In your letter, you state "that part of the land in question is licensed by permit G-24065" I apparently do not have this information. Could you supply me with a description of the acreage covered by this permit in Section 19 Range 22E 6S, Lincoln County, Idaho and Sections 23 and 24 , Range 21 E 6S Lincoln County, Idaho.

I would appreciate very much if you would send me a copy of the original application for water permit #G-25653, which was relinquished in September of 1962. This information will aid me in making the decision in re-applying for water rights in the area under consideration.

Please send me notice of any fees or charges for this service and I will forward you a check in the proper amount.

I wish to thank you kindly for your cooperation in this matter.

Dear Mrs. Haynes:

Kindly disregard our letter of August 28, 1962, in which we showed that the Certificates of Water Right could be completed upon receipt of the statutory fees.

The application claimed there was no water right for the described land, consequently no check was made prior to the letter mentioned above. Since then we have found that License No. G-24065 has been issued for 4.5 cubic feet per second part of which irrigates 68 acres of the land described in this permit. Evidently the wells are the same and as the examiner found only 4.04 cubic feet per second there is no water available for this permit.

If the well under this permit is the same as under Permit No. G-24065, we request that you complete the enclosed relinquishment form and return it to this office.

Dear Sir:

The date for proofs of completion of works and application of water to beneficial use, as set out under the terms of Permit No. G-24065 are due not later than May 12, 1958.

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper with the county.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least forty (40) days before the above mentioned date, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed on, for what purpose it is used, the point or points of diversion and the location of use or the lands which are irrigated--all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named and before the notary public, as advertised in the publication notice.

Very truly yours,
