3. Problem

Need 4.86 cfs on north farm & 10.09 cfs on south farm

4. Solution

a) File T. 70099 to move all of 36-2086 from south farm to north farm

b) Leave 2.46 cfs on 192 ac of 36-2070A on north farm

c) File T. 70102 to move 1.54 cfs on 120 ac of 36-2070A from north farm to south farm

d) Leave rest of rights on south farm unchanged, but include on transfer for conditioning purposes

5. Concerns

a) Based on decreed volume, 36-2086 appears to represent 115.2 ac of new land not covered by 2076A + 2085A. But transfers move 120 ac to north farm + move 120 new acres to south farm.

Should we condition T. 70099 to allow irrigation of only 115.2 ac/yr under 36-2086 on north farm, or just let them irrigate 120 ac but with reduced volume? Volume on the south farm is proposed to increase slightly, so total volume diverted does not change.

b) If we allow
