WATER RIGHT LICENSE

WATER RIGHT NO. 36-08586

Priority: April 24, 1991

Maximum Diversion Rate: 0.20 CFS
Maximum Diversion Volume: 40.0 AF

This is to certify, that PAUL CEMETERY MAINTENANCE DISTRICT

PO BOX 867

PAUL ID 83347

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated April 24, 1991; and has submitted Proof of Beneficial Use on July 29, 1992. An examination indicates that the works have a diversion capacity of .390 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	04/01 to 10/31	0.20 CFS	40.0 AF

LOCATION OF POINT(S) OF DIVERSION: NWSESW , Sec. 16, Township 09S, Range 23E
MINIDOKA County

PLACE OF USE: IRRIGATION

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
09S	23E	16	SESW	10		10

Total number of acres irrigated: 10

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right limited to the amount that can actually be beneficially use used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The right holder shall use the full allotment of his surface water right, to the extent it is available, in conjunction with groundwater diverted pursuant to this right.
6. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.0 afa per acre for the lands above.
7. This right is for the use of trust water and is subject to review 20 years after the issuance of the permit to determine availability of water and to re-evaluate the public interest.
8. Diversion and use of water under this right is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.

PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 36-08586 Telephone No. 438-2231
2. Name(s) of Permit Holder(s): Paul Cemetery Maintenance Dist.
3. Mailing Address: P.O. Box 867, Paul, ID. 83347
4. Source of Water: Groundwater

If GROUNDWATER, Well Driller's Name: _____ Date Drilled: 1963

OPTIONAL:

Pump horsepower: _____ Pressure (psi): _____ Dynamic pumping level (ft.): _____

5. Extent of Use (as authorized by the permit):

Domestic _____ (No. of households) Stockwater _____ (No. and type of stock)

Irrigation 20 (No. of acres) Other _____

6. Total rate and/or volume for which proof is submitted
- .40
- cfs OR _____ acre/feet

7. Refer to the approval conditions on your permit and respond accordingly:

Measuring device: Required? ____ Yes X No Installed? ____ Yes ____ No

OR

Flow Measurement Port: Required? X Yes ____ No Installed? X Yes ____ No

8. Fee Enclosed: \$
- 100.00
- (See License Fee Schedule on back of Instruction Sheet)

9. Person to contact to accompany the Department representative during field examination of the water system.

Name Andrew Henscheid Telephone No. 436-4430. or 670-4432Address 670 100W 80N, Rupert, Idaho.

10. The above information is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the state of Idaho.

Total number of acres irrigated: 20

CONDITIONS/REMARKS:

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before August 3, 1992.
2. Subject to all prior water rights.
3. A flow measurement port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.
4. Permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
5. Any license issued by IDWR pursuant to the permit or portion thereof for the use of trust water is subject to a term review of 20 years after the date of this approval to determine availability of water for the use and to re-evaluate the public interest at the end of the term.
6. Diversion and use of water under this permit is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.
7. The Director retains jurisdiction of the permit and/or subsequent license issued to change, add or remove any requirement as determined to be appropriate.
8. The rate of diversion of water for irrigation under this permit and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
Pitot tube & psi gauge						

2. Measurements: Using the pitot tube & psi gauge, the average nozzle pressure in 29 Toro Super 600C nozzles was 40 psi.

JAN 12 1964

E. NARRATIVE/REMARKS/COMMENTS

This is a very unique permit. The maintenance director had no records on this well pertaining to serial # or make. All he knew was it was a 15 H.P. submersible pump. A 6" buried mainline runs west from the well. A buried mainline from another pump that receives its water from MID joins this mainline from the groundwater well. So the custodian could possibly water all of the land from either the well or MID water.

The upper half of the cemetery had Toro Super 600C pop-up heads while the lower half had Rainbird 35 series with $\frac{3}{16}$ " nozzles.

A measurement was made on the upper half of the cemetery with the irrigation (MID) canal water shut off. 29 Toro Super 600C had an average pressure of 40 psi. The head custodian had a flow chart of the Toro Super 600C with the corresponding pressure. At 35 psi, the heads put out an average of 5.5 gpm while at 50 psi the heads put out 6.8 gpm. (40 psi = 6 gpm) The calculation to be around .39 cfs.

The land east of the well is owned by Paul Cemetery but the present groundwater system cannot reach these acres. Another farmer irrigates this land from another MID lateral. Since, the system doesn't operate over there, I didn't license these acres. * A planimeter estimated the present system irrigates in a B-acre tract. I estimated 3 acres of these to be roads & the chapel. So, I beneficially recognized 10 acres.

(cfs)	(cfs)
Legal limit .20 cfs	Legal limit 40 cfs
Example perid up to 1.0 cfs	System capacity 85 cfs
Measured .39 cfs	with legal limit discrete

This right when combined with canal water on the same land shall not exceed .02 cfs for each acre of land.

Have conditions of permit approval been met? ☒ yes ☐ no

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 36-08586

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls at (208)736-3033.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 36-08586

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1992.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

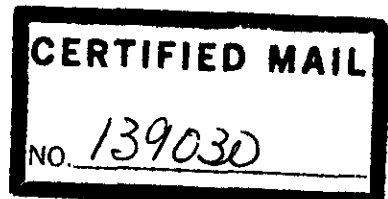

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 36-08586

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

This permit authorizes the appropriation of trust water. Trust water is defined as that portion of a particular hydropower water right which exceeds certain minimum stream flows established by state action, and is held in trust by the State of Idaho for the use and benefit of the people within the state. Conditions

AUG 22 1991

pertaining to a term review, annual use fee and jurisdiction of the permit are trust water conditions.

Sincerely,

PAMELA SKAGGS
Technical Records Specialist

MEMORANDUM

TO: FILE

FROM: TIM LUKE

RE: APP. NO. 36-8586/Trust Water Processing

DATE: 8-2-91

The above application is a new trust water filing which has been advertised by the region and forwarded to the state office for final review.

Comments on the application indicate that this may be a supplemental filing and also that the groundwater development may have been made prior to 1984. The filing refers to an adjudication claim which I reviewed and discussed with Steve Clelland of our Twin Falls office. Steve looked at the adjudication file and told me that the only evidence the applicants submitted for the groundwater development claimed in the adjudication was a well log for a well completed in September of 1963. Since the completion date was after the March 25, 1963 deadline date for allowing groundwater beneficial use claims, the Department informed the applicants that the claim would be disallowed and advised filing a new application to cover the use. This application was apparently filed in response to the department's advice.

I believe that there is sufficient evidence concerning development prior to 1984. A 1984 orthophoto shows the location of the cemetery and confirms that the place of use was irrigated. Acreage under the filing will not count as trust acreage due to the prior development. The use however is still considered a trust water appropriation because of the post 10/1/1984 filing date. I recommend continued processing of the application and attaching trust conditions to any approval.

Re: Application for Permit No. 36-08586

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the South Idaho Press on 6/7 & 6/14/91. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

James E. Stanton
Sr. Water Resource Agent
