MARK R. KULP
State Reclamation Engineer

State of Idaho
License and Certificate of Water Right

Water License No.....G-23847..... Amount...4.4 second feet
Water District No..... Priority March 2, 1953

THIS IS TO CERTIFY that GRANT MORTENSEN and STANLEY MORTENSEN
of Rupert, Idaho, made application for a permit to appropriate the
public waters of the State of Idaho, dated March 2, 19 53 ; that Permit No.G-23847
was issued under said application; that Certificate of Completion of works, with a carrying capacity of
4.4 second feet, was issued thereunder on July 13, 19 54, showing that said works
were completed on the 15th day of September, 19 53 ; and that on the 15th
day of September, 19 53 ,

GRANT MORTENSEN and STANLEY MORTENSEN
of Rupert, State of Idaho, made proof to the satisfaction of the
State Reclamation Engineer of Idaho, of the right to use the waters of a well
~~existing~~ (subterranean flow), for the purpose of irrigation
under Use Permit No. G-23847 of the Department of Reclamation
and that said right to the use of said waters has been perfected in accordance with the laws of Idaho,
and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume
9 of Licenses at page 5290, on the 13th day of July, 19 54 ;
The right hereby confirmed dates from March 2, 19 53 ;
The Point of Diversion is located

in the NW 1/4 NE 1/4, Sec. 16, Tp. 7 S., R. 23 E., B. M. Lincoln County

That the amount of water to which such right is entitled and hereby confirmed, for the purposes
aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall
not exceed 4.4 cubic feet per second.

Description and location of use:

Twp.	Range	Sec.	Forty-acre Tract	No. Acres Described in Permit	No. Acres Actually Irrigated

APPLICATION FOR PERMIT

To Appropriate the Subterranean Waters of The State of Idaho

Application No. G- 31626
Permit No. G- 23847
District No.

1. Name of Applicant: GRANT MORTENSEN and STANLEY MORTENSEN
1005 - 7th St.
Postoffice address: Rupert County: Minidoka State: Idaho
2. Quantity of water claimed: 320 Miners inches
 - (a) Rate of withdrawal in cubic feet per second. 6.4 or Idaho
Miners' inches or gallons per minute.
 - (b) Annual withdrawal in acre feet per annum
3. Source of water supply: Subterranean, to be raised through a drilled well.
4. Location of point of diversion or well is in the NW 1/4 of the NE 1/4 of Section 16
Twp. 7 S , Rge. 23 E , B.M., County of Lincoln
5. Water is to be used for: Irrigation
6. If for municipal, industrial or recreational purposes, give:
 - (a) Point of use of water is in the 1/4 of the 1/4 of Section , Twp.
Rge. , B.M.
 - (b) Waste water or sewage effluent is to be returned to
at a point in the 1/4 of the 1/4 of Section , Twp. , Rge. , B.M.
7. Kind of works: Drilled well to be cased and equipped with turbine type pump and sprinkler system.
8. Estimated cost of works: \$ 36,500
9. (a) Is reservoir to be used? No
(b) Capacity of reservoir:
10. The time required for the completion of such work and complete application of the water to the proposed use is five years.
11. If applicant is a corporation, give:
 - I. (a) Date and place of incorporation:
(b) Amount of capital stock: \$ (c) Amount paid in: \$
(d) Names and addresses of directors:
 - II. The financial resources of the applicant are (a) Cash on hand: \$
(b) Treasury stock: (c) Bonds to be issued:
(d) Other resources:
12. The land to be irrigated is described in the following tabulation:
13. Existing water rights and/or valid permits appurtenant to the lands to be irrigated are: None
 - (a) (cubic feet per second, inches or gallons per minute) of the water herein applied for is to be supplemental to the existing water rights.
 - (b) (cubic feet per second, inches or gallons per minute) is for new lands.

BE IT KNOWN THAT The undersigned hereby makes appli cation for permit to appropriate the public waters of the State of Idaho as herein set forth.

By HARLEY M. MCDOWELL Agent.

Re: 120256 - Mortensen

Gentlemen:

We have a loan on the North Half of Section 16, Township 7 South, Range 23 E.B.M. which is irrigated from a deep well but we have no information as to the permit or license which might apply to this property.

Will you kindly check your records and advise us if a permit was obtained for a well on this described property, and if so, give us the permit number and completion date. If license has been issued kindly advise, together with the date it was issued, and the amount of water appropriated by the license.

Thanking you in advance for this courtesy we are

RE: Permit No. G-23847

Mr. Stanley Mortensen
1005 7th Street
Rupert, Idaho

Dear Mr. Mortensen:

The report of our field engineer on examination for Completion of Works and Beneficial Use on Permit No. G-23847 in the name of Grant & Stanley Mortensen, shows that your well in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 16, Township 7 South, Range 23 East, B. M. will deliver 220 inches of water which has been used to irrigate 312 $\frac{1}{2}$ acres in the NW $\frac{1}{4}$ of said section.

A Certificate of Completion of Works and license can, therefore, be issued for that amount upon receipt of the statutory fees which amount to \$5.00 for Completion of Works proof and \$16.00 license fee, the latter being at the rate of \$2.00 for each 40 acre subdivision in which the land is located.

Very truly yours,

MARK R. KULP

Mr. Stanley Mortensen
1005 Seventh St.,
Rupert, Idaho

Dear Mr. Mortensen:

We have received from Mr. Harley M. McDowell depositions of yourself and two witnesses in proof of Completion of Works and Beneficial Use on Permit No. 23847.

We have also received from the Lincoln County Journal affidavit of publication in connection with this proof. This completes your proof, but before final action is taken the law requires that a field examination be made by an engineer from this Department.

We cannot say just when this examination will be made, but our field engineer will contact you at the time he makes the examination in order that you may arrange to show him over the ground.

Very truly yours,

MARK R. KULP

Permit No. 23847

Proof of Application of Water to Beneficial Use
and Completion of Works
Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. I, Stanley Mortensen, representing Grant and Stanley Mortensen, reside in Rupert, Idaho. My occupation is farming and postoffice address, 1005 Seventh St., Rupert, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. I am acting for Grant & Stanley Mortenson who act as a partnership out of Rupert, Idaho.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. The number of our permit is 23847; date of permit March 7, 1953.
 date of priority which we are proposing to establish under this permit is Mar. 2, 1953.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Source of water supply is subterranean, raised through a drilled well and the exact point of diversion is in the NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 16, T 7 S - R 23 E, B.M.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined.

Ans. Our well is 288' and we pump from a depth of 252' and have a 12" column and discharge. This is a turbine type pump and motor, 250 h.p., we divert this subterranean water into a sprinkler system and the works for both production and diversion are capable of producing 320 Miner's inches. (In my estimation the works are actually capable of producing more water because we have extra equipment). All ditches are private and our distribution is through a sprinkler system. The only time this has been measured was for a testing of pump through a gauge system to test each particular line. At that time, I felt assured the system and the well produced more than the 320 Miner's inches.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. The water is used for irrigation and domestic and is used in the N $\frac{1}{2}$, Section 16, T 7 S - R 23 E, B.M. We irrigate 320 acres, all of each subdivision and this water has actually been used in irrigating this land from this point of diversion. This is all cultivated land. There is no natural meadow land and all of the improvements which have been made including the above described well and sprinkler system have been made as a direct result of this use on the land. The sprinkler system used for distribution here consists of 10", 8" and 6" steel mainline, 12 gauge and the portable aluminum laterals are 4". Our well cost approx. \$4360; pump and motor, \$12,500; sprinkler system, \$19,000.

23847

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. All used for irrigation.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. I feel that 320 Miner's inches is the minimum which is required for purpose used.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. We are the persons to whom the original permit was issued.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. Our first pumping was in May, 1953 and we started and have diverted and pumped on this land in the maximum of 320 Miner's inches.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. In May, 1953, we pumped water through this pump and distributed it through the sprinkler system, in my opinion 320 Miner's inches. There is no water diverted on this land except by this permit and it has all been diverted on the 320 acres described as the N¹/₂, Sec. 16, T 7 S - R 23 E. There are no other appropriations or rights claimed thereunder.

(Sign)

Stanley Mortensen

I hereby certify that the foregoing testimony was read to the above subscribed before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in Boise,

County of Ada, State of Idaho, on this 15 day of September,

A. D. 19 53,

Harley L. M. S. Dawell

Permit No. 23847

Proof of Application of Water to Beneficial Use
Deposition of Witness **and Completion of Works**

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. My name is Warren Neibaur; age, 27; residence, Rupert, Idaho; occupation, farming;
postoffice address; Rupert, Idaho.

Ques. 2. Are you acquainted with Grant & Stanley Mortensen, the
holder of Permit No. 23847? How long have you known him and where does
he reside?

Ans. I have known them 20 years and know that they now reside in Rupert, Idaho.

Ques. 3. Have you read or heard read said Permit No. 23847, and are you
familiar with its provisions and conditions?

Ans. Yes, I am.

Ques. 4. State source of water supply, place of diversion, and describe works for con-
veying water from point of diversion to place of use.

Ans. Subterranean source, raised through a drilled well; place of diversion, NW $\frac{1}{4}$ NE $\frac{1}{4}$,
Sec. 16, T 7 S - R 23 E, B.M. The works are a drilled well 288' deep. This pumps from a
depth of 252' with a 12" column and discharge. There is a turbine type pump with 250 h.p.
motor, and a sprinkler system.

Ques. 5. How many second feet of water do you estimate said works will safely con-
duct to place of use, and how much water have you seen being so conveyed?

Ans. I estimate that said works will safely conduct to place of use at least
320 Miner's inches. I have seen this much being so conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons
per minute have you seen the pump deliver, and how did you measure or estimate the
amount?

Ans. I have seen and estimate from my own experience that this pump delivers
some 6.4 cubic ft. per second.

L 23847

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. This water is used for irrigation on the entire acreage of the N $\frac{1}{2}$ Sec. 16, T.7.S. - R.23.E., R.M. This is all cultivated and there is no natural meadow land. The improvements consist of well, pump and motor (250 h.p.) and sprinkler system.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. None

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have land adjacent and have observed the whole development and application of the water diverted under said permit, continuously.

(Signed)

Warren Heibauer

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me in Boise, County of Ada, State of Idaho, on this 15 day of September, A. STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

Permit No. 23847

Proof of Application of Water to Beneficial Use
Deposition of Witness and Completion of Works

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. My name is Bruce A. Neibaur, age 32; residence, Rupert, Idaho; occupation, farming; postoffice address, Rupert, Idaho.

Ques. 2. Are you acquainted with Grant & Stanley Mortensen, the holder of Permit No. 23847? How long have you known him and where does he reside?

Ans. I have known them 20 years and know that they now reside in Rupert, Idaho.

Ques. 3. Have you read or heard read said Permit No. 23847, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. The source of this water is subterranean, raised through a drilled well; the place of diversion is the NW 1/4, Sec. 16, T 7 S - R 23 E, B.M. Works consist of 288" well pump⁹ ing from a depth of 252' with a 12" column and discharge. They have a turbine type pump and 250 h.p. motor. A sprinkler system is used for conveying the water from point of diversion to place of use.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. I feel that in open discharge, this well would produce conservatively 320 Miner's inches, and would safely conduct this much to the place of use and I have seen this much water being conveyed to this place of use.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. In my opinion there has been 6.4 cubic ft. per second or 320 Miner's inches delivered from this pump. I have never actually measured this but have had considerable experience on my own setup from which this was patterned exactly and believe that it will conservatively deliver this much from my experience.

23847

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. ~~Purpose, irrigation used on the~~ ^{N¹/₂} ~~Section 16, T 7 S - R 23 E. This water~~
is used on all of each subdivision. This is all cultivated and there is no natural
meadow land. ~~Improvements as a direct result of said use consist of well and sprinkler~~
~~system.~~

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. ~~None~~

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. ~~None.~~

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have watched this well, pump and motor, the diversion and application of this water to use since it was first applied and constantly to date. I adjoin this land on the east side with my own holdings.
