A measuring device was required on this right as part of the approval of the permit.

Dear Mr. Anderton:

The Department of Water Resources acknowledges receipt of your letter dated September 12, 1987, in which you requested help regarding water rights which may be appurtenant to your property for domestic and irrigation purposes.

After our telephone conversation on September 18, 1987, you sent me a legal description of your property. I have researched the water rights on Florence Spring, sometimes called Florence Livestock Spring, and have also researched the water rights which might be appurtenant to your land.

Permit No. 36-8294, in the name of Craig J. Laughlin, which allows diversion of water from Florence Springs for domestic purposes, appears to be appurtenant to your property. If Mr. Laughlin does not own another residence in the area as you represented to me, the permit is probably of no value to him. The field examiner who visited you this summer submitted his field examination to the Department on September 24, 1987. The examination shows you as the owner of the property, and recommends licensing for 0.02 cfs for domestic purposes. The license will be issued in the name of Craig Laughlin, since the permit was not assigned to you, but the water right will be appurtenant to your land, and Laughlin should not have any claim over the water unless he objects to the permit being used on your property.

According to the metes and bounds description, your property falls partly within the NW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 14, and partly within the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 11, Township 7S, Range 13E, B.M. Two water rights are appurtenant to land in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 14. Statutory Claim No. 36-4028, in the name of [REDACTED] claims irrigation of twelve acres. Permit No. 36-8208, in the name

APR 04 1988

Erwin, allows the irrigation development of two acres. Neither one of these water rights appears to be appurtenant to your ground. Your property in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 14 may not have irrigation water appurtenant to it, unless the water might be provided from the Snake River by Northside Canal Company or the Twin Falls North Canal Company.

You also own a triangular piece of property within the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 11. There are several decreed rights diverted from Billingsley Creek and from an unidentified spring which are appurtenant to the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 11. I've enclosed a copy of Right Nos. 36-0080, 36-0081, 36-0082 and 36-0083 for your reference. The decree excludes some land in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 11, including the triangular piece you own. The land in Section 11 probably does not have an irrigation right appurtenant to it unless it can be supplied by water from the Northside Canal Company or the Twin Falls North Canal Company.

In summary, the records indicate you have a domestic water right from Florence Spring for in-house use and irrigation of up to one-half acre. I am not able to locate any recorded rights for irrigation beyond the small amount of irrigation allowed under your domestic use. If I can be of further assistance to you, please contact me.

Gary Spackman, Supervisor

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Permit holder no longer has any connection with this property, as it was purchased by Mr. Anderton in 1986 for cash. Permittee & Mr. Anderton are in litigation over ditch rights & other matters relating to this property but not directly to this water permit. I would expect Mr. Anderton to remain the owner of this property.

There appeared to be no lockable device at the P/D, but this should not affect licensing of this permit. It appears that the pipeline from the spring carries more water than is needed for the existing uses. The watermaster does not actively deliver this water - spring water flows on its own into the pipeline. No actual controlling works were seen. The original Florence Livestock Co. property is now owned by the Idaho Dept. of Fish & Game as natural (un-irrigated) land.

I. RECOMMENDATIONS
