RE: Permit No. 36-8237

City of Jerome
152 E. Ave. E
Jerome, ID 83338

Gentlemen:

We are in the process of reviewing the above referenced permit for license issuance. The rate of diversion found by the examiner and proposed for licensing is 2.71 cfs.

In October of 1986, rules and regulations were adopted which require the payment of an examination fee prior to conducting a field inspection of the system. The examination was conducted in May of 1990, however, an exam fee was never received. The fee must be paid before a license can be issued. The fee is based upon the amount of water beneficially being used, which in this case is 2.71 cfs - the corresponding exam fee is \$150.00.

Please submit the \$150.00 exam fee within 60 days. If you have any questions, please give me a call.

Sincerely,

SHARLA CURTIS

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Place of use is within the city limits of Jerome, Idaho.
Claims 36-4195 & 4198 were transferred to this well so it could be used until the water permit was granted. City intended to transfer the claims back to other city wells, but this has not yet been done. I am recommending that the full measured amount be licensed, since it represents new water not previously used by the City.
Exam date is date photos were taken & exam was written up.

PUMPING PLANT EFFICIENCY EVALUATION

CITY OF JEROME, IDAHO

RECEIVED

APR 24 1986

Department of Water Resources
Southern District Office

General

A pumping plant efficiency evaluation was conducted for the City of Jerome on August 14, 1985 on the new deep well pump which came on-line in November 1984. The pumping unit is powered by a 150 hp electric motor and discharges water to a storage tank. There are three other pumps in the system which are scheduled for an efficiency evaluation in the spring of 1986.

The Idaho Department of Water Resources conducted the pump efficiency test through its technical assistance program for local units of government funded by the Bonneville Power Administration.

Methods and Procedures

Flow measurements on the pumping plant were obtained using a Collins flow gauge and manometer. Discharge pressure was taken at the Collins flow meter location using a liquid filled pressure gauge. The power input was calculated by measuring the voltage, amperage, and power factor of the motor during the test. Pumping water level was measured using an air line.

Summary and Recommendations

The pump efficiency test was conducted to evaluate the performance of the City of Jerome's new pumping plant. It should be noted that the pump efficiency test was not a complete system analysis and hydraulic evaluation. It is hoped that the results of this test and recommendations will provide valuable information to the city officials and operator of the water supply system in making sound decisions to reduce energy consumption.

The test indicated that the pumping plant efficiency (wire-to-water) is approximately 73 percent (see pump test summary). Based on some performance ratings (standard) developed by Pacific Gas and Electric Company, the performance of this pumping unit is rated "excellent"; therefore, no recommendations for improvement are proposed.

CERTIFIED MAIL

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, **MICROFILMED** change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

JUL 10 1986

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.
