RE: Permit No. G-28937

E. Lee and Ervine L. Dewey
1842 Overland Avenue
Burley, Idaho

Gentlemen:

Our field engineer's report on his inspection of proof of completion of works and application of water to beneficial use under the terms of Permit No. G-28937 shows the well is capable of conveying 0.02 c.f.s., or 1 miner's inch of water for stock watering purposes.

He found both the well and troughs to be in the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 29, T. 11 S., R. 26 E., B.M., whereas your permit indicated that they were in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ of said Section 29. Amendments will be required. The fees are \$2.00.

The attorney general's office has ruled that it is necessary that the correct location of the point of diversion and place of use be stated in the legal notice of proof of completion of works and beneficial use. When they are not correct the proof has to be readvertized, and new proofs made, before the certificates of water right can be issued.

The proper forms for readvertizing are enclosed, as well as amendment forms.
