A ***Partial Decree*** was entered for the above-captioned irrigation water right on October 20, 1997. The period of use element was decreed as "irrigation season." In *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998), the Idaho Supreme Court remanded with the directive to include specific dates for the period of use element. Following remand, on June 24, 1999, IDWR filed a *Supplemental Director's Report, Reporting Area 3, IDWR Basin 36, Regarding Revision of Period of Use (For Irrigation Water Uses) and Conjunctive Management General Provisions*, which included an irrigation period of use recommendation for this water right. No objections were filed to this *Supplemental Director's Report*

THEREFORE, IT IS ORDERED that the period of use element for the irrigation portion of the above-captioned water right is hereby amended and decreed as:

PERIOD OF USE: 03-15 to 11-15

IT IS FURTHER ORDERED that the ***Partial Decree*** for the above-captioned water right is hereby amended and decreed to contain the following:

> This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the court a point in time no later than the entry of a final unified decree. I.C. section 42-1412(6).

ORDER APPROVING TRANSFERS

Blaine Larsen having applied to transfer the above-captioned water rights, protests having been filed and withdrawn, and the Director of the Department of Water Resources, having reviewed the available information, finds concludes and orders as follows:

FINDINGS OF FACTS

1. On January 6, 1989, Blaine Larsen ("Larsen") filed transfer application nos. 3502, 3503, 3504, 3505, 3506, 3507, 3508, 3512 with the Department of Water Resources ("department") proposing transfer of water right nos. 35-7390, 35-7391, 35-7630, 35-7605, 35-7586, 36-7015A, 36-2074, 36-7613, 36-2409A, 36-7495, 37-2652, 36-2121, 36-2122, 36-2127, 36-2193, 36-2194, 35-2821A, 35-2728, 35-2844, 35-7361, 36-7022, 36-2632, 36-7272, 36-7897, and 36-2300. On January 25, 1989, Larsen filed transfer application no. 3500 with the department proposing transfer of water right nos. 21-7050 and 21-7051.

MICROFILMED
JUL 17 1989

2. The transfer applications propose irrigation of 4594 acres in Jefferson and Clark Counties, and the withdrawal from

irrigation of 4894 acres in Bingham, Lincoln, Minidoka, Jefferson, and Fremont counties for the 1989 irrigation season.

3. The department published notice of the applications for transfer on February 2 and 9, 1989. Due to errors in some of the original transfer applications, the department republished notice of the applications on February 16 and 23, 1989.

4. Timely protests against approval of the application were filed by Burgess Canal Company; Great Feeder Canal Company; Lloyd R. Hicks; Owsley Canal Company; Jackett Canal Company; Holly Water Users Association; Jefferson Irrigation; Producers Canal Company; Monteview Canal Company; Level Canal Company; Independent Water Users of Mud Lake; U.S. Department of Interior, Fish and Wildlife Service; State of Idaho, Department of Fish & Game; and Ray Sanders.

5. A hearing was scheduled for March 29, 1989. Lloyd R. Hicks, Burgess Canal Company, and Great Feeder Canal Company withdrew their protests on February 27, 1989.

6. Protestant Ray Sanders withdrew his protest on March 16, 1989.

7. Two days prior to the hearing, Larsen informed the Department that the remaining protestants had agreed to withdraw their protests. As a result, the department vacated the scheduled hearing.

8. On April 6, 1989, the parties filed with the department a stipulation withdrawing the protests of the U.S. Fish & Wildlife Service, the Idaho Department of Fish & Game, and the other remaining protestants.

MICROFILMED
JUL 17 1989

9. The applications for transfer do not propose an enlargement in the rights as originally defined.

10. The stipulation for withdrawal of protests calls for a three year study to determine the effects of groundwater pumping in the Mud Lake hydrologic basin.

11. Many of the transfer applications propose to transfer water rights from a considerable distance and from areas outside the Mud Lake basin. Information does not presently exist to determine the probable impact of pumping the tranferred rights in the Mud Lake area.

12. If the original priority dates of the rights proposed to be changed are retained, later in time appropriators in the Mud Lake hydrologic basin could be injured.

CONCLUSIONS OF LAW

1. Idaho Code § 42-222 sets forth the criteria the department must consider in evaluating an application for transfer:

> The director of the department of water resources shall examine all the evidence and available information and shall approve the change in whole, or in part, or upon conditions, provided no other water rights are injured thereby, the change does not constitute an enlargement in use of the original right, and the change is in the local public interest as defined in section 42-203A, Idaho Code. . ..

2. Approval of the applications for transfer will not result in an enlargement of the water rights sought to be transferred.

MICROFILMED
JUL 17 1989

3. Approval of the applications for transfer will not conflict with the local public interest.

4. The department should retain jurisdiction over the transfer to modify, amend or cancel the transfer if it finds that other water rights are being injured by groundwater withdrawals authorized by the transfer.

5. The priority dates of water rights transferred under this transfer should be advanced to the date the transfer was filed to protect water users in the Mud Lake hydrologic basin from possible injury.

6. The transfers must be limited to one year as requested.

ORDER

IT IS HEREBY ORDERED that transfer nos. 3500, 3502, 3503, 3504, 3505, 3506, 3507, 3508, and 3512 proposing transfer of water right nos. 35-7390, 35-7391, 35-7630, 35-7605, 35-7586, 36-7015A, 36-2074, 36-7613, 36-2409A, 36-7495, 37-2652, 36-2121, 36-2122, 36-2127, 36-2193, 36-2194, 35-2821A, 35-2728, 35-2844, 35-7361, 21-7050, 21-7051, 36-7022, 36-2632, 36-7272, 36-7897, 36-2300 are APPROVED subject to the following conditions:

1. The department retains jurisdiction over the transfers to modify, amend or cancel the transfers if it finds that the diversion and use of water under the transfers injures other water rights.

2. The transfers are approved for a period of one year. On November 1, 1989, the water rights shall revert back to the original places of use and points of diversion with their original priority dates.

MICROFILMED
JUL 17 1989

3. The priority of water right nos. 35-7390, 35-7391, 35-7630, 35-7605, 35-7586, 36-7015A, 36-2074, 36-7613, 36-2409A,

36-7495, 37-2652, 36-2121, 36-2122, 36-2127, 36-2193, 36-2194, 35-2821A, 35-2728, 25-2844, 35-7361, 36-7022, 36-2632, 36-7272, 36-7897, and 36-2300 shall be advanced to January 6, 1989. The priority of water right nos. 21-7050 and 21-7051 shall be advanced to January 25, 1989.

4. The place of use is limited to the 4594 acres listed on the summary attached hereto.

Dated this 19th day of April, 1989.

BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF TRANSFER NO'S 3666, 3667, 3668, 3669, 3670, AND 3671 ON WATER RIGHT NO.'S 35-2728 35-2821B/2844/7361/7586/7605/7632, A35-10948, 36-2074/2121/2122/2124 2127/2190/2193/2194/2300/2632/2727 7015A/7022/7272/7495/7897	)	ORDER EXTENDING TEMPORARY APPROVAL OF TRANSFERS

Blaine Larsen, having received approved transfers from the Department of Water Resources in 1989, and having requested that the Department extend the two year approval period, the Director of the Department of Water Resource finds, concludes, and orders as follows:

FINDINGS OF FACT

1. On January 6, 1989, Blaine Larsen (Larsen) filed transfer applications no's 3502, 3503, 3504, 3505, 3506, 3507, 3508, and 3512 with the Department of Water Resources (department) proposing transfer of water right no.'s 35-7390, 35-7391, 35-7630, 35-7605, 35-7586, 36-7015A, 36-2074, 36-7613, 36-2409A, 36-7495, 37-2652, 36-2121, 36-2122, 36-2127, 36-2193, 36-2194, 35-2821A, 35-2728, 35-2844, 35-7361, 36-7022, 36-2632, 36-7272, 36-7897, and 36-2300. On January 25, 1989, Larsen filed transfer application no. 3500 with the Department, proposing transfer water right no.'s 21-7050 and 21-7051.

2. The transfer applications proposed irrigation of 4,594 acres in Jefferson and Clark counties from groundwater and withdrawal from irrigation of 4,894 acres in Bingham, Lincoln, Minidoka, Jefferson and Fremont counties to compensate for the proposed water use.

3. Timely protests against the approval of the applications were filed by various parties. Two days before a scheduled hearing, the protestants withdrew their protests based on a stipulation between the parties. The parties agreed that Blaine Larsen should be allowed to temporarily transfer water rights to his existing places of use pending the completion of a study by United States Geological Survey (USGS). USGS predicted completion of its study in 1991. Blaine Larsen's pending transfers in 1989 were approved for one year. Blaine Larsen subsequently filed other applications for transfer, numbered 3666, 3667, 3668, 3669, 3670, and 3671, proposing transfer of water right no's 35-2728, 35-2821, 35-2844, 35-7361, 35-7586, 35-7605, 35-7632, A35-10948, 36-2074, 36-2121, 36-2122, 36-2124, 36-2127, 36-2190, 36-2193, 36-2194, 36-

2300, 36-2632, 36-2727, 36-7015A, 36-7022, 36-7272, 36-7495, and 36-7897.

4. The last set of applications for transfer were advertised properly, and the applications were not protested. The department approved the transfers in the spring of 1990 for a period of two irrigation seasons. The transfers authorized the irrigation of 4,075 acres listed on the summary attached, and labeled as Attachment 2.

5. In the spring of 1991, Blaine Larsen filed another application for transfer, numbered 3847, proposing to transfer water right no. 36-2197 for the irrigation of an additional 147 acres in Fremont County. The application was protested by some of the original protestants, but the protests were subsequently withdrawn. The application for transfer was approved for one year.

6. The approved transfer authorized the diversion of 1.47 cfs for irrigation of the following lands:

Township	Range	Section			Acres
08N	37E	32	NE	NE	37
08N	37E	32	SE	NE	37
08N	37E	32	NE	SE	37
08N	37E	32	SE	SE	36
			TOTAL		147

7. The transfers expired at the end of the 1991 irrigation season.

8. As the end of the transfer approval period approached, the USGS represented that it would not complete its study prior to the 1992 irrigation season. Larsen negotiated with and received consent from all the original protestants to extend the prior approved transfer for one more year.

CONCLUSIONS OF LAW

1. Idaho Code, Section 42-222 sets forth the criteria the department must consider in evaluation of an application for transfer:

> The director of the Department of Water Resources shall examine all the evidence and available information and shall approve the change in whole, or in part, or upon conditions, provided no other water rights are injured thereby, the change does not constitute an enlargement in use of the original right, and the change is consistent with conservation of water resource within the state of Idaho and is in the local public interest.

2. All of the criteria listed above were considered in the prior applications for transfer listed above, which were approved by the Department of Water Resources.

3. The petition for renewal of the transfer approval does not propose any change in the points of diversion, places of use, or water rights which were originally approved in 1990. A one year extension of time will not change the Director's original analysis of the criteria of Idaho Code, § 42-222.

4. No additional notice to the public is required. The published notice of the applications described the present water use, and, at the time, the public had an opportunity to contest the applications.

5. The request for an extension of the transfer approval should be granted.

ORDER

IT IS HEREBY ORDERED that applications for transfer no.'s 3666, 3667, 3668, 3669, 3670, and 3671, are REAPPROVED, subject to the following conditions:

1. The department retains jurisdiction over the transfers to modify, amend or cancel the transfers if it finds that the diversion and use of water under the transfers injures other water rights.

2. The transfers are approved for a period of one (1) year. On November 1, 1992, the water rights shall revert back to the original places of use and points of diversion with their original priority dates.

3. The priority of all water rights involved in these transfers shall be advance to December 22, 1989.

4. The place of use is limited to the 4221 acres listed in Attachment 2 and in finding of fact no.'s 4 through 6.

5. Any change in point of diversion, place of use, period of use, or nature of use, or any change in the water rights transferred to these lands for an additional years will require the filing of a new application of transfer.

RE: WATER RIGHTS - 36-2121, 36-2122, 36-2193 AND 36-2194

Gentlemen:

In 1987, you filed with the department applications for extension of time to avoid forfeiture of the above referenced water rights pursuant to section 42-222, Idaho Code. The department approved the extension requests requiring resumption of use of the rights as follows:

36-02121 - On or before November 1, 1994.
36-02122 - On or before November 1, 1993.
36-02193 - On or before September 1, 1990.
36-02194 - On or before November 1, 1992.

The department did not send you notice of resumption of use for rights 36-02193 and 36-02194 by certified mail as required in Section 42-222(2), Idaho Code. The department, however, will consider that you have resumed use of right no. 36-02193 to the extent found to be valid in the Snake River Basin Adjudication (SRBA) and will not send you specific notice regarding the resumption of use of the right. The department also will not send you a notice of resumption of use for right no. 36-02194 since the right is recommended for forfeiture in the SRBA.

The Director's report for basin 36 also shows that right 36-02121 has been recommended to be disallowed. In addition, the water right files show that all four (4) rights have been included in a transfer filed by Blaine Larsen during the past two (2) years. The department will consider available evidence concerning the validity of rights 36-02121 and 36-02194 in any future transfers involving the two rights.

RE: Extension of Temporary Transfers of Blaine Larsen
Our File: 1207-25

Dear Mr.Johnson:

At your instruction, I am submitting this letter on behalf of Blaine Larsen to request that the Department of Water Resources grant an extension of the temporary transfers of groundwater rights that were approved for Blaine Larsen during the 1991 irrigation season. Mr. Larsen proposes to use these same water rights on the same places of use again in 1992. This request includes those water rights that were included in the group transfer application in 1991 and the portion of water right 36-02197, that was approved for temporary transfer as an individual application in 1991. Extension of the 1991 transfer approval through 1992 will not result in any changes from the previous year.

I am enclosing copies of the original lease agreements between Mr. Larsen and the water right lessors, together with copies of the extensions of the same lease agreements for the 1992 irrigation season. Also enclosed, is a copy of an extension of the 1989 Mud Lake Memorandum Agreement, executed by Blaine Larsen, the U.S. Fish and Wildlife Service, the Idaho Department of Fish and Game and the eight Mud lake area canal companies together with a stipulation by the same parties. This extension carries the 1989 Agreement forward through the 1992 irrigation season.

Based upon my conversation with you, and upon the Director's position at the last U.S.G.S. status meeting regarding the Mud Lake Study, we understand that this request should be directed to the Boise office rather than the Eastern Region, and that the extension of the transfers for one additional year will not require submission of new transfer application forms or publication of notice. This seems appropriate since there will be no change from last year's situation.

Because we are anxious to move forward with this process as quickly as possible, please contact either me or Jeff Fereday immediately if you require additional information. Thank you in advance for your assistance.

Sincerely,

Michael C. Creamer

Dear Gentlemen:

The Department of Water Resources acknowledges receipt of your applications for extension of time to avoid forfeiture as referenced above.

This office will be advertising the applications in the Southern Idaho Press on 2/4/88 & 2/11/88. The advertisements will be published for two weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If an application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If an application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Permit No. G-22162 (15B724-15D724)

Question 5. Water is from wells. The well located in the NE¼ of Sec. 15, T. 7 S., R. 24 E. is 365 feet deep, cased 18 feet with 16" casing, and the water level is 211 feet. Water is delivered to the land by 128 sprinklers which have one opening each of 11/64". The water is pumped with a turbine pump which, according to the curve, delivers 1225 G.P.M. The operating pressure is 60#.

The well located in the W½ of Sec. 15, T. 7 S., R. 24 E. is 340 feet deep, cased 7 feet with 16" casing, and the water stands at 219 feet. The water is delivered to the land by 256 sprinklers which have openings of 11/64". The water is pumped with a turbine pump which, according to the curve, delivers 1800 G.P.M. The operating pressure is 60#.

8. The minimum amount of water required is the amount now being used.

9. The present holder, Capital Company, acquired ownership by assignment from S. A. Camp Farms Co., Inc.

10. Water is used to irrigate annual crops on the NE¼ of Sec. 15 and on the W½ of Sec. 15, T. 7 S. R. 24 E. a total of 475 acres is irrigated.

10. The water from the well located in the NE¼ of Sec. 15 has been used, through sprinklers, since 1951, and the well located in the W½ of Sec. 15 has been used since 1952. Annual crops are being grown. The full capacity of both pumps is being used.

Permit No. G-23809 (14A623)

Question 5. Water is from a well 473 feet deep, cased 9 feet with 16" casing, and the water level is 395 feet.

6. Water is used to irrigate annual crops. The water is used on the S½ of the NW¼ and on the SW¼ of Sec. 34, T. 6 S. R 23 E. a total of 240acres.

8. The amount of water being used is the amount needed.

10. Water from this well is being used this year, 1956, for the first time. It is delivered through sprinklers to irrigate annual crops.

Question 5. Water is from a well which is 306 feet deep, cased 30 feet with 16" casing, and water stands at 236 feet. Based upon the curve for this pump, it is delivering 1175 gal.per minute. Water is delivered to the land by 128 sprinklers most of which have one opening of 11/64". The operating pressure is 60#.

6. Water is used to irrigate annual crops such as grain, potatoes, sugar beets, etc. The SW¼ of Sec. 35, T. 6 S. R. 24 E. is being ifrigated, a total of 160 acres.

8. The minimum amount of water required is the amount now being used.

9. Present holder, Capital Company, acquired ownership of the permit by assignment from S. A. Camp Co.

10. Water has been used each year commencing with 1951, through sprinklers, to irrigate a total of 160 acres.

Permit No. G-22154 (26C 624 - 26 D 624)

Question 5. Water is from wells. The well located in the NW¼ of the SE¼ of Sec. 26, T. 7 S. R. 24 E. is 417 feet deep, cased 12½ feet with 16" casing, and water stands at 233½". The water is pumped with a turbine pump which, according to the curve, delivers 1025 G.P.M. Water is delivered to the land by 128 sprinklers most of which have one opening 11/64". The operating pressure is 60#.

~~Water is used to irrigate annual crops such as grain, potatoes, sugar beets, etc.~~

The well located in the SE¼ of the SW¼ of Sec. 26, T. 7 S. R. 24 E. is 380 feet deep, cased 7' with 16" casing, and water stands at 285 feet. The water is pumped with a turbine pump which, according to the curve, delivers 1600 G.P.M. Water is delivered to the land by 128 sprinklers most of which have one opening 11/64". The operating pressure is 60#.

6. Water is used to irrigate annual crops such as potatoes, grain, sugar beets, etc. Under this permit, the SE¼ and the SW¼ of Sec. 26, T. 7 S. R. 24 E. are being irrigated. 151 acres of the SE¼ and 160 acres of the SW¼ are being irrigated.

8. The minimum amount of water needed is the amount now being used.

9. The present holder, Capital Company, acquired ownership of the ~~priority~~ permit by assignment from S. A. Camp Co.

10. Water has been used each year commencing with 1951 from the well in the SE¼ of Sec. 26, through sprinklers, to irrigate the SE¼. Water was used from the well in the SW¼ of Sec. 26 commencing in 1954, to irrigate the SW¼ of Sec. 26.

Question 5. Water is from wells. The well located in the NW¼ of Section 18 is 400 feet deep, cased 8 feet with 16" casing, and the water stands at 321 feet. Water is delivered to the land by 128 sprinklers having two openings each 5/32" and 3/32". The water is pumped with a turbine pump which, according to the curve, delivers 1100 G.P.M. The operating pressure is 60#.

The well located in the NE¼ of Sec. 18 is 400 feet deep, cased 15 feet with 16" casing, and water stands at 323 feet. Water is delivered by 128 sprinklers having two openings each 5/32" and 3/32". Water is pumped with a turbine pump which, according to the curve, delivers 1150 G.P.M. The operating pressure is 60#.

The well located in the SW¼ of Sec. 18 is 391 feet deep, cased 8 feet with 16" casing, and water stands at 286 feet. Water is delivered to the land by 128 sprinklers most of which have two holes each 5/32" and 3/32". Water is pumped with a turbine pump which, according to the curve, delivers 1025 G.P.M. The operating pressure is 60#.

The well located in the SE¼ of Sec. 18 is 390 feet deep, cased 11 feet with 16" casing, and the water stands at 275 feet. Water is delivered to the land by 128 sprinklers most of which have one hole each 11/64". Water is pumped with a turbine pump which, according to the curve, delivers 1150 G.P.M. The operating pressure is 60#.

8. The minimum amount of water needed is the amount now being used.

10. The water from the well located in the NW¼ has been used each year since 1952, through sprinklers, to irrigate the entire NW¼ of Sec. 18 being 122 acres.

The water from the well located in the NE¼ of Sec. 18 has been used each year since 1953 through sprinklers, to irrigate the NW¼, a total of 160 acres.

The water from the well located in the SE¼ of Sec. 18 has been used each year since 1952, through sprinklers, to irrigate the entire SE¼, a total of 160 acres.

The water from the well located in the SW¼ of Sec. 18 has been used each year since 1954, through sprinklers, to irrigate 101 acres in 1954 and 122 acres in 1955.

6. Water is used to irrigate annual crops of grain, potatoes, sugar beets, etc. and the entire NW¼, NE¼, SE¼ and SW¼, of Sec. 18, T. 7 S., R. 24 E. are being irrigated, a total of 564 acres.

Mr. Everett Warner, District Manager
Capital Company
901 11th Street
Rupert, Idaho

Dear Mr. Warner:

We have the Reports made by our Field Engineer in your files now in connection with the Permits captioned above. You are entitled to a "Certificate of Completion of Works" and "License and Certificate of Water Right" for each Permit upon receipt of the statutory fees, (based upon $5.00 for completion of works and $2.00 for each 40-acre subdivision for License) itemized and enclosed with this letter.

Before Certificate of Completion of Works and a License can be issued on Permit Nos: G-22164, G-22165, G-22169, G-23807, G-23809, G-23815 and G-23816, it is necessary that you sign and return to this department the amendments to the land list (amendments are attached to corresponding itemized sheet and enclosed with this letter) together with the statutory fees in connection with these seven permits.

If you wish to obtain a Certificate of Completion of Works and a License for all the Permits at this time; the fees amount to $175.00 for Completion of Works and $691.00 for License, making a total of $866.00.

Very truly yours,

MARK R. KIRK

Permit No. G-23809

Proof of Application of Water to Beneficial Use

and Completion of Works

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. Everett Warner, 901 - 11th St., Rupert, Idaho. District Manager for Capital Company. My Postoffice address is P. O. Box 619, Rupert, Idaho

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Capital Company, 1 Powell St., San Francisco, California. I am the local represenative and have authority to appear for Capital Co.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. The permit Number is G-23809 dated February 27, 1953 and the date of priority we propose to establish is February 25, 1953.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Water is from a well 473 feet deep, located in the center of the W½ of Sec. 34, T. 6 S., R. 23 E. which is the point of diversion.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. Water is from a well 473 feet deep, cased 9 feet with 16" casing and the water stands at 395 feet. The water is pumped with a turbin pump which, according to the curve, delivers 1550 gpm. The operating pressure is 60#. The water is delivered to the land by 253 sprinklers with one opening each of 11/64".

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water is used for irrigation of annual crops and the water is used on the S½ of the NW¼ and on the SW¼ of Sec. 34, T. 6 S. R. 23 E. being 80 acres and 160 acres, a total of 240 acres.

f 23809

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. - - - -

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. As stated in answer to question 5.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. - - - - -

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. Water is being used this year, 1956, for the first time. It is delivered through sprinklers to irrigate annual crops. The full capacity of the pump is being used.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. None
