Application for Amendment

POINT OF DIVERSION

Permit No. G-30333

RECEIVED

JUL 19 1965

Department of Reclamation

Comes now Mrs. Marion G. Prescott and
represent she to the State Reclamation Engineer of the State of Idaho:

That ~~he~~ she is (was) the owner and holder of Permit to appropriate the Public
Waters of the State of Idaho, No. G-30333.

That the point of diversion is described in said Permit as being located:

SW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 8, Township 8S, Range 18 EBM, Jerome County, Idaho
she

That she now requests that the point of diversion be changed to a point
located: NW $\frac{1}{4}$ NW $\frac{1}{4}$, Section 17, Township 8S, Range 18 EBM, Jerome County, Idaho

That the reason for desiring to make such change is as follows: Already have
the well drilled under Permit No. G 30774 which provides ample water for the
320 acres filed on by my husband, Thomas Prescott, and which will also pro-
vide ample water for the 160 acres on which I have filed, the two parcels
of land made contiguous.

That no one will be injured by such change, and that such change will be made
at Permit Holder's own risk.

Signed at Jerome, Idaho, this 16th day of July, 1965

Marion G. Prescott

Re: Potential Use Of Water On Land Without A Valid Water Right
Water Rights: 36-02531 & 36-02556
Point Of Diversion: T08S R18E Sec 17 NENWNW

Dear Mr. Prescott:

Staff from the Idaho Department of Water Resources (department) measured the flow of the above referenced well in 1996. Since 1995, you have cooperated with the department or a local groundwater district in providing certain information which allows us to annually estimate the diversion of water from this well. Over the past several years you may have received several reports from either the department or your ground water district that summarize field measurements and annual water use estimates. Attached to this letter is a copy of a report summarizing water use in 1996.

In 1996, department staff made a field examination of your ground water diversion and measured the discharge of your well at 4.84 cfs. You will note from review of the attached report that this diversion rate exceeds the maximum rate of flow authorized by your water rights. There may also be a discrepancy between the number of irrigated acres authorized by your water rights and the actual number of acres irrigated. Partial decrees have already been issued for rights 36-02531 and 36-02556 by the Snake River Basin Adjudication (SRBA) court. Those rights, as decreed, are limited to a total combined diversion rate of 3.90 cfs and irrigation of 428 acres. The partial decrees appear to agree with the water right information shown on the attached report.

Based on information collected under our water measurement program, we believe that you may be irrigating about 454 acres. The additional 26 acres are located in the E1/2NW1/4 of Section 17, T8S, 18E and were included under an SRBA expansion claim that was ultimately disallowed. These 26 acres appear to represent an expansion that took place between 1967 and 1976. Rights 36-02531 and 36-02556 were licensed in 1967, but the department's field exam at that time did not include the 26 acres. Aerial photography from both 1976 and 1987 confirms irrigation of the 26 acres. You reported information to the department in 1995 and 1996 indicating irrigation of 420 and 480 acres respectively. Although we have not confirmed that you are currently irrigating more than 428 acres, we are concerned about the reported discrepancies and that your water rights may not fully identify all that you irrigate.

36-02531

Based on my own review of your rights and SRBA claims, plus department field exams of licenses 36-02531 and 36-02556, I believe that some things were perhaps overlooked by both the department and the water right holders. For example, I believe the two rights should have originally been licensed or more recently decreed for a total of 5.84 cfs, rather than the 3.90 cfs. Although correction of this oversight could have addressed the excessive rate of diversion question, there remains a potential problem regarding some additional acres that are not covered by any valid water right.

The purpose of this letter is to provide you notice about certain discrepancies between your water use and the water right(s) referenced in this letter. Specifically, the department is most concerned that you may be irrigating at least 26 acres for which you have no valid water right. It is important that you confirm with the department whether or not your irrigated acreage exceeds the 428 acres authorized under your rights. If you can confirm that the irrigated acreage under the rights does not exceed 428 acres, please contact our office immediately.

If you agree that you may have more irrigated acres than authorized by the rights or that there is some other discrepancy concerning the place of use under the rights, then you must contact our office in writing by August 13, 1999 and advise us of what action you will take to correct any discrepancy regarding the irrigated acres. If you confirm that there are certain discrepancies, then there is a possibility that this matter could be corrected either by a water right transfer or filing of a new water right application. Failure to timely respond to this inquiry may result in the department making a more formal investigation and taking any necessary enforcement actions concerning excessive use under your rights.

If you have specific questions regarding this matter, please contact Tim Luke, Scott King, Burke Scholer or Cindy Hodges at 327-7900.

Sincerely,

Tim Luke

The Idaho Department of Water Resources has published a report of water measurement results in Administrative Basin 36 for 1995 and 1996. The report documents measurements of water diversions, including maximum diversion rate and volume diverted during 1996. Our records show that the diversions listed below are owned and/or managed by you. The water measurement report includes these diversions and the measurements reported for 1996 as shown.

The diversions listed below includes only those that have been found to exceed the rate of diversion and/or volume authorized by your water right(s), and may not be a complete listing of your diversions.

Please carefully review the data provided below. If it is incorrect or inaccurate, your immediate notification is requested. If you have questions, concerns, or comments about this summary, please call either Scott King, Cindy Hodges, Burke Scholer, or Tim Luke at (208) 327-7907.

Dear Mrs. Prescott:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the ~~Jerome North Side News~~ all submitted in proof of completion of works and beneficial use on Permit No. G-30333.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try to contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Very truly yours,

Dear Mrs. Prescott:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- 30333 are due not later than Dec. 21, 1966

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated - - all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Re: Permit No. G-30333

Marjorie G. Prescott,
800 E. Ave. A.,
Jerome, Idaho.

Dear Mrs. Prescott:

We enclose Permit No. G-30333 in which we direct your attention to the limitations and conditions as given on the fourth page under approval of the State Reclamation Engineer.

By this same mail, we have sent to the Bureau of Land Management two copies of this permit, one of which has been certified, to be used in connection with the Desert Land Entry filed in that office. A copy of that letter is enclosed.

We also enclose Departmental Receipt No. G-6736, which was issued covering payment in the amount of \$7.75, which includes \$5.75 for the filing fee and \$2.00 for the copies sent to the Bureau of Land Management.

Very truly yours,
