CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 36A.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 36-8318, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before January 1, 19 88.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other: The issuance of this permit in no way grants any right-of-way or easement across the land of another.

A measuring device and lockable controlling works of a type acceptable to the Department shall be permanently installed and maintained as part of the diverting works.

Dear Mr. and Mrs. Callow:

Re: Permit No. 36-8318

This office acknowledges receipt of the proof of beneficial use form and fee. Also, enclosed is a copy of the order changing the condition of approval on the permit to remove the requirement of a lockable controlling works.

This permit was approved for diversion to storage and storage for wildlife. The proof indicates that the water is used for irrigation of 50 acres. Presently, this permit does not cover your irrigation use. Unless this use is covered by another water right, you may wish to file an application for permit for this use.

If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

RITA I. FLECK

Keith Higginson, Director
Idaho State Department of Water Resources
Statehouse
Boise, Idaho 83720

Re: Permit No. 36-8318

Dear Mr. Higginson:

On the advice of Mr. James Stanton I request permission to eliminate a lockable device on my headgate. I have been using this water for two years, with the help of Idaho Fish and Game officials, and Pheasants Forever, without problem from the few users below me. We are very near the end of the ditch, and I installed a culvert which produced the correct flow when wide open. Therefore there should never be a need to lock it partially closed.

I am currently President of the Board of Directors of Big Bend Ditch, the ditch in question, and so could be considered reliable.

I have just installed a trapezoidal flume with measuring gauge, and it is in operation. This was prescribed by the Department of Water Resources in Twin Falls. Yesterday I paid my \$200.00 fee for examination. I have had help from:

Mr. James Stanton
Mr. Thunderbird and
Mr. Brockway, of University Extension

I am very eager to hear from you in the next few days, in time to make any adjustments should they prove to be necessary. The project must be completed and examined and approved by the due date, December 31, 1987, and I am anxious to meet this deadline.

Thank you very much.

Sincerely yours,

Lyle W. Callow

PROOF DUE NOTICE

RE: Permit No. 36-8318

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK
Secretary/Records Manager
