RE: Inquiry about Dunn/Fien Dairy 2 miles East of Wendell

Dear Mr. Cogger:

Prompted by your August 3rd e-mail to the director, Corey Skinner from our office on August 27th inspected the dairy site within the NE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 35, T07S, R15E and surrounding area approximately 2 miles east of Wendell. Corey found that there currently exist two water systems on the property. He also checked the county records and found that the property is split into parcels owned by Susie Dunn, Magic Valley Dairy Supply, Hawkins Land Investment and Elden & Joyce Knutson. All wells appear to be on the parcels owned by Susie Dunn.

The first system to the south (supplied by 1 well) serves 2 homes (1 on Dunn parcel in NE $\frac{1}{4}$ SE $\frac{1}{4}$ and 1 on Hawkins Land Investment parcel in SE $\frac{1}{4}$ SE $\frac{1}{4}$) and 2 corrals with 80 dry cows. This system appears to be associated with partial decree 36-11112. Note that the house in SE $\frac{1}{4}$ SE $\frac{1}{4}$ may be an unrecorded domestic use.

The second system to the north (supplied by 2 wells) serves the dairy barn where 620 cows are milked. The system serves the 620 milk cows, 20 dry cows and 20 replacement heifers and also 2 homes. The barn, one home and most of the corrals are on the Dunn parcel. Some of the corrals are on Magic Valley Dairy Supply parcel and the other home is on the Knutson parcel. This system appears to be associated with partial decrees 36-11111 and 36-11113.

All three partial decrees are domestic rights (Copies of these records are enclosed.); each is limited to 13000 gallons per day. It is estimated the first system utilizes near 5000 gallon per day. It is estimated the second system utilizes near 24,500 gallons per day. (These estimates are based on computer programs given certain input values of # of cows, type of wash system, etc. and a modest value for water use in each parcel.)
limited use for lawn watering. We were informed the current practice does not utilize sprinklers for cow washing in the barn but this method has been used in the past.)

36-11112

MODIFIED
2000

Currently both systems appear to be within the limits of the recorded water rights.

If the practice changes, the number of cattle increases or the wells are used extensively for irrigation of lawns, these systems may then exceed their daily limits and would require that more water rights be obtained or the uses may be subject to a notice of violation.

By copy of this letter I will inform the subject landowners of our findings and if you or any of the landowners have questions please feel free to contact our office.

Sincerely,

Allen Merritt, PE
Southern Region Manager
