Case No. 39576)	**ORDER AMENDING IRRIGATION PERIOD OF USE ELEMENT IN PARTIAL DECREE AND INCORPORATING INTO PARTIAL DECREE AN EXPRESS STATEMENT REGARDING GENERAL PROVISIONS, *NUNC PRO TUNC***

A ***Partial Decree*** was entered for the above-captioned irrigation water right on December 29, 1997. The period of use element was decreed as "irrigation season." In *A&B Irrigation Dist. v. Idaho Conservation League,* 131 Idaho 411, 423, 958 P.2d 568, 580 (1998), the Idaho Supreme Court remanded with the directive to include specific dates for the period of use element. Following remand, IDWR filed a *Supplemental Director's Report, Reporting Area 3, IDWR Basin 36, Regarding Revision of Period of use (For Irrigation Water Uses) and Conjunctive Management General Provisions,* which included an irrigation period of use recommendation for this water right. No objections were filed to this recommendation and the time period for filing objections has now expired.

THEREFORE, IT IS ORDERED that the period of use for the irrigation element of the above-captioned water right is hereby amended and decreed as:

PERIOD OF USE: 04-01 10-31

THE USE OF WATER FOR IRRIGATION UNDER THIS RIGHT MAY BEGIN AS EARLY AS MARCH 15 AND MAY CONTINUE TO AS LATE AS NOVEMBER 15, PROVIDED OTHER ELEMENTS OF THE RIGHT ARE NOT EXCEEDED. THE USE OF WATER BEFORE APRIL 1 AND AFTER OCTOBER 31 UNDER THIS REMARK IS SUBORDINATE TO ALL WATER RIGHTS HAVING NO SUBORDINATED EARLY OR LATE IRRIGATION USE AND A PRIORITY DATE EARLIER THAN THE DATE A PARTIAL DECREE IS ENTERED FOR THIS RIGHT.ccc

IT IS FURTHER ORDERED that the ***Partial Decree*** for the above-captioned water right is hereby amended and decreed to contain the following:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the court at a point in time no later than the entry of a final unified decree. I.C. section 42-1412(6).

This order is being entered *nunc pro tunc* as of the date the ***Partial Decree*** was issued and is not intended to modify any subsequent administrative changes for the water right, if any, which occurred following entry of the ***Partial Decree.***

RULE 54(b) CERTIFICATE

With respect to the issues determined by the above judgment or order, it is hereby CERTIFIED, in accordance with Rule 54(b), I.R.C.P., that the court has determined that there is no just reason for delay of the entry of a final judgment and that the court has and does hereby direct that the above judgment or order shall be a final judgment upon which execution may issue and an appeal may be taken as provided by the Idaho Appellate Rules.

LOREN WERT

Dear Water Right Claimant(s):

The reverse side of this letter contains a copy of an ***Order Amending Irrigation Period of Use Element in Partial Decree and Incorporating into Partial Decree An Express Statment Regarding General Provisions, Nunc Pro Tunc*** (hereinafter ***"Order"***) for water right number 36-08000. According to Idaho Department of Water Resources (IDWR) records, you are the current owner of this water right. If you are not the current owner, please contact IDWR immediately at:

Idaho Department of Water Resources
1301 North Orchard

800-451-4129

The Purpose of the ***Order*** is to set forth beginning and ending dates for the irrigation period of use for this water right. As stated in the face of the ***Order,*** this action was necessary following the decision of the Idaho Supreme Court in *A&B Irrigation Dist. v. Idaho Conservation League,* 131 Idaho 411, 423, 958 P.2d 568, 580 (1998). This ***Order*** also incorporates into the ***Partial Decree*** an express statement that the ***Partial Decree*** is subject to such general provisions necessary for the definition or for the efficient administration of the water right. This express statement is necesssary to comply with the requirements of Idaho Code section 42-1412(6). This ***Order*** in combination with the ***Partial Decree*** that was issued for this water right on December 29, 1997, sets forth all of the elements of your water right. The Snake River Basin Adjudication (SRBA) Court suggests that you keep this document in a safe location together with a copy of the ***Partial Decree*** to show evidence of the water right. The original of this ***Order*** and the original of the ***Partial Decree*** for this water right are on file with SRBA Court. If you do not have a copy of the original ***Partial Decree,*** one can be obtained by contacting the SRBA Court at (208) 736-3011. Please note that the ***Order*** is entered ***Nunc Pro Tunc,*** meaning that the ***Order*** will be treated as if it were issued the same date that the ***Partial Decree*** was originally issued.

BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF PERMIT NO. 36-8000 IN THE NAME OF LOREN WERT	)	CONTINUATION ORDER

This matter having come before the Idaho Department of Water Resources (IDWR) as a requirement of Section 42-203D, Idaho Code, the Department Finds, Concludes and Orders as follows:

FINDINGS OF FACT

1. Section 42-203D, Idaho Code, directs IDWR to review all permits issued prior to July 1, 1985, located within the Swan Falls Trust Water Area, to determine if water was beneficially used prior to said date.

2. If water was not beneficially used until after July 1, 1985, Section 42-203D further directs IDWR to review the permit under the provisions of Section 42-203C, Idaho Code.

3. Section 42-203C requires IDWR to determine whether diversion of water under a permit issued prior to July 1, 1985, causes a significant reduction of trust water available for power production and, if there is a significant reduction, to determine whether the reduction is in the public interest.

4. Permit No. 36-8000 (permit) was issued to Loren Wert (permit holder) authorizing the diversion of 1.60 cfs of groundwater for irrigation of 80 acres.

5. Information submitted by the permit holder shows that the irrigation of the 80 acres authorized under this permit did not occur prior to July 1, 1985.

MICROFILMED

AUG 21 1989

6. The development and use of groundwater authorized under this permit does not cause a significant reduction of trust water.

CONCLUSIONS OF LAW

1. The water authorized for diversion under Permit No. 36-8000 is trust water.

2. The use of water under the permit satisfies the provisions of Sections 42-203C and 42-203D, Idaho Code.

3. An order continuing the permit shall be issued.

ORDER

IT IS HEREBY ORDERED that Permit No. 36-8000 is valid and may CONTINUE as provided in Section 42-203D, Idaho Code, subject to the following additional conditions and limitations:

1. Proof of construction of works and application of water to beneficial use shall be submitted to IDWR on or before October 1, 1991.

2. The use of trust water authorized by this right is subject to review 20 years after the date of this order to determine availability of trust water and to reevaluate the public interest.

3. The construction of diversion works must be commenced within one (1) year of the date of this order and shall proceed diligently and uninterruptedly to completion unless temporarily interrupted by circumstances over which the permit holder has no control.

4. Diversion and use of trust water under this right is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.

5. The Director retains jurisdiction of this right to change, add or remove any requirement as determined to be appropriate.

MICROFILMED

6. All conditions of approval contained on the permit are incorporated into and made part of this order.

2. **Measurements:** On August 31 1992, an average flow rate of 400 gpm or .89 cfs was recorded with the polysonic. See the attached computer reading.

E. NARRATIVE/REMARKS/COMMENTS

This well was drilled in 1988. A 30 H.P submersible pump was installed. A well log is attached.

A 6" surface mainline runs north from the P/D. It turns to a buried mainline approximately 300' from the well. It narrows to a 4" buried mainline near the end of the quarter mile line. A 6" buried line runs northeast from this mainline to the center of the pivot.

This 400 gpm pivot has 5 towers. The owner also has two quarter-mile 3" handlines that run west from the 4" buried mainline. The quarter-mile handlines have 32 hds on each with 5/32" nozzle diameters.

Due to the pump's capacity, the owner runs the handlines at different times than the pivot.

During the exam, I used the polysonic to measure 400 gpm diversion rate. The owner had his pivot & two sprinkler heads running during this measurement.

Acreage was determined with an aerial photo & planimeter. Since the pivot ran over certain rock croppings in the photo, I included this acreage accordingly. The owner claimed to have watered more than 9 acres the last couple of years in the SWSW tract. After looking at aerial slides at the bonding ASCS from 1987-1991, I find this statement not valid.

Legal limit .80 cfs — Legal limit 160 afa

Measured during exam .89 cfs — Measured capacity of system 379 afa

Paid for licensing exam up to 2.0 cfs

Note: Brian Black of IDWR conducted a field exam on 7-2-92. I met with Loren on 8-31-92 & finished the exam & the report.

GROUNDWATER MEASUREMENT REQUIREMENT ANALYSIS FILE: 36-8000
********** DATE: 9-16-92
BY: Brett Bauer

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8) \times (H.P.) \times (EFF.)}{TDH}$

Q = CFS
H.P. = Total Brake Horsepower of pumping plant (including booster)
EFF. = Pumping plant efficiency (ASSUME 70% OR 0.70)
TDH = total dynamic head = [(LIFT) + (PSI X 2.31)]
LIFT = depth to water in FEET from land surface to pumping water level
PSI = pumping pressure measured in psi near pump (if open dicharge assume zero [0])

$$Q = \frac{(8.8)\ (30\ H.P.)\ (0.70)}{[\ (120\ feet) + (40\ psi \times 2.31)\ ]} = .87\ cfs$$

LIFT FROM:	PSI FROM:	NOTES ON PUMP:

REMARKS There was no pressure gage by the well head.

ANNUAL VOLUME ANALYSIS

POTENTIAL Acre Feet/Acre/Annum = $\frac{(DAYS\ IN\ SEASON) \times (1.98) \times (Q)}{(RECOMMENDED\ ACRES\ IRRIGATED)}$

(season)	(days)
3/15 - 11/15	246
4/1 - 11/1	215
4/15 - 10/15	184
3/1 - 12/1	276

$$POTENTIAL = \frac{(214\ days) \times (1.98) \times (.87\ cfs)}{(40\ acres)}$$

POTENTIAL = 9.2 afa/acre

REQUIRED Acre Feet/Acre/Annum = 4.0 afa/acre
(AF/Ann/Ac irrigation requirement from chart for area)
NOTE that this is **NOT** Consumptive use

PROOF ACKNOWLEDGEMENT LETTER

Dear Permit Holder:

Enclosed is a copy of your proof of beneficial use form received in this office on September 25, 1991.

Please note the enclosed copy of your approved application for permit which allows for irrigation of up to 80 acres and a diversion rate of 1.6 cfs. A license cannot be issued for a rate greater than the maximum rate approved on the permit.

The total rate of diversion for which proof is submitted has been amended to show 1.6 cfs. The license exam fee for 1.6 cfs and 2.0 cfs is the same, therefore, we have processed your check. The department will continue processing the proof by notifying the region that a field exam is needed.

If you have any questions or if I can be of any further assistance, please feel free to contact me.

Sincerely,

PROOF DUE NOTICE

RE: PERMIT NO. 36-08000

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before October 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck

RE: SWAN FALLS PROCESSING
PERMIT NO. 36-8000

DATE: 6-27-89

==========

A recent review of 1984 NHAP photography available at the state SCS office and conducted by John McCleod of our office, shows that approximately 36 to 40 acres of the toal 80 acres described under the permit was irrigated in that year.

Review the aerial photo submitted by the permit holder (photo undated) appears to match the 1984 NHAP photo. The application, as originaly filed, mentions that 60 shares of canal water were being rented at that time. The irrigation which shows up on the 1984 photo therefore may have been the result of application of the rented canal shares. The photos do not indicate that a portion of the groundwater source under this permit had been developed. The latest extensio request (1986) indicates that the groundwater well had not yet been put to use.

Based on the above information, I recommend that all 80 acres under the permit be counted as trust acres.

RE: PERMIT NO. 36-8000

Dear PERMIT HOLDER:

Due to the Swan Falls litigation, development proposed by the enclosed permit may have been delayed. The Department is presently reviewing the permit and may authorize completion of development proposed under the permit.

The purpose of this letter is to determine: (1) the extent of development under the permit, and (2) your continued interest in developing or completing development under the permit.

Enclosed are two forms which will help the Department expedite the reprocessing of the permit.

Please complete and return the enclosed questionnaire if you wish to continue with your plans of development or have completed all or a portion of your development before July 1, 1985.

Please complete the enclosed relinquishment form and return it to the Department if you have abandoned or have no interest in continuing with your plans for development of the project.

If the entire project was not completed prior to July 1, 1985, and you still wish to proceed with your plans of development, then you must submit a $20.00 re-advertisement fee to the Department as required by Water Appropriation Rule 4,2,3. and Section 42-221F, Idaho Code.

Failure to return the questionnaire and pay any required re-advertisement fee within thirty (30) days of the date of this letter is cause for the Department to cancel the permit.

Dear Mr. Wert:

Re: Permit No. 36-8000

The department has received and reviewed the request for extension of time submitted in connection with the above referenced permit.

The department's records show that the permit has been included in the Idaho Power Company lawsuit relative to the Swan Falls matter and has not been dismissed. The permit is also subject to the public interest review requirements of Sec. 42-203D, Idaho Code. For these reasons, the department will hold the request for extension of time without action until the review under the provisions of Sec. 42-203D, Idaho Code is conducted.

Please feel free to contact the department if you have questions or wish to periodically check the status of the extension request.

Sincerely,

L. GLEN SAXTON
