BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO

IN THE MATTER OF TRANSFER NO.)
66087 IN THE NAME OF YOUNG &)
YOUNG PARTNERSHIP)
_____)

**PRELIMINARY ORDER CORRECTING
TRANSFER APPROVAL**

This matter having come before the Department of Water Resources (Department) as a result of an application for transfer of water rights, the Department makes the following Findings of Fact, Conclusions of Law, and Order:

FINDINGS OF FACT

1. On May 14, 2002, the Department approved Application for Transfer No. 66087 (transfer) changing the place of use under Water Right No. 36-2058B and 59 other water rights diverted from the same points of diversion and used for irrigation of the same lands.
2. Water Right No. 36-2058B as described on pages 8, 9 and 10 of the transfer approval listed 40 points of diversion authorized under the water right. Department review revealed that the transfer approval erroneously listed several points of diversion due to a clerical error. The transfer approval referenced the same list of authorized points of diversion described under Water Right No. 36-2058B for all other rights involved in the transfer.

CONCLUSIONS OF LAW

1. The transfer approval should accurately describe each established water right as changed by the transfer pursuant to Section 42-222, *Idaho Code*.
2. The Department should correct the transfer approval to show the correct points of diversion authorized under Water Right No. 36-2058B and, by reference, all the other water rights involved in the transfer.

ORDER

IT IS HEREBY ORDERED that the authorized points of diversion listed on pages 8 and 9 of the transfer approval for Water Right No. 36-2058B are **CORRECTED** as shown on the amended pages 8 and 9 attached to this order. The correction to Water Right No.

36-2058B will effectively correct the authorized points of diversion for all other rights involved in the transfer.

Dated this 9th day of May, 2003.

Case No. 39576	)	
	)	ORDER RE: IRRIGATION PERIOD OF USE
	)	ELEMENT IN PARTIAL DECREE

A *Partial Decree* was entered for water right 36-8070 ("decreed water right") on December 29, 1997. The period of use element therein was decreed as "irrigation season." In *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998), the Idaho Supreme Court remanded with the directive to include specific dates for the period of use element. Following remand, pursuant to administrative proceedings conducted before the Idaho Department of Water Resources (IDWR), the decreed water right was combined with water right 36-8069B¹ and designated as 36-8777. On August 2, 1999, IDWR filed a *Supplemental Director's Report, Reporting Area 3, IDWR Basin 36, Regarding Revision of Period of Use (For Irrigation Water Uses) and Conjunctive Management General Provisions*, which included an irrigation period of use recommendation for water rights 36-8069B and 36-8777. There are no outstanding objections to IDWR's recommendations. The Court finds that because water right 36-8070 has been subsumed into water right 36-8777, and because water right 36-8777 has been administratively assigned an irrigation period of use, no action is needed with respect to amending the *Partial Decree* for water right 36-8070.

¹ A *Partial Decree* for water right 36-8069B was issued on December 29, 1997, and an amendment to the period of use was issued on January 2, 2002.

Rupert, ID 83350

Dear Water Right Claimant(s):

The reverse side of this letter contains a copy of an *Order Amending Irrigation Period of Use Element in Partial Decree, Nunc Pro Tunc* (hereinafter "*Order*") for water right number 36-08069B. According to Idaho Department of Water Resources (IDWR) records, you are the current owner of this water right. If you are not the current owner, please contact IDWR immediately at:

Idaho Department of Water Resources
1301 North Orchard
Boise, ID 83706
800-451-4129

The purpose of the *Order* is to set forth beginning and ending dates for the irrigation period of use for this water right. As stated in the face of the *Order*, this action was necessary following the decision of the Idaho Supreme Court in *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998). This *Order* also incorporates into the *Partial Decree* an express statement that the *Partial Decree* is subject to such general provisions necessary for the definition or for the efficient administration of the water right. This express statement is necessary to comply with the requirements of Idaho Code section 42-1412(6). This *Order*, in combination with the *Partial Decree* that was issued for this water right on December 29, 1997, sets forth all of the elements of your water right. The Snake River Basin Adjudication (SRBA) Court suggests that you keep this document in a safe location together with a copy of the *Partial Decree* to show evidence of this water right. The original of this *Order* and the original of the *Partial Decree* for this water right are on file with SRBA Court. If you do not have a copy of the original *Partial Decree*, one can be obtained by contacting the SRBA Court at (208) 736-3011. Please note that the *Order* is entered *Nunc Pro Tunc*, meaning that the *Order* will be treated as if it were issued on the same date that the *Partial Decree* was originally issued.

Sincerely,

Diana Delaney

	)	PROVISIONS, <i>NUNC PRO TUNC</i>

A *Partial Decree* was entered for the above-captioned irrigation water right on December 29, 1997. The period of use element was decreed as "irrigation season." In *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998), the Idaho Supreme Court remanded with the directive to include specific dates for the period of use element. Following remand, on June 24, 1999, IDWR filed a *Supplemental Director's Report, Reporting Area 3, IDWR Basin 36, Regarding Revision of Period of Use (For Irrigation Water Uses) and Conjunctive Management General Provisions*, which included an irrigation period of use recommendation for this water right. No objections were filed to this *Supplemental Director's Report*.

THEREFORE, IT IS ORDERED that the period of use element for the irrigation portion of the above-captioned water right is hereby amended and decreed as:

PERIOD OF USE: 03-15 to 11-15

IT IS FURTHER ORDERED that the *Partial Decree* for the above-captioned water right is hereby amended and decreed to contain the following:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the court a point in time no later than the entry of a final unified decree. I.C. section 42-1412(6).

This order is being entered *nunc pro tunc* as of the date the *Partial Decree* was issued and is not intended to modify subsequent administrative changes for the water right, if any, which occurred following entry of the *Partial Decree*.

RULE 54(b) CERTIFICATE

With respect to the issues determined by the above judgment or order, it is hereby CERTIFIED, in accordance with Rule 54(b), I.R.C.P., that the court has determined that there is no just reason for delay of the entry of a final judgment and that the court has and does hereby direct that the above judgment or order shall be a final judgment upon which execution may issue and an appeal may be taken as provided by the Idaho Appellate Rules.

TO: Young & Young Water Right Files

FROM: Pam Skaggs²⁸/State Office

SUBJECT: Transfer 5167

DATE: May 6, 1998

Transfer 5167 changes and adds points of diversion, and creates an 8,574.0 acre permissible place of use. The applicant is combining multiple groundwater rights, wells & pivots in a single large interconnected system.

The rights involved have been previously transferred under Transfers 4829, 4830, 4831 and 4895, and additional rights recently purchased. 77 rights or parts of rights were on the original application. 30 of these rights, unencumbered by limiting conditions, have been combined by common priority into 12 new rights. 59 rights appear on the final approval document.

Region staff identified possible errors in a couple of the past approvals referring only to previous file information. I researched the rights and files in question and did not find supporting information to modify the previous approvals. I have attached an overlap of all the original rights, table of combined rights and a draft of rights for the final approval.

Recommended conditions include drilling permit requirements, annual measuring & reporting, irrigation overlap, permissible place of use, combined limits, trust water conditions (36-08251E), enlargement right condition where applicable and standard transfer conditions.
