INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

Important Information About Your Water Right

August 27, 2001

OKELBERRY FARMS INC
1935 E 1200 S
HAZELTON, ID 83335

Dear Water Right Claimant(s):

The reverse side of this letter contains a copy of an *Order Amending Irrigation Period of Use Element in Partial Decree and Incorporating into Partial Decree An Express Statment Regarding General Provisions, Nunc Pro Tunc* (hereinafter "*Order*") for water right number 36-02151. According to Idaho Department of Water Resources (IDWR) records, you are the current owner of this water right. If you are not the current owner, please contact IDWR immediately at:

Idaho Department of Water Resources
1301 North Orchard
Boise, ID 83706
800-451-4129

The Purpose of the *Order* is to set forth beginning and ending dates for the irrigation period of use for this water right. As stated in the face of the *Order*, this action was necessary following the decision of the Idaho Supreme Court in *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998). This *Order* also incorporates into the *Partial Decree* an express statement that the *Partial Decree* is subject to such general provisions necessary for the definition or for the efficient administration of the water right. This express statement is necessary to comply with the requirements of Idaho Code section 42-1412(6). This *Order* in combination with the *Partial Decree* that was issued for this water right on January 15, 1998, sets forth all of the elements of your water right. The Snake River Basin Adjudication (SRBA) Court suggests that you keep this document in a safe location together with a copy of the *Partial Decree* to show evidence of the water right. The original of this *Order* and the original of the *Partial Decree* for this water right are on file with SRBA Court. If you do not have a copy of the original *Partial Decree*, one can be obtained by contacting the SRBA Court at (208) 736-3011. Please note that the *Order* is entered *Nunc Pro Tunc*, meaning that the *Order* will be treated as if it were issued the same date that the *Partial Decree* was originally issued.

Sincerely,

Diana Delaney
Case Administrator

In Re SRBA)

Water Right 36-02151

Case No. 39576)

ORDER AMENDING IRRIGATION PERIOD OF USE ELEMENT
IN PARTIAL DECREE AND INCORPORATING INTO PARTIAL
DECREE AN EXPRESS STATEMENT REGARDING GENERAL
PROVISIONS, *NUNC PRO TUNC*

A *Partial Decree* was entered for the above-captioned irrigation water right on January 15, 1998. The period of use element was decreed as "irrigation season." In *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998), the Idaho Supreme Court remanded with the directive to include specific dates for the period of use element. Following remand, IDWR filed a *Supplemental Director's Report, Reporting Area 3, IDWR Basin 36, Regarding Revision of Period of use (For Irrigation Water Uses) and Conjunctive Management General Provisions*, which included an irrigation period of use recommendation for this water right. No objections were filed to this recommendation and the time period for filing objections has now expired.

THEREFORE, IT IS ORDERED that the period of use for the irrigation element of the above-captioned water right is hereby amended and decreed as:

PERIOD OF USE: 03-15 11-15

IT IS FURTHER ORDERED that the *Partial Decree* for the above-captioned water right is hereby amended and decreed to contain the following:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the court at a point in time no later than the entry of a final unified decree. I.C. section 42-1412(6).

This order is being entered *nunc pro tunc* as of the date the *Partial Decree* was issued and is not intended to modify any subsequent administrative changes for the water right, if any, which occurred following entry of the *Partial Decree*.

RULE 54(b) CERTIFICATE

With respect to the issues determined by the above judgment or order, it is hereby CERTIFIED, in accordance with Rule 54(b), I.R.C.P., that the court has determined that there is no just reason for delay of the entry of a final judgment and that the court has and does hereby direct that the above judgment or order shall be a final judgment upon which execution may issue and an appeal may be taken as provided by the Idaho Appellate Rules.

RE: Permit No. G-22466

Mr. Clarence Clift
425 N. Stockton Street
Stockton, California

Dear Mr. Clift:

The report of our field engineer on examination for Completion of Works and Beneficial Use on your Permit No. G-22466 shows that your well in the NE $\frac{1}{4}$ SW $\frac{1}{4}$ Section 14, Twp. 10 South, Rge. 20 East, B. M., will deliver 116 inches of water which has been used to irrigate 160 acres in the SW $\frac{1}{4}$ of said Section.

A Certificate of Completion of Works and License can, therefore, be issued for 116 inches or 2.32 second feet upon receipt of the statutory fees amounting to \$5.00 for Certificate of Completion of Works and \$8.00 License fee.

Very truly yours,

Affidavit of Publication

NOTICE OF PROOF OF COMPLETION OF WORKS AND APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 10:00 A. M., on the 20th day of February, 1954 at Boise, County of Ada State of Idaho, before Harley M. McDowell, Notary Public, proof will be submitted of the completion of works for the diversion of 4 cubic feet per second of the waters of well located in NE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 14, T 10 S, R. 20 E, B. M. and of the application to beneficial use of said water, in accordance with the terms and conditions of Permit 22466 heretofore issued by the Department of Reclamation of the State of Idaho.

1. The name and postoffice address of the person or corporation holding said permit are Clarence Clift, Box 126 Hazelton, Idaho

2. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conveying to the place of use, in accordance with the plans accompanying the application for such permit, is 4 cubic feet per second.

3. The use to which said water has been applied is irrigation purposes, and the amount applied to beneficial use is 4 cubic feet per second.

4. The place where said water is used is SW $\frac{1}{4}$ NW $\frac{1}{4}$ and SW $\frac{1}{4}$, Sec. 14, T 10 S, R 20 E, B. M.

5. The date of priority which said user is prepared to establish is November 14, 1951.

MARK R. KULP,
State Reclamation Engineer.
(Pub. Jan. 28; Feb. 4, 11, 18, '54)

Emery D. Gne being first duly sworn according to law, says he is the Publisher—Manager of the FIRST SEGREGATION NEWS published weekly at Hazelton, Idaho; that said newspaper is of general circulation and had been published more than seventy-eight consecutive weeks prior to the first publication of attached notice; that notice attached hereto and made a part of this affidavit, was published in said newspaper for 4 consecutive weeks: that the first publication was on the 28 day of January 1954 and the last publication was on the 18 day of February 1954, that said notice was published in the entire issue of said newspaper each week during said period of time; that said notice was published in the said newspaper proper, and not in a supplement thereto.

Subscribed and sworn to before me this 20 day of Feb. 1954.

W. D. Mitchell
Notary Public in and for the State of Idaho, residing at Hazelton, Idaho.

Permit No. 22466

Proof of Application of Water to Beneficial Use
and Completion of Works
Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. My name is Clarence Clift; residence, 8 miles SE of Hazelton, Idaho (in Twin Falls during the winter); occupation, farming; postoffice address, Box 126, Hazelton, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Individual

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. Permit # is 22466 dated 11/15/51; date of priority I propose to establish is 11/14/51.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Source of water is subterranean; exact point of diversion is NE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 14, T10S-R20E (a well).

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined.

Ans. The works consist of a drilled well to a depth of 425' which water raises to 358', has an 8" casing, is cased for a depth of 380' and has been tested as conveying 200 Miner's inches. Through a sprinkler system at 50 lb. pressure, it regularly delivers adequate water for beneficial use on all the land. A pump is used and it is my opinion the pump would discharge 200 inches. This was measured by seeing the amount of water the well produced and from my knowledge of seeing water measured in the past. Also, when it was put under pressure, I know about how much water it takes for each sprinkler head so can tell in this manner what the well was actually delivering. Sprinkling system approx. 1 mile in length, steel mainline tapering from 8" to 6". 5 1/4 mile aluminum portable 4" lines (cost of this system with pump \$20,000).

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. The water is used for irrigation; the place of use: T 10 S - R 20 E, Sec. 14, SE $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres; NE $\frac{1}{4}$ SW $\frac{1}{4}$, 40 Acres; NW $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres; SW $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres; SW $\frac{1}{4}$ NW $\frac{1}{4}$, 18 acres. This is all cultivated, has been sprinkled and produces intensive row crop. The improvement of sprinkler system, irrigation, preparation of seed bed and planting of agricultural crop was all made as a direct result of this use.

22466

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. Only for irrigation.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. I feel that 1 miner's inch/acre is the minimum amt. of water which is required for intensive agriculture here.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. I am the original person who applied for this permit.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. In 1953, I installed the sprinkler system and made beneficial use on all the land mentioned in Statement #6. All of this water was diverted under this permit and used for agricultural purposes.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. No other water has been used or diverted onto these lands from any other permit, or applied for beneficial use on these lands.

(Sign)

Clarence Clift

I hereby certify that the foregoing testimony was read to the above subscribed before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in Boise,

County of Ada, State of Idaho, on this 20 day of February,

A. D. 1954,

Harley W. Donnell

Notary Public for the State of Idaho

22464

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

Permit No. 22466

Proof of Application of Water to Beneficial Use
and Completion of Works
Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. My name is D. M. Cummins; age, 67; residence, Hazelton, Idaho; occupation, farming;
postoffice address, Hazelton, Idaho.

Ques. 2. Are you acquainted with Clarence Clift, the
holder of Permit No. 22466? How long have you known him and where does
he reside?

Ans. I have known him 30 years and that he now resides 8 miles southeast of Hazelton,
Idaho.

Ques. 3. Have you read or heard read said Permit No. 22466, and are you
familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for con-
veying water from point of diversion to place of use.

Ans. Source of water is subterranean. Place of diversion, a drilled well in NE 1/4 Sec.
14, T 10S-R20E, B.M. drilled to a depth of 524' with casing (8") extending 380' down. The
water raised to 358'. There is a turbine type pump and motor and sprinkler system.

Ques. 5. How many second feet of water do you estimate said works will safely con-
duct to place of use, and how much water have you seen being so conveyed?

Ans. About 200 Miner's inches, and have seen this amount conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons
per minute have you seen the pump deliver, and how did you measure or estimate the
amount?

Ans. About 200 Miner's inches. This is my estimate from being familiar with the appli-
cation of water to irrigation over a long period of years.

22466

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation. SE $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres; NE $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres; NW $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres; SW $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres; SW $\frac{1}{4}$ NW $\frac{1}{4}$, 18 acres. Sec. 14, T 10 S - R 20 E. This is cultivated and sprinkler system, preparation for seed bed and irrigation have all been as a direct result of said use.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Irrigation.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Land is a volcanic ash soil and I would estimate it requires 1 Miner's inch per acre for profitable cultivation.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. I was a tenant on this farm in 1953 but have no interest in the works, water or land above mentioned.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. As a tenant, I have witnessed the beneficial use of this water constantly.

(Signed) D. M. Cummings

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me in Boise, County of Ada, State of Idaho, on this 20 day of February, A. D. 19 54.

Harley L. L. S. Donnell

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

Permit No. 22466

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. My name is Wayne Cummins; age, 36; residence 1855 Kimberly Road, Twin Falls, Idaho; occupation, farming; postoffice address, 1855 Kimberly Road, Twin Falls, Idaho.

Ques. 2. Are you acquainted with Clarence Clift, the holder of Permit No. 22466? How long have you known him and where does he reside?

Ans. Yes, I am and I have known Clarence Clift 25 years and know that he now resides 8 miles southeast of Hazelton (is in Twin Falls during the winter).

Ques. 3. Have you read or heard read said Permit No. 22466, and are you familiar with its provisions and conditions?

Ans. Yes, I have read this permit and am familiar with its provisions and conditions.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. The source of the water supply is subterranean from a drilled well. The point of diversion is NE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 14, T10S-R20E, B.M. The well was drilled to a depth of 524', water raises to 358', has an 8" casing and the casing extends 380' down. It is equipped with a turbine type pump and motor. A sprinkler system is used for distribution from the point of diversion to the place of use.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. I estimate the pump will deliver up to 200" and have seen it discharge this much. Through the sprinkler system under pressure, I would estimate that some 175-180" have been so conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. I have seen the pump deliver what in my opinion would be 200". This is based on my knowledge of the application of water to irrigation, which I have seen for several years and also the fact that I know how much each sprinkler head delivers under pressure and by counting the # of sprinkler heads, it is my determination that they are conducting 175-180" under pressure, therefore, the well would discharge and the pump would deliver considerably more which, in my estimate would be 200" or more.

22466

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. The water is being used for irrigation on SE $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres; NE $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres; NW $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres; SW $\frac{1}{4}$ SW $\frac{1}{4}$, 40 acres; SW $\frac{1}{4}$ NW $\frac{1}{4}$, 18 acres, Section 14, T 10 S - R 20 E, B.M. The land is cultivated and all the improvements of seed preparation, sprinkler installation and irrigation has been a direct result of this beneficial use on the land for agriculture.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Irrigation only.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. The land reclaimed is a volcanic ash, very productive, easily tilled and for intensive rowcrop should require at least 1 Miner's inch to the surface acre for profitable irrigation.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. In 1953, I farmed here as a tenant only and have no interest in the works or the water.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. As mentioned above, in 1953 I farmed this land as a tenant and have seen almost every day the application of the water to beneficial use which is diverted under this permit.

NOTICE OF PROOF OF COMPLETION OF WORKS
and
APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 10:00 A.M., on the 20th
day of February, 19 54, at Boise, County of Public,
Ada State of Idaho, before Harley M. McDowell, Notary /
proof will be submitted of the completion of works for the diversion of 4
cubic feet per second of the waters of NE 1/4 SW 1/4, Sec. 14, T10S-R20E, B.M. and of
the application to beneficial use of said water, in accordance with the terms and
conditions of Permit No. 22466 heretofore issued by the Department of Reclama-
tion of the State of Idaho.

1. The name and postoffice address of the person or corporation holding said permit are Clarence Clift, Box 126, Hazelton, Idaho
2. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conveying to the place of use, in accordance with the plans accompanying the application for such permit, is 4 cubic feet per second.
3. The use to which said water has been applied is irrigation purposes, and the amount applied to beneficial use is 4 cubic feet per second.
4. The place where said water is used is SW 1/4 NW 1/4, Sec. 14,
T 10 S - R 20 E, B.M.
5. The date of priority which said user is prepared to establish is November 14, 1951.

MARK R. KULP
