RE: Permit G-29802
Tony Strucek

Lawrence B. Quinn
365 West Main Street

Dear Mr. Quinn:

Receipt is acknowledged for a copy of your letter of June 10, however, no check was received as indicated in the last paragraph.

Your question was that our letter of May 26, 1966, did not indicate the reason for the reduction. Mr. Strucek originally applied for 2.7 c.f.s. which would have been an inch per acre. However, our engineer was out and inspected the well and his measurement of the water being pumped at the time of examination was only 1.46 c.f.s., therefore, this is the amount actually put to beneficial use. Even if the pump may have had the capacity to pump 2.7 c.f.s. at some time when our engineer was there the maximum measurement was 1.46 c.f.s. and this was what we had listed for license.

If for some reason your client feels this measurement is incorrect we will have the engineer stop by and re-measure this well. It should be noted however, that we are licensing the well for all it produces and therefore he can use all the water he gets even if he feels it is more than the measured amount.

Very truly yours,

Attention: M. Russell Bosch, Office Manager
Re: Permit No. G-29802

Dear Mr. Bosch:

Tony Sirucek called at my office a few days ago with your letter of May 26, 1966 for review.

After consideration of the letter and discussion with Mr. Sirucek, I find I am unable to advise him the reason for reduction from the permit of 2.7 c.f.s. to 1.46, the language of your letter, "However, due to the limitations of your permit, we can only allow the amount of water originally requested, the amount of water actually used beneficially, or 1 miners inch per irrigated acre", not disclosing the reason for the reduction.

I do not have the actual permit in my file but was advised that it was issued for 2.7 c.f.s. This would meet one of the standards set forth above. The third standard of 1 miners inch per irrigated acre is well within the irrigable land area as set forth in the deposition of holder and witnesses and as set forth in your letter.

It is assumed, therefore, by both Mr. Sirycek and myself that the delivery system is questioned. He advised me that the pump capacity is sufficient to pump the 2.7 c.f.s. applied for but that by manipulating the mechanism, the delivered volume could be increased or decreased and that he had it set at the lowest production rate and assumed that it must have been tested in this condition. If this is the basis of the determination, Mr. Sirucek would appreciate another test with the privilege of being present. He feels that the delivery system is sufficient to meet the standards required and, of course, does not wish to lose priority on an additional flow of 1.3 c.f.s.

I am enclosing his check and in the event that the request is granted for a re-examination, he will, of course, pay such additional fee or costs as may be incurred for such purpose.

RE: Permit No. G-29802

May 26, 1966

Tony Sirucek
1230 North Fillmore
Jerome, Idaho

Dear Mr. Sirucek:

Our field examiner's report on his inspection of proof of completion of works and application of water to beneficial use under the terms of Permit No. G-29802 shows the well ~~was~~ is ~~now~~ capable of conveying 73 miner's inches, or 1.46 c.f.s. However, due to the limitations of your permit, we can only allow the amount of water originally requested, the amount of water actually used beneficially, or 1 (one) miner's inch per irrigated acre.

Upon receipt of the statutory fees, totaling \$ 17.00 , we will issue the Certificate of Completion of Works for 1.46 c.f.s. and the License and Certificate of Water Right for 1.46 c.f.s. confirming the right, with priority of June 12, 1961 , to the use of subterranean water with the point of diversion in the SE~~1~~/~~4~~NE~~1~~/~~4~~, Sec. 3 for irrigation of 199 acres in the S~~1~~/~~4~~NE~~1~~/~~4~~, SE~~1~~/~~4~~, Sec. 3, T. 9 S., R. 18 E., B.M.

Dear Mr. Sirucek:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the JEROME NORTH SIDE NEWS, all submitted in proof of completion of works and beneficial use on Permit No. G-29802.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.
