REPORT OF ENGINEER

Permit No. G-27552

This proof is for Completion of Works & Beneficial Use In Water District No. _____

1. Name of applicant Grant and Lloyd Udy
2. Source of water supply: Subterranean flow from 2 wells
3. Location of point of diversion: Is in the 2 wells in NW $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 23
T. 11 S R. 31 E.B.M. County of Power
4. Describe works as they exist, giving dimensions and capacities of same:

Both wells are in a small fenced area in the NE corner of the NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 23. The well in the SE part of the area is 240' deep and has a top diameter of approximately 4'!. There is a 16" casing to the bottom of the well and there is an 8" x 10' horizontal discharge pipe welded to the casing at ground level, discharging into an open ditch.

5. The well in the NW part of the area is also 240' deep and has a top diameter of apparently 5'. There is a 16" casing the full depth and extending 5' above L.S.D. This casing can be swayed from one side of the hole to the other with little effort.

6. Water flows up around both casings and into the ditches provided. There are some heavy planks laid over and around, partly covering the open well around the casing.
7. List all other water rights or claims on the land, giving name, number

This water is not controlled and cannot be under these conditions. The discharge is collected in a reservoir, $\frac{1}{4}$ mile SW that has a capacity of approximately 13 AF.

Discharge of both wells was measured in the open ditch just outside the fence on the SW corner of the enclosed area. Measurement was .135' over a 1' Cipolletti Weir = .167 c.f.s. or .17 c.f.s.
