BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO

IN THE MATTER OF APPLICATION FOR)
TRANSFER NO. 3868 OF WATER RIGHT)
NO. 37-07031D IN THE NAME OF)
AMBROSE FARMS)
_____)

FINAL ORDER

This matter having come before the Idaho Department of Water Resources (department), as a result of the filing of an application for transfer, the department makes the following Findings of Fact, Conclusions of Law and Order:

FINDINGS OF FACT

1. On December 4, 1990, Ambrose Farms (applicant) filed Application for Transfer No. 3868 of water right No. 37-07031 (application) with the department proposing the addition of a point of diversion and a change in the place of use from land in Camas County near Fairfield to land in Gooding County near Wendell. The application sought to transfer 4.58 cubic feet per second (cfs) of ground water with a priority of June 21, 1968 for use on 229 acres of land. On January 10, 1995, the applicant reduced the number of acres to be irrigated to 191 acres.

2. On April 19, 1995, the department approved the transfer for temporary use on 80 acres during the 1995 irrigation season, subject to a mitigation requirement that during the term of the temporary transfer the applicant discontinue irrigating 80 acres of other land irrigated from the Eastern Snake River Plain Aquifer. On February 12, 1996, the department extended the temporary approval for use during the 1996 irrigation season.

3. The applicant has asked the department to permanently approve the application for transfer for irrigation use on a total of 76 acres using different mitigation requirements than were imposed under the temporary transfer for the 1995 and 1996 irrigation seasons. As part of the mitigation, the applicant proposes to use ground water right No. 36-02907 referred to as the Crumrine right.

4. The department renumbered the Crumrine right to water right No. 37-07031B in September 1990 when the department approved Transfer No. 3717 in the name of Terry Crumrine. Transfer No. 3717 authorized the diversion of 0.80 cfs of water for the irrigation of 40 acres in the Wendell area. In its approval, the department advanced the date of priority of right No. 37-07031B to April 26, 1990, limited the maximum volume of water diverted to not exceed

120 acre feet per year and retained jurisdiction over the approved transfer for five years in order to determine potential injury to existing water rights.

5. The Crumrine transfer application stated that the water right would be leased for three years to allow time for Crumrine to obtain approval of a new application for permit for the same use. The department did not specifically require that water right No. 36-02907 be transferred back to its original place of use in Basin 37. The department approved Crumrine's application for permit on July 18, 1991 for 0.70 cfs of water for use on 35 acres. On August 2, 1991, Crumrine submitted proof of beneficial use under the permit and on August 6, 1992, the department conducted a field examination.

6. As part of its proposed mitigation for transfer No. 3868, the applicant proposes not to transfer right No. 36-02907 back to its original place of use in Basin 37, but rather to utilize the right in Basin 36 as mitigation for potential injury that may occur as a result of the approval of the transfer. In addition, the applicant agrees to a condition of approval that approval of the transfer shall not be deemed conclusive as to the adequacy of the mitigation in the event of a priority call and will accept a new priority date for the newly transferred water right.

CONCLUSIONS OF LAW

1. Section 42-222, Idaho Code, provides in pertinent part as follows:

(1) any person entitled to the use of water whether represented by license issued by the department of water resources, by claims to water rights by reason of diversion and application to a beneficial use as filed under the provisions of this chapter, or by decree of the court, who shall desire to change the point of diversion, place of use, period of use or nature of use of all or part of the water, under the right shall first make application to the department of water resources for such change. ...

The director of the department of water resources shall examine all the evidence and available information and shall approve the change in whole, or in part, or upon conditions, provided no other water rights are injured thereby, the change does not constitute an enlargement in use of the original right, and the change is consistent with the conservation of water resources within the state of Idaho and is in the local public interest as defined in section 42-203A(5), Idaho Code; ...

2. The department should approve the application with the mitigation offered by the applicant and with certain conditions and limitations.

ORDER

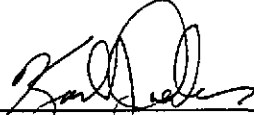

IT IS THEREFORE, HEREBY ORDERED that Transfer No. 3868 of water right No. 37-07031D is **APPROVED** subject to the following conditions and limitations:

1. Water right No. 37-07031D which is approved under transfer No. 3868 is hereby designated as water right No. 36-08760 and shall not exceed a maximum rate of diversion of 1.52 cfs for the irrigation of 76 acres in a total authorized place of use of 326 acres. The priority date is advanced to December 4, 1990, the date the application for transfer was filed.
2. As mitigation for potential injury that might otherwise occur as a result of transfer No. 3868, no water shall be diverted under right No. 36-02907. Use of water right No. 36-02907 for mitigation purposes under this transfer shall be deemed by the department to constitute a beneficial use of water.
3. By approval of this transfer, mitigation right No. 36-02907 with a rate of diversion of 0.80 cfs and an annual volume of 120 AF for the irrigation of 40 acres shall be considered appurtenant to the same place of use as authorized by this transfer.
4. Approval of this transfer contingent upon the mitigation herein provided shall not be deemed conclusive as to the adequacy of the mitigation in the event of a priority call affecting the diversion and use of water under water right No. 36-08760.
5. The remaining portion of right No. 37-07031D in excess of the amount approved for transfer shall be considered abandoned.
6. The right holder shall install a suitable device for measuring the amount of water diverted and shall annually report the information to the department.
7. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre for the lands above
8. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.

9. Failure to comply with the conditions of this transfer is cause for the director to rescind approval of the transfer.

10. Approval of this transfer does not preclude the opportunity for review of the validity of the water right in the ongoing Snake River Basin Adjudication.

Dated this 23rd day of December, 1996.

CONDITIONS OF APPROVAL

Transfer of Water Right No. 37-7031

1. That portion of Water Right No. 37-7031 which is moved to the new point of diversion and place of use identified under part 1, item B. of this application, is hereby redesignated as Water Right No. 36-02907, with the priority date advanced to April 26, 1990 for the duration of this transfer.
2. The director retains jurisdiction of this transfer up to five (5) years for the purpose of determining potential injury to existing rights, both junior and senior, in the vicinity of the transferred point of diversion.
3. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
4. A transfer application shall be filed with the Department before the water right can revert back to the original priority date, place of use and point of diversion. A new water right must then be approved before use can continue at the point of diversion and place use authorized by this transfer.
5. The maximum annual volume of water under this transfer shall not exceed 120 acre-feet per annum.
6. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.

Re: Transfer No. 3868/Water Right No. 37-07031A
MTBR&F File No. 15-864.3

Dear Mr. Young:

Your letter of March 27, 1995, suggested that Ambrose Farms might offer a mitigation plan to obtain approval of Transfer No. 3868 for the current irrigation season. During the week of April 3, the Idaho Department of Water Resources (IDWR) and Tom Ambrose reached tentative agreement on a mitigation plan. This letter provides a summary of the mitigation plan which is anticipated to be incorporated in an order from IDWR Director R. Keith Higginson to approve for one year an amount under Transfer No. 3868 to allow the irrigation of 76 acres in Section 4 of Township 8 South, Range 14 East.

This interim agreement does not change Ambrose Farms' long-range goal to work with IDWR to achieve a full approval of Transfer No. 3868 which identifies 229 acres in Section 4 of Township 8 South, Range 14 East.

There are three water rights involved in the interim arrangements between IDWR and Ambrose Farms. Water Right 37-07031A is located on the Camas Prairie near the town of Fairfield. The point of diversion of Water Right 37-07031A is outside the boundaries of the Eastern Snake Plain Aquifer as those boundaries are identified in USGS Professional Paper 1408-F. Water Right 36-07157A is a ground water right diverted southwest of the town of Wendell in Section 4 of Township 8 South, Range 14 East. As recommended in the Snake River Basin Adjudication (SRBA), A. N. Ambrose is entitled to irrigate 250 acres under Water Right 36-07157A which is diverted within the boundaries of the Eastern Snake Plain Aquifer. Water Right 36-07561 is a

Mr. Norman C. Young

 Page 2

ground water right diverted from Section 1 of Township 9 South, Range 15 East, about six miles due south of the town of Wendell, within the boundaries of the Eastern Snake Plain Aquifer. As recommended in the SRBA, A.N. Ambrose is entitled to irrigate 400 acres under Water Right 36-07561.

The intent of Transfer No. 3868 is to allow ground water which Ambrose Farms has used in Camas Prairie to be relocated to lands which Ambrose Farms has irrigated historically in the vicinity of Wendell. This season, Ambrose Farms will be irrigating 326 acres in a farming unit which comprises portions of Sections 4, 5, and 9 in Township 8 South, Range 14 East. In particular, the lands in Section 4, although irrigated since 1971, are short of water because of a 1985 transfer which removed water from Section 4 of Township 8 South, Range 14 East. Some water from Water Right 36-07157A does apply to Section 4, but Transfer No. 3868 is intended to provide a more complete supply of water for the irrigation which had occurred historically in Section 4.

All 229 acres identified as the place of use for the transferred water under Transfer No. 3868 (Water Right 37-07031A) are located in Section 4 of Township 8 South, Range 14 East, southwest of the town of Wendell. To determine the exact acres that need water for the 1995 irrigation season, IDWR and Ambrose Farms compared the 326 acres in the farming unit to both the water already recommended under 36-07157A in the SRBA and proposed Transfer No. 3868. As discussed above, Water Right 36-07157A allows irrigation of 250 acres in Sections 4, 5, and 9 of Township 8 South, Range 14 East. Although Ambrose Farms would eventually like to have an additional 229 acres irrigated in the farming unit, upon final approval of Transfer No. 3868 from the Camas Prairie, for this season the farming unit needs water for 76 acres immediately.

The mitigation plan to address the 76 acres irrigated in the 326-acre farming unit arises from Water Right 36-07561. Of the 400 acres recommended in the SRBA for irrigation by ground water under Water Right 36-07561, Ambrose Farms has identified 80 acres under this right which it will not irrigate this season in order to provide mitigation for the interim approval of 76 acres under transfer 3868. Those 80 acres are described as follows:

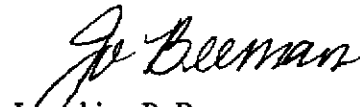

Legal Description	Acres Not Being Irrigated
T09S R15E S01 SESW	6.5
SWSW	6.5
S12 NWNW	32
S11 NENE	27
NWNE	<u>8</u>
TOTAL	<u>80</u>

Mr. Norman C. Young
April 14, 1995
Page 3

We understand that IDWR will draft an appropriate document or documents to identify the 326-acre farming unit and the sources of irrigation water for the farming unit from 36-07157A and the interim transfer of 37-07031A. The non-irrigation of 80 acres under license 36-07561 will mitigate this season for the 76 acres in the farming unit under the interim transfer of 37-07031A.

Ambrose Farms appreciates the efforts and courtesies extended to it during the lengthy negotiations from April 3 through April 7.

Sincerely,

Josephine P. Beeman

This Permit is Approved.Date 4/30/90.

If approved, this permit authorizes the construction of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85°F or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.
