FROM: DANIEL A. NELSON DAN
DATE: 4/17/2000

**RE: EUGENE A. AND MARY M. TINDALL TRANSFER, RIGHT 51-07110
AND 51-02107**

Split ownership of 51-07110 with 51-07110B being in the name of the Bureau of Land Management for .03 cfs to irrigate 2 acres in the SENE S29. Combine remaining lands and points of diversion for both 51-07110A and 51-02107 to reflect an integrated system for irrigation of a total of 464 acres. Move 7 acres in the SESW S21 to the W ½ NW S28 from public lands to private lands.

DOCUMENTS AND APPLICATION PREPARATION

The application consists of 9 pages and 3 attachments. Note the location of the following application items:

Attach. A – Proof of ownership documentation (A1 through A4)

Attach. B – SRBA recommendation for 51-02107 (B1 through B2)

Attach. C – SRBA recommendation for 51-07110 (B1 through B2)

Applicant prepared the application with my assistance

Other information used in this review includes a Place of Use Comparison Sheet, letter from BLM approving transfer, Snake River Basin Adjudication (SRBA) GIS maps showing place of use, and 1998 Satellite Photo all attached to this memo.

NARRATIVE

These rights were recommended in the SRBA and were objected to by BLM. The BLM objection was that 9 acres of the land being irrigated under 51-07110 and 9 acres described in the permissible place of use for 51-02107 were on public land under BLM control. The applicant agreed to file this transfer and move 7 acres of irrigation from BLM lands to private lands and put the remaining 2 acres of ground irrigated under right 51-07110 in BLM's name. The applicant is also adjusting the permissible place of use for water right 52-02107 so that it does not describe any of the lands owned by the BLM. The attached letter from the BLM shows approval of the changes in the water rights.

MICROFILMED

4/17/2000

Page 2

The applicant has supplied ownership documentation that shows that he owns all of the property to be irrigated after the proposed transfer. The SRBA recommendation shows the land was irrigated in 1987. The 1998 Satellite Photo shows that these lands have been irrigated in the last 5 years. The Place of Use Comparison report shows that there are no overlapping rights.

RECOMENDATIONS

This transfer should be approved as listed on the application. BLM has already agreed with the transfer and there is no expansion.

Dear Mr. Nelson:

We have reviewed the referenced applications for transfer of water right and have no objection to either of the proposed transfers. Both of the proposed transfers implement agreements reached in the settlement of objections filed by the BLM to SRBA claims in the name of I. E. RE: APPROVAL OF 2 TRANSFERS

Dear Mr. Mallis:

I have enclosed copies of 2 applications for transfer that proposes to move irrigation from lands under the control of the Bureau of Land Management to private property. In order to continue processing these applications, our office will need written approval from your office. I have enclosed copies of both transfers for your inspection. The first transfer is for I.E. Ranches LLC (Theodore Robert Tindall). The second transfer is for Eugene and/or Mary Tindall. You may have already reviewed these transfers, but we need a response from BLM to allow the transfer to proceed.

These transfers are the result of Snake River Basin Adjudication (SRBA) objections you filed against these water rights. In earlier conversations, I informed you of this process. However, if you have new questions you can contact me at the above address.

Thanks you for your time and patience.

Respectfully,

Dear Sir:

We enclose herewith blank notice for proof of application of water to beneficial use under your Permit No. **19884**. This notice should be filled out in duplicate and returned to this office at least 40 days before the date upon which you wish to make this proof, in order to allow time for the four weeks' publication required by law.

This proof must be submitted before a Notary Public or other officer authorized by law to administer oaths.

The date for proof, as set out in your permit, is not later than July 26, 1957, and if proof is submitted later than said date, your priority will be brought down a length of time equal to the time elapsing between the date the proof is due and the date proof is actually made.

Re: Permit Nos. 19884 and 19885

Mr. Fred C. King
Bruneau
Idaho

Dear Mr. King:

We have a note attached to your permit record which states that you would like to have an extension of time for making proofs of beneficial use in connection with Permit No. 19884 in your name and Permit No. 19885 in the name of Elizabeth King. However, we do not find a letter in your file with a request for same, perhaps, we have over-looked it.

The maximum time of six (6) years was given to you to make proofs of beneficial use in connection with the permits captioned above. Therefore, we cannot grant an extension of time for making said proofs.

Proofs of Completion of Works on both of said permits were made on time (July 26, 1951) which keeps both in good standing. Provided you do not have all your lands under cultivation at this time and are not ready to make beneficial use proofs to your best advantage, it will be better for you to wait until such time that your land is all under cultivation so you can have the water filed on (one-inch-per-acre) for the land irrigated.

Your permits cannot be cancelled if you delay the proofs of beneficial use. However, the only restriction there is in delaying said proofs is that your priority date will be advanced the same number of years, months and days for which the proofs are late, i.e. your beneficial use proofs are due July 26, 1957. If you are unable to make proof by this time and delay them until July 26, 1959, the priority date will be advanced two years.

Please inform us when you intend to make said proofs and at that time we shall send to you the forms and instructions for doing same.

Very truly yours,

Dear Mr. Shepard:

In reply to your letter of August 21, 1952, requesting information as to the flow of the well described in the above numbered desert entries for which Permits Nos. 19884 and 19885 were issued by this department.

The law requiring a well log to be filed with this department did not go into effect until 1951, and these two permits together with Permits Nos. 21549, 21489 and 20917, about which you also inquire, were issued before that time and we have no logs in connection with these wells.

However, an inspection by Mr. Humphrey on October 23, 1951, showed that the well described in both Permit No. 19884 and Permit No. 19885, was delivering 2.89 cubic feet per second at that time. No later inspection has been made and there may be some variation as to the amount of flow.

Dear Sir:

In connection with desert land entries embracing public lands wherein the entrymen are using underground water for irrigation purposes, this office has been instructed to obtain from the State Reclamation Engineer, a report to determine whether the driller of the well has filed a log and test of the well as required by State law and, if so, what the flow of the well was determined to be. This information is needed at the time an entryman submits his final proof.

The entryman of this desert entry, Blackfoot 055395, indicates that the wells were drilled in the NE $\frac{1}{4}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$, and the NW $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 33, T. 7 S., R. 5 E., B.M., your application No. 27428, Permit No. 19884.

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Mr. Fred G. King

Boise, Idaho

May 1, 1951

Bureau Idaho

Dear Sir:-

Under the terms of your permit No. ~~19834~~-----you are required to complete your diversion works on or before-----**July 26, 1951**----- I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KULP

APPLICATION FOR AMENDMENT
TO PERMIT TO APPROPRIATE THE PUBLIC WATERS
OF THE STATE OF IDAHO, NO. 19884.

Comes now Fred G. King of Bruneseu, Idaho, and represents to the State Reclamation Engineer of the State of Idaho:

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. 19884;

That the points of diversion or locations of the wells are described in said Permit as being located in the NE $\frac{1}{4}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$ and NW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 33, Township 7 South, Range 5 East, B.M.

That he now requests that the point of diversion or location of the wells be changed to the SW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 28, Township 7 South, Range 5 East, B.M.

That his reason for desiring to make such change is that he has been unable to obtain permission to drill at the points originally described.

He also requests that the source of water supply be amended to a pumped well or wells instead of artesian wells.

That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.

Signed at Boise, Idaho this 12th day of July, 1950.

Date of receipt at Department of Reclamation _____

APPROVAL OF STATE RECLAMATION ENGINEER

I, Mark R. Kulp, State Reclamation Engineer of the State of Idaho, hereby approve the above and foregoing application for amendment to Permit to appropriate the Public Waters of the State of Idaho, No. 19884. Re: Permits Nos. 19884 and 19885

Mr. Fred G. King
Bruneau, Idaho

Dear Mr. King:

In reply to your inquiry as to the necessity for commencing work on the above numbered permits within the sixty days set out in the terms of same.

The Idaho statutes require that every holder of a permit must within sixty days from the date upon which said permit is issued "commence the excavation or construction of the works by which he intends to divert the water.

While it may not be possible for you to proceed to any great length with this work until you hear from the Grazing Service, you could at least start work by marking out the location of the wells, and doing a certain amount of preliminary excavating preparatory to the work of drilling the wells.

Very truly yours,
