Re: Curtailment of Ground Water Use Under Water Right(s) 36-8662

Dear Water Right Holder:

The records of the Idaho Department of Water Resources ("Department") indicate that you own one or more water rights for the use of ground water within Water District 130 and the Thousand Springs Ground Water Management Area (GWMA). Department records do not indicate that out-of-priority diversion and use of water under your water right(s) is covered by either an approved mitigation plan or one of the stipulated agreements negotiated last year by the North Snake and Magic Valley Ground Water Districts and certain municipal and industrial water users.

Because of severe drought conditions persisting across the Upper Snake River Basin, the Thousand Springs GWMA was established last August. This allowed the Department to seek curtailment of relatively junior priority ground water diversions from the Eastern Snake Plain Aquifer ("ESPA") that further reduce the water supply available to senior priority water rights from springs and surface water tributary to the Snake River. The order designating the Thousand Springs GWMA identified an area within 10 kilometers from the Thousand Springs canyon wall north and east of the Snake River within which use of ground water rights having priority dates later in time than July 21, 1967, were determined by the Department to be injuring senior priority surface water rights. Within this area, curtailing ground water diversions will increase spring discharges tributary to the Snake River by an amount equal to 50 percent or more of the associated ground water depletions within 6 months of curtailment. This determination was made using the results from the Department's ESPA regional ground water flow model.

Curtailment orders were not issued last year to the holders of water rights for ground water in the area identified for curtailment because ground water districts and other entities representing the holders of the water rights entered into 2-year stipulated agreements with representatives of holders of affected senior rights from the interconnected springs and surface water tributary to the Snake River. These stipulated agreements provided for creation of a water district pursuant to Chapter 6, Title 42, Idaho Code, to enforce the terms of the agreements and curtail the diversion and use of water under junior priority water rights that the Department determines are injuring senior priority water rights, if the holders of the junior priority water rights are not represented by entities entering into the stipulated agreements or are not otherwise mitigating the injury.

June 18, 2002
Page 2

On February 19, 2002, a Final Order was issued creating Water District 130 for the administration of rights to the use of ground water and springs discharging from the ESPA in the Thousand Springs area. The first annual Water District 130 meeting was held on April 23, 2002, at which a watermaster was elected and certain resolutions were adopted.

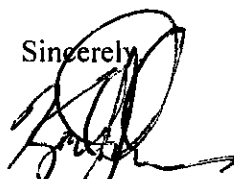

On March 27, 2002, the Department sent a letter to you and others within Water District 130 who had water rights that were not afforded the "safe harbor" provided by an approved mitigation plan or one of the stipulated agreements negotiated last year by either the ground water districts or a group of municipal and industrial users. That letter notified right holders that the Department, through Water District 130, might need to take action to curtail diversions not covered by a stipulated agreement or an approved mitigation plan where the Department has determined that such diversions are causing injury to senior priority water rights.

Unfortunately, drought conditions continue to persist across southern Idaho and the Snake River plain, and spring discharges in the Thousand Springs reach of the Snake River are similar or less than last year. Therefore, certain senior priority water rights that were calling for water last year are again not being satisfied during parts of this year. As described above, the Department, through use of its ESPA ground water model, has determined that unmitigated ground water pumping in the area of impact is causing injury to the holders of senior priority water rights from the Snake River. Consequently, in accordance with Idaho Code §§ 42-237a.g. and 42-607 it is necessary to seek curtailment of all junior priority ground water rights within the Thousand Springs impact area that are not covered by an approved mitigation plan or stipulated agreement.

Because the water right you hold is located in Water District 130 and the Thousand Springs GWMA impact area and is not covered by an approved mitigation plan or one of the stipulated agreements negotiated by either the ground water districts or the group of municipal and industrial water users, you are hereby notified that the watermaster for Water District 130 has been instructed to curtail diversion and use of ground water under your water right for the remainder of this irrigation season. The watermaster for Water District 130 will contact you after 14 days from the date of this letter to arrange for the curtailment of the diversion and use of ground water under your water right. The watermaster will allow you reasonable time to make adjustments or arrangements to minimize hardships caused by this action. Unless water supply conditions dramatically improve, I anticipate that curtailment will need to be extended for all of next year's irrigation season.

I regret that this action is necessary. You may want to consider joining one of the ground water districts that has signed a stipulated agreement as an alternative to having your use of ground water curtailed. Should you have questions about this matter, or if you believe your water right should be excluded from this action, please contact Cindy Yenter (Water District 130 Watermaster) by telephone at (208) 736-3033 or contact Tim Luke at the Department of Water Resources at the address above or by telephone at (208) 327-7864.

Sincerely,

A handwritten signature in black ink, appearing to read "Karl S. Dreher", written over a circular stamp or seal.

RE: Assignment of Permit 36-08662

Dear Permit Holder(s):

The department acknowledges receipt of correspondence changing ownership of the above referenced permit to you and Northwest Farm Credit Services, FLCA. The department has modified its records to reflect the change in ownership and has enclosed a computer-generated report for your records.

Please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address of the owner of a water right to the department. Notice of the change must be provided to the department within 120 days of the change. Change reporting forms are available from any office of the department.

Please feel free to contact the department if you have questions.

Sincerely,

Jeff Peppersack

RE: PERMIT NO. 36-08662

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1994. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

RE: Water Permit 36-08662
Gary R. Coleman

RECEIVED

JUL 27 1993

Gentlemen:

Department of Water Resources

This letter will serve as notice to the Department of Water Resources that Northwest Farm Credit Services, ACA, has a security interest in Permit No. **36-08662** and a real estate mortgage has been filed on property where the wells are located. Enclosed is an Assignment from Gary R. Coleman and Carolyn F. Coleman, husband and wife, to Gary R. Coleman and Carolyn F. Coleman, husband and wife, and Northwest Farm Credit Services, ACA.

We request copies of all notices and correspondence mailed to Gary R. Coleman and Carolyn F. Coleman, husband and wife, regarding the above-described permit number be sent to our office address.

Please acknowledge below and return this letter to our office. We appreciate your cooperation in this matter.

Sincerely,

Carolyn Hoover
Operations Assistant

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 36-08662

Dear Permit Holder(s):

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as far as possible from surface water channels and casing your well so that groundwater tributary to surface water flows are not diverted will reduce the potential for the watermaster to regulate your water use.

Sincerely,

BRENDA L. MILLER
Water Resource Agent

Re: Application for Permit No. 36-08662

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the Gooding County Leader on 8/5 & 8/12/92. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Mel Schulte
Water Right Agent
