later, I talked to Carl Agenbroad and he told me that his letter came two or three days ago and that Mr. Faria had left late yesterday morning. The letters were mailed the same day. Mrs. Faria said that Mr. Thompson, who had rented the place, could go along to make the inspection.

Mr. Thompson and Mr. Jacobson, another young fellow, accompanied me and we went to the well. I said since this had been measured once before there was really no use measuring it unless you want it measured. Whereupon, Mr. Thompson advised that he most decidedly wanted it measured and advised me that there was over 200 inches and that the opening in the end of the sump box was a weir and he wanted it measured through that. I told him the only measurement I was willing to make would have to be under standard conditions and that if there was any question regarding the measurement, Mr. Faria who was the owner of the Permit would have to be present.

We got in the car and drove back to the house. On the way back, Mr. Thompson complained bitterly that everyone was against them and it didn't matter whether it was roads or water, it was the same, and that he wanted that water measured and measured right and wanted it measured three separate times at various times and then have the average for the amount of the well.

He stated that the top of the casing had been cut off about two feet since it was measured before. If this is true, there probably is a small amount more water now than at the time of the other measurement. Further, there is no certainty that a well will have the same flow every day throughout the year.

RE: Permit No. 22015

Mr. Farley M. McDowell
519 Idaho Building
Boise, Idaho

Dear Mr. McDowell:

We have placed on file the depositions of Frank Faria and two witnesses also affidavit of publication in the Owyhee Chronicle all submitted in proof of beneficial use on Permit No. 22015.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made but our field engineer will try and contact Mr. Faria at the time he makes the examination so that arrangements may be made to show him over the grounds.

Very truly yours,

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

Permit No. 22015

Proof of Application of Water to Beneficial Use

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. My name is Frank Faria; residence, six miles west of Bruneau, Idaho; occupation, farming; postoffice address, Bruneau, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Acting as an individual.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. The number of my permit is 22015; date, April 7, 1951; date of priority, March 31, 1951.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. The source of my water supply is subterranean from artesian flow at a pt. of diversion located in the western portion of SE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 12, T 7 S - R 4 E., B.M. Idaho.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined.

Ans. Works consist of a well drilled to a depth of 1,505 ft., 14" hole, cased with 80 ft. of 14" casing and 250' of 8" liner. First water was hit at 80' and first artesian flow at 480' and this kept increasing until the drilling was stopped. There is no pump and this flows what, in my opinion, would be 256" of water. I measured this over a weir and determined it and figured by computing that there was 60 Miner's inches of water for every 1 inch depth on the weir. The water was 4 7/8 inches deep over the weir.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. This water is used for agricultural production. The place of use is N $\frac{1}{2}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$, Sec. 12, T 7 S - R 4 E., B.M. and N $\frac{1}{2}$ NW $\frac{1}{4}$, Sec. 7; SW $\frac{1}{4}$, Sec. 6, T 7 S - R 5 E., B.M. I irrigate the entire forty acres in every subdivision except NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 12 and I estimate that the east 20 acres of this subdivision is irrigated. It should be noted that I have used a sprinkler system for distribution to cover the SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 12 to make a total in the aggregate of approx. 450 acres over which this water has been distributed. I have levelled this land, put ditches on it, made it available for agriculture and invested about \$14,000 in my well, \$5,000 in fencing, \$20,000 land development and \$8,000 in my irrigation and distribution system.

22015

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. Only for irrigation.

Ques. 8. What is the minimum amount of water required for the purpose specified above? This water will have to be very efficiently distributed to irrigate the area now being used over it and the minimum amount of water is now being used for this purpose.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. I am the person who originally applied for this.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. I have seen all of this water diverted under this permit and used over this land for agriculture. I started this development in 1951, raised my first agricultural crop in 1953 and another crop in 1954. I distributed water over this entire area.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. There is no other water used on this land and no other water is diverted or made appurtenant to this land in any respect.

(Sign) Frank Fair

I hereby certify that the foregoing testimony was read to the above subscribed before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in Boise, County of Ada, State of Idaho, on this 11 day of December, A. D. 19 54.

22015

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

PERMIT NO. 22015

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. ~~My name is Irvin E. Glineski; age, 46; residence, Bruneau, Idaho; occupation, well drilling; postoffice address, Bruneau, Idaho.~~

Ques. 2. Are you acquainted with Frank Faria, the holder of Permit No 22015? How long have you known him and where does he reside?

Ans. ~~I have known him 5 years and that he now resides 6 miles west of Bruneau, Idaho.~~

Ques 3. Have you read or heard read said Permit No 22015, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use

Ans. ~~The source of this water is subterranean from an artesian well, place of diversion, SE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 12, T 7 S - R 4 E., B.M. Works consist of 1,505 ft. well, 14" diameter, 80 ft. of 14" casing, 250' with 8" liner. Ditches have also been constructed for conveying this water to the place of use.~~

Ques 5 How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. ~~In my estimation this will safely conduct 5 second ft. to the place of use and I have seen a great many wells measured and use this as a gauge for my estimate.~~

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use

Ans. ~~Water used for irrigation on 160 acres of SW $\frac{1}{4}$, Sec. 6; N $\frac{1}{2}$ NW $\frac{1}{4}$, Sec. 7, T 7 S - R 5 E., B.M. 80 acres; NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 12, 20 acres, NE $\frac{1}{4}$ NW $\frac{1}{4}$, S $\frac{1}{2}$ NW $\frac{1}{4}$, entire area; N $\frac{1}{2}$ NE $\frac{1}{4}$, entire area, Sec. 12, T 7 S - R 4 E., B.M. The SW $\frac{1}{4}$ NW $\frac{1}{4}$ is irrigated by sprinkler. All improvements including levelling, ditching and distribution system have been made as a direct result of said use.~~

22015

Ques 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Irrigation. only.

Ques 8 (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. The land reclaimed is highly productive agricultural land and I do not believe that any less water could be used on this land for profitable cultivation.

Ques 9 Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans I have no interest in the works, water or lands mentioned in this permit.

Ques 10 State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans I have seen this project since it was first started for development and I actually drilled the final well and obtained the artesian water. I have had an opportunity to see this quite often during the entire development.

(Signed) Irvin E. Glenside

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me in Boise

County of Ada, State of Idaho, on this 11 day of December,
A D 19 54.

Harley M. McDaniel
Notary Public.

My commission expires 10/11/55.

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

PERMIT NO. 22015

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans My name is Clinton Graham; age, 30; residence, 10 miles south of Bruneau, Idaho; occupation, land levelling, equipment operation and agriculture; postoffice address, Bruneau, Idaho.

Ques. 2. Are you acquainted with Frank Faria, the holder of Permit No 22015? How long have you known him and where does he reside?

Ans. I have known him four years and know that he now resides 6 miles west of Bruneau, Idaho.

Ques 3 Have you read or heard read said Permit No 22015, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques 4 State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans I know that the source of this water is an artesian well and the place of diversion is located in the SE $\frac{1}{4}$, Sec. 12, T 7 S - R 4 E., B.M. I know that the depth of this well is 1,505 ft deep, 14" in diameter, cased first 80 ft. with 14" casing and 250' deeper with 8" liner. I made the ditches on this land with a D7 and D8 caterpillar and know that they are capable of conveying all the water from the point of diversion to the place of use.

Ques 5 How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. I estimate that this well flows 5 second ft. of water and that the works will safely conduct this much to the place of use and have seen this much so conveyed.

Ques. 6 State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. This water is used for irrigation and agricultural production. I have seen it irrigate the entire 160 acres in SW $\frac{1}{4}$, Sec. 6; all of the area in the N $\frac{1}{2}$ NW $\frac{1}{4}$, Sec. 7, ^{T7S R4E} all of the area in the N $\frac{1}{2}$ NE $\frac{1}{4}$, Sec. 12, E $\frac{1}{2}$ NW $\frac{1}{4}$, by sprinkler on SW $\frac{1}{4}$ NW $\frac{1}{4}$, all; east 20 acres in NW $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 12, T 7 S - R 5 E., B.M. This is all tilled land which will not produce a crop without artificial irrigation and all improvements made on this land which run over \$40,000 have been made as a direct result of this distribution of water for agricultural production.

22015

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Only for irrigation.

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. This land when properly farmed under artificial irrigation is highly productive and has to be reclaimed and irrigated before it will realize profitable cultivation and production. In my opinion, it will take at least this much water to profitably cultivate.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. I have no interest in the works or the water or lands above mentioned.

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit

Ans. I have been familiar with this land the last 10 or 15 years and have seen it developed every week or so since the applicant started. I have helped construct the ditches here and have seen the water put to beneficial use on the land.

(Signed) Clinton Graham

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me in Beise County of Ada, State of Idaho, on this 11 day of December, A. D. 1954.

Harley L. E. Dowell
Notary Public.

Gentlemen:

The Owyhee County ASC Committee have requested me to write you regarding the official measurement of the artesian well owned by Frank Faria, Bruneau, Idaho. Mr. Faria has requested assistance for the leveling of land which is to be irrigated by this well. It is the policy of the Owyhee County Committee not to approve land for leveling unless there is at least one inch of water per acre for the land leveled. I believe the official measurement was between 150 and 160 inches. Would you please advise us as to your measurements of this well.

Thanking you in advance.

Yours very truly,

George M. Walker, Office Manager
Owyhee County ASC Committee

NOTICE FOR PUBLICATION
NOTICE OF PROOF APPLICATION OF WATER
TO BENEFICIAL USE

Notice is hereby given that at 10 A. M. on the 11th day of December, 1954,
at 519 Idaho Bldg., Boise, County of Ada, State of Idaho, before
Harley H. McDowell, Notary Public, proof will be submitted of the
application to beneficial use of 6.4 cubic feet per second of the waters of subterranean source
in accordance with the terms and conditions of Permit No. 22015
heretofore issued by the State Dept. of Reclamation of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are _____

Frank Faria, Brunson, Idaho

The use to which said water has been applied is Irrigation.

The amount applied to beneficial use is 6.4 cu. ft.

The place where said water is used (if for irrigation, give full and accurate description of the lands irrigated) _____

N¹/₂ NW¹/₄, Sec. 12, T 7 S - R 4 E., B.M.

N¹/₂ NW¹/₄, Section 7; NW¹/₄, Section 6, T 7 S - R 5 E., B.M.

The name of the canal or ditch or other works by which said water is conducted to such place of use is _____

private ditch.

The right to take water from such works is based upon Permit No. 22015

The source of supply from which such water is diverted is subterranean water from a drilled well

in the NE¹/₂ NW¹/₄, Section 12, T 7 S - R 4 E., B.M.

The date of priority which said user is prepared to establish is March 31, 1951

MEMORANDUM

March 31, 1954

Subject FARIA'S WELL

File _____

This flowing well is not yet controlled. Temperature: 109° F. Water was measured on March 30, 1954 over a 2' Cipolletti Weir H= .6 of a foot. Amount is 3.13 cubic feet per second. Mr. Faria intends to build a reservoir over the outlet high enough to balance the water pressure and provide for cooling of the water for irrigation.

Mr. Faria accompanied me and helped make the measurement.

Proof of Completion of Works

AFFIDAVIT OF HOLDER

STATE OF IDAHO

County of Ada

ss.

Frank Faria, being first duly sworn, upon his oath deposes and says:

First: That he is the holder and owner of Permit to appropriate the Public Waters of the State of Idaho, No. 22015, and that his postoffice address is Bruneau State of Idaho

Second: That the name of the stream which said water is to be ~~directed~~ ^{FROM} drilled well ^{DIVERTED} to take subterranean water.

Third: That the point of diversion of said water is S. 1/4 NW 1/4, Section 12, T. 7. S. - R. 1. E. Boise Meridian, Idaho

Fourth: That under the terms and conditions of said permit, construction thereunder was required to be completed by April 7, 1956.

Fifth: That the use for which said water is intended is agricultural

Sixth: That on the date above mentioned, the works constructed under said permit were (or were not) fully completed and consisted of the following:

I. Kind of works: well drilled 700 ft., 14" casing for 200 ft.
(Reservoir, dam, ditch, flume, pipe or otherwise)

II. Dimensions of work: No dam.

(a) Height of dam feet, length of dam at top feet, length of dam at bottom feet. Material used in construction

(State whether wood, earth, stone or concrete)

(b) Capacity of reservoir acre feet.

(c) Size of headgate: Width feet, height feet.

(d) Conduit width at bottom feet, width at water line
(State whether ditch, flume or pipe)

 feet, depth of water feet; diameter of pipe inches, average grade per mile is feet. Length of conduit is miles.

Seventh: That said works are capable of conducting to the place of intended use 320 miner's inches ~~3200 feet~~ of water.

Eighth: That water appropriated under said permit is available for 320 acres of land described as follows: T. 7. S. - R. 1. E. Section 12, N. 1/4 NW 1/4, T. 7. S. - R. 5 E, Section 7, N. 1/4 NW 1/4. All of the above being located in Owyhee County, State of Idaho.

Ninth: Remarks: That this permit was to irrigate vacant federal lands which are now developed for agriculture as provided under the Desert Land Act and specifically under Idaho application #01925. As stated above, a drilled well was put down to a depth of 700 ft. and an abundant supply of artesian water was found.
