REGULATIONS AS TO AMENDED APPLICATION AND PERMIT

Section 3255 of the Revised Codes, provides for the amendment of a permit as to lands upon which the water is to be used. The permit holder, to avail himself of the provisions of this section, should fill out and file with the Commissioner of Reclamation the application blank found upon the reverse side of the sheet. If there is not sufficient room in such blank for the legal description of the amended list of lands, this may be submitted as an exhibit, proper reference thereto being made in the application.

Before amended permit will be granted applicant must file with the application two maps, showing the following details:

- (a) Name of applicant.
- (b) Section, town and range numbers, where public survey has been made.
- (c) Source or sources of supply.
- (d) Point or points of diversion.
- (e) Route of ditch or ditches, including laterals delivering water within one mile of each 160 acre tract of the lands to be irrigated.
- (f) Lands to be irrigated to be shown by cross-hatching, outlining, or coloring.

If original permit called for more than 25 cubic feet per second, the maps must be prepared from actual survey and must be certified to by engineer in charge of survey, in the following form:

I hereby certify that this map was prepared from an actual survey made by me _____ 19____ and correctly shows position of points indicated thereon.

Re: Permit No. 15368

Mr. Chester Tindall,
Tindall, Idaho.

Dear Sir:-

The report of our field engineer for proof of beneficial use of water under your above permit shows the source of supply to be "an unnamed stream" and not Bull creek. The report also shows the point of diversion to be in the SW $\frac{1}{4}$ NW $\frac{1}{4}$ of Sec. 22, T.15 S., R. 4 E. and not in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec. 24; and the lands irrigated to be the NE $\frac{1}{4}$ of SW $\frac{1}{4}$ of Sec. 22, and not the NW $\frac{1}{4}$ of NW $\frac{1}{4}$ of Sec. 24.

3448 To correct these discrepancies upon the records, it will be necessary for you to file an application for amendment of the lands, an affidavit for change of point of diversion and explain in such affidavit how the mistake occurred in naming the source of supply in the application. Duplicate maps should accompany these papers.

The fees due under this permit amount to \$2.00, which should be sent in with the papers above mentioned.

STATE ENGINEER'S OFFICE

REGULATIONS AS TO CHANGE OF POINT OF DIVERSION

Section 3247 of the Revised Codes provides that a person entitled to the use of water, may change the place of diversion if others are not injured by such change. The Board of Irrigation has adopted the following regulations as to procedure under said section.

The person desiring to change point of diversion must file with the State Engineer an affidavit describing his water right, setting forth his intent to change point of diversion and the reasons for such change, together with an averment that no one will be injured thereby and that deponent will make such change at his own risk.

The point to which it is desired to change the place of diversion must be described as follows.

When the amount claimed does not exceed 25 cubic feet per second and point of diversion will be on surveyed land, locate same by giving the legal description of the 40 acre tract in which it will be situated. If upon unsurveyed land, give approximate distance to mouth of stream from which water is claimed or to the mouth of some creek flowing into said stream. Where there is more than one point of diversion, describe each separately and specify the amount claimed from each.

Where the water claimed exceeds 25 cubic feet per second, locate the point to which it is desired to change the place of diversion as follows.

If upon or near surveyed land, tie point of diversion by course and distance to section or quarter section corner. If said point will be more than two miles from the corner of a public survey, the tie may be made to the mouth of the stream from which the water is claimed or to the mouth of some creek flowing into said stream.

The affidavit must be accompanied by maps in duplicate, showing the following details.

1. If for irrigation and domestic use.
 - (a) Name of applicant.
 - (b) Section, town and range numbers, where public survey has been made.
 - (c) Source or sources of supply.
 - (d) Point or points of diversion.
 - (e) Route of ditch or ditches, including laterals delivering water within one mile of each 160 acre tract of the lands to be irrigated.
 - (f) Lands to be irrigated to be shown by crosshatching, outlining, or coloring.
2. If for other than irrigation and domestic purposes.
 - (a) Name of applicant.
 - (b) Section, town and range numbers, where public survey has been made.
 - (c) Source or sources of supply.
 - (d) Point or points of diversion.
 - (e) Route of ditch or ditches.
 - (f) Point or points of use.
 - (g) Point or points of return to stream after use.

If application is for more than 25 cubic feet per second, the maps must be prepared from actual survey and must be certified to by the engineer in charge of survey, in the following form:

I hereby certify that this map was prepared from an actual survey made by me 191.... and correctly shows position of points indicated thereon.

Dear Sir:-

The report of our field engineer for proof of beneficial use of water under your above permit shows the source of supply to be "an unnamed stream" and not Bull creek. The report also shows the point of diversion to be in the SW¹/₄ NW¹/₄ of Sec. 22, T.15 S., R. 4 E. and not in the SW¹/₄ NE¹/₄ of Sec. 24; and the lands irrigated to be the NE¹/₄ of SW¹/₄ of Sec. 22, and not the NW¹/₄ of NW¹/₄ of Sec. 24.

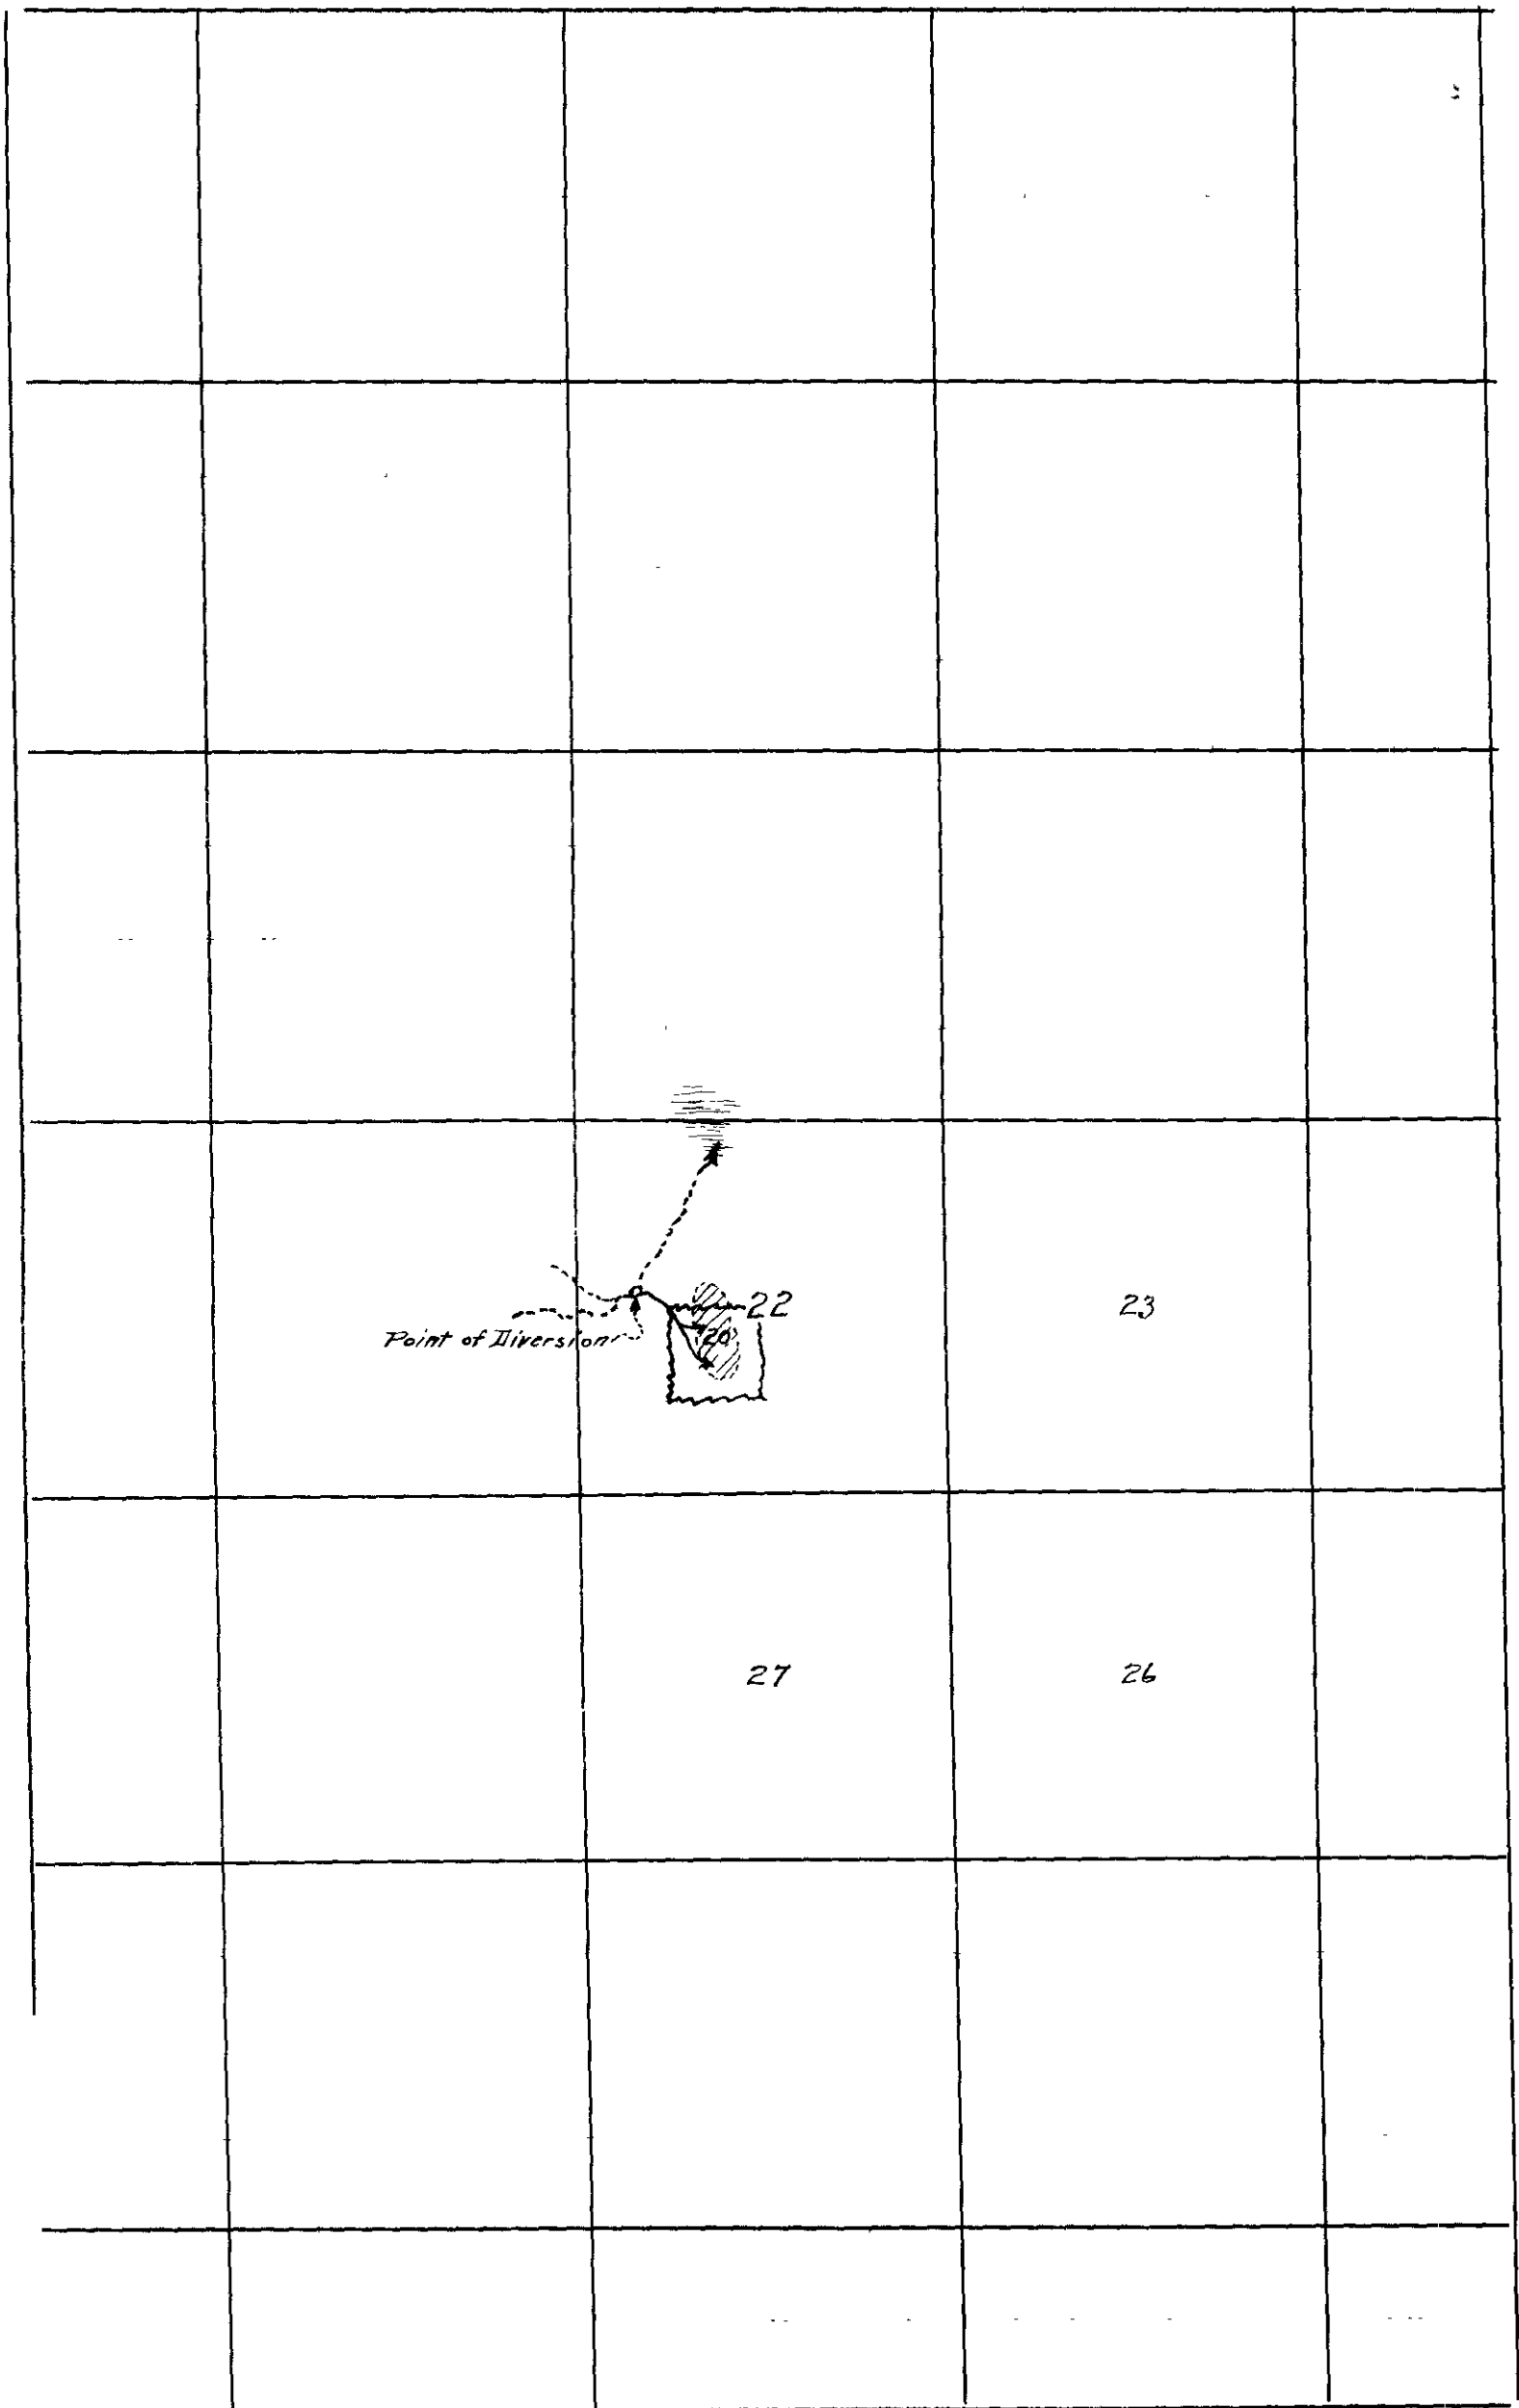

To correct these discrepancies upon the records, it will be necessary for you to file an application for amendment of the lands, an affidavit for change of point of diversion and explain in such affidavit how the mistake occurred in naming the source of supply in the application. Duplicate maps should accompany these papers.

The fees due under this permit amount to \$2.00, which should be sent in with the papers above mentioned.

Very truly yours,
GEO. N. CARTER,
Commissioner of Reclamation.

Re: Permits 15365-6-7-8,

Mr. Chester Tindall,
Tindall, Idaho.

Dear Sir:

We are today in receipt of depositions and affidavit of publication for proof of beneficial use of water under your above numbered permits. These are in proper form and will be held without further action until the examination can be made by our engineer next summer. You will then be further advised as to fees due before issuing license.

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Mr. Chester Tindall.
Tindall, Idaho

Boise, Idaho,

Dear Sir:—

Under the terms of your permit No. ~~15368~~ you are required to complete your diversion works on or before ~~Dec. 10, 1925~~. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

W. G. SWENDSEN

Permit No. 15368

Application for Extension of Time FOR COMPLETION OF WORKS

Chester Tindall of Tindall,
State of Idaho, being first duly sworn, upon his oath deposes and says:

He is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho
No. 15368

Under the terms and conditions of said permit, construction work thereunder was required to be
completed by December 10, 1923

That he has heretofore performed the following work described under said permit: That he
has merely commenced the work called for in this water appropriation
due to the fact that his three permits, 15366, 15367 and 15368 to-
gether constituted a development plan. He has practically completed
15367 in spite of adverse conditions as to finances and labor (being
a cattle grower) but was unable to prosecute work on 15366 and 15368
costing \$-----

THAT he is unable to complete the remainder of the work within the required time, for the fol-
lowing reasons, to-wit:

as that would have been an uneconomic and inefficient method and he
would not then have been able to have completed No. 15367 which con
stitutes the largest unit in the small development plan.

WHEREFORE, He asks that the Commissioner of Reclamation extend the time for the com-
pletion of construction work under said permit, to December 10, 1925

Dear Sir:

You will please find enclosed three
Water Permits, which should be filled out Dec. 10, 1923.

Owing to the Depression in my
business, it is practically impossible
for me to complete all of the work, this year.

Therefore I ask for another year's time

Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

W. G. SWENDSEN.
