Water is pumped by a 1.5 HP pump into a 1" buried plastic line that goes to a 120 gallon pressure tank. The water then goes to two homes for domestic use only. The lawn is irrigated by canal water. The homes are 200' apart. The pressure tank turns on at 30 psi and stops at 50 psi. Irrigation of lawns is by canal water.

2. Measurements:

Measurement is that each domestic is allowed 0.04 cfs for a total discharge of $Q = 0.08$ cfs. Since pump is only capable of 0.03 cfs, (see attached memo) then only 0.03 cfs is allowed. For alternate method, water is pumped from 280' at a pressure of 40 psi.

E. FLOW CALCULATIONS

☐ Additional Computation Sheets Attached

1. Measured Method:

see attached memo $Q = 0.03$ cfs

2. Alternate Method for Checking Purposes:

SUBJECT Permit 36-8166, Lellon Allen

Mrs. Allen was in today to complete the examination fee information sheet. In order to determine what the correct fee was, I contacted the Floyd Lilley Pump Co. in Twin Falls. They stated that the Sta-Rite 1½ hp pump, Model 8P4F02S, is rated to pump 11 gpm from 300' at 40 psi. The well log shows 280' as the static water level. Since the system capacity is less than 0.05 cfs, no exam fee is required.

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit a fee for the department to conduct the field examination, but you can change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

DEC 21 1988

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

INTER-DEPARTMENT MEMO — 1

FROM Allen

DATE 5/29/85

TO File 36-8166

SUBJECT Phone conv. with Mr. Allen

This day I talked with Mr. Allen by phone in response to my May 27, 1985 letter. Mr. Allen did not believe that the application only included $\frac{1}{4}$ acre. He indicated his acreage was $1\frac{3}{4}$ acres. I explained that possibly he only filed on the land that was irrigated from the well. He indicated that only lawns around the two houses was irrigated but he thought only $\frac{1}{2}$ - $\frac{2}{3}$ of an acre was actually irrigated from the well. I discussed this matter with Loren and we decided to correct the acreage to $\frac{2}{3}$ acres allowing the 0.02 cfs filed on for irrigation. We decided not to re-advertise nor require ~~ADA~~ an additional fee.

RE: Application for Permit 36-8166

Dear Applicants:

Your application was released for processing under the first dismissal in the Idaho Power (Swan Falls) lawsuit. Our office has completed advertising of your application and no protests were filed. During final staff review a small error was found in the amount being requested for irrigation of 1/4 acre.

Our guidelines dictate that the maximum allowable diversion rate for acreages under 5 acres in size shall be determined at a rate equal to 0.03 cfs per acre; unless, justification is submitted by the applicant showing the requirement for a larger than normal diversion rate. Your application seeks a diversion rate of 0.02 cfs for your 1/4 acre to be irrigated which is greater than the normal 0.03 cfs/acre rate. Under our guidelines we would normally allow 0.01 cfs for the irrigation of 1/4 acre.

Please find enclosed a fact sheet to be completed and returned to our office to justify a greater diversion rate than that normally allowed. Our office will hold your application until June 1, 1985 before sending it to our State Office for approval. If the fact sheet is not returned by June 1, 1985 we will reduce your irrigation diversion rate to 0.01 cfs, if the fact sheet is returned your diversion rate will be determined on the merits of the information included in the fact sheet.

If you have any questions please feel free to contact our office.

Sincerely,

Allen Merritt
Water Resource Engineer
