RE: Diversion rate

=====

Rather than rely on the complicated formula used by the examiner to recommend a diversion rate of 0.51 cfs, I am recommending that this right be licensed for the difference between the rate for right 36-02464 and the system capacity. By doing so, license 36-08585 will not have to carry a wordy condition limiting combined use of the two rights to the system capacity.

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
Polysonic	Tyefite Polysonics	TF-P	N7HS866			

2. Measurements: The average flow rate calculated by the polysonic was 134 gpm or 2.97 cfs. The thickness of the steel pipe was .141 in. & the diameter of the pipe was 10.084 inches. A signal strength of 2.90% was achieved. (A12 button)

E. NARRATIVE/REMARKS/COMMENTS

This well was dug between Mar. 3-18 in 1961. The well is 16" by 168'. The water level was 88' then. The water level recorded by Eaton Drilling & Pump in 1991 was 90'.

A 10" buried pvc mainline runs northwest to the center of a 1450 gpm pivot. This pivot has 8 towers & a corner catcher tower.

Eaton Drilling & Pump redid the bowls & lowered the pump last year.

The pivot covers about 173 acres altogether. But, a Northside Canal Co. lateral runs across the northwest section of the pivot. So, I subtracted 2 acres accordingly. A waste water ditch runs into this lateral. But, this ditch has greatly diminished in size. So, I did not figure this ditch in on the acreage calculations. A planimeter & aerial grid was used in the acreage calculations.

The southeast corner of the pivot by the well used to be watered by handlines. But at the time when the proof of beneficial use was filed & at the time of the exam no system was capable or present. Therefore, I didn't include this pivot corner in ^{on} the acreage calculations.

This permit overlaps P/O & P/U with adj. claim 36-2464. I completed an overlap review with what the department recommended for this claim. At the time of the exam, the owners found the recommended claim to their satisfaction & didn't plan on filing a notice of error. A complete overlap analysis is attached. If the court decrees something other than the recommended claim, the overlap analysis is void.

The current rate of diversion was determined to be 2.97 cfs by the polysonic meter. The flow rate recommended for this permit is ⁵¹2.97 cfs. Please note the imposed conditions.

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = (171)(4) = 684 \text{ afa}$$
$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days In Irrigation Season}) \times 1.9835 = (2.97)(214)(1.9835) = 1260 \text{ afa}$$
$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 684 \text{ afa}$$

2. Volume Calculations for Other Uses:

Allocated to R36-2464 732 afa for 183 acres
Allocated to this permit
old lands 164 acres $\approx$ 0 afa
new lands 7 acres $\approx$ 28 afa

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 36-08585

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

This permit authorizes the appropriation of trust water. Trust water is defined as that portion of a particular hydropower water right which exceeds certain minimum stream flows established by state action, and is held in trust by the State of

Application No. 37-8376

INSTRUCTIONS: IF YOU ARE NOT INTERESTED IN HAVING THE APPLICATION PROCESSED, PLEASE COMPLETE AND RETURN THE ENCLOSED WITHDRAWAL FORM.

IF YOU WISH TO HAVE THE APPLICATION PROCESSED, PLEASE ANSWER THE FOLLOWING QUESTIONS AS THOROUGHLY AS POSSIBLE. FAILURE TO RETURN EITHER THE WITHDRAWAL FORM OR QUESTIONNAIRE IS CAUSE FOR THE DEPARTMENT TO VOID THE APPLICATION.

1a. Are you the current owner of the land or place of use described under this application? Yes ☒ No ☐

b. If you are not the property owner, please describe the arrangement enabling you to develop the proposed project.

2a. Has the source of water listed on this application been used to irrigate any of the land described under this same application prior to October 1, 1984? Yes ☒ No ☐

b. If yes, please describe the extent of development and number of acres irrigated. (Note: Uses developed after October, 1984 are considered trust water diversions and may be subject to certain conditions. You may be asked to verify uses established prior to October, 1984.)

ANAD 183 acres have been watered from the well under the original license.

3. If you answered NO to ques #2a, please state the number of acres you have irrigated with this source after October 1, 1984. _____

4. If you have not irrigated lands under this application, please state the number of acres you plan to complete. _____

5. If the permit is a supplemental filing please identify other water rights which are used on the same land.

37-2464

Use the reverse side of this form if you wish to add any comments. You may mark changes on the enclosed application to designate any proposed amendments. (Note: Proposed changes which result in an expansion of use will not be considered by the department.)

I hereby assert that the responses provided above are true to the best of my knowledge. I understand that any willful misrepresentations may result in voiding of the application.

RE: Application for Permit No. 37-8376

Dear Applicant(s):

NOTICE OF PENDING ORDER VOIDING APPLICATION

On August 11, 1988 you filed with the Department of Water Resources (Department) Application for Permit No. 37-8376 which proposed the diversion of 1.0 cubic feet per second of groundwater for irrigation of 182.5 acres.

The Department mailed a letter and questionnaire to you on January 7, 1991. The letter requested that you return the Department's questionnaire concerning your present possessory interest in the place of use, any prior development under the application and/or your plans for pursuing completion of the proposed project. The letter notified you that failure to complete and return the questionnaire within thirty (30) days of the date of the letter was cause for the Department to void the application.

The purpose of this notice is to provide a second and final opportunity for you to submit the requested information. Pursuant to Section 42-204, Idaho Code, the Department may void applications for which requested information is not submitted. If you fail to respond to this inquiry within fifteen (15) days of the date of this letter, the Department will issue an order voiding the application pursuant to Section 42-204, Idaho Code.

If no development has been completed as authorized by the application, and you are no longer interested in pursuing the development, please complete and return the enclosed withdrawal form. Please note, if you are using water without an approved permit, the Department may issue an order requiring you to cease diverting the water.

RE: APPLICATION FOR PERMIT NO. 37-8376

Dear APPLICANT:

Due to the Swan Falls litigation, Department approval of the enclosed application may have been delayed. The Department is presently reviewing your application and may authorize the proposed development.

The purpose of this letter is to determine: (1) if you are still interested in developing the project, and (2) the extent of development, if any, that has already occurred under the application. Enclosed are two forms requesting information which will help the Department expedite the processing of the application.

1. If you have abandoned or have no interest in continuing with your plans for development of the project, please complete the enclosed withdrawal form and return it to the Department. If you request a withdrawal of the application and the application was not previously advertised, the department will refund your original filing fee.

2. If you wish to continue with your proposed development plans, or have completed all or a portion of the proposed development before October 1, 1984, then you must complete and return the enclosed questionnaire. You may use the questionnaire and enclosed application to make any comments &/or amendments concerning the application. Your completion of the questionnaire will expedite processing and help the department determine if the water diverted under the application is public water or trust water. Approved trust water applications may be subject to additional conditions.

Failure to return either of the above forms within thirty (30) days of the date of this letter is cause for the Department to void the application.

Please be further advised that if any undeveloped portion of your proposed project is greater than 200 acres, or if the application proposes diversion of more than 5.0 cfs, the department will issue a notice requesting additional information as required by Water Appropriation Rule 4,5. (copy enclosed). In particular, rules 4,5,3. through 4,5,3,5. apply to your project if it is more than 200 acres. If necessary, the rule 4,5. information notice will be sent to you after you return the questionnaire.

RE: SWAN FALLS PROCESSING REQUIREMENTS

DATE: 2/3/89

This file has been reviewed to determine requirements under
Swan Falls processing.

There is no clear or conclusive evidence in the file that
would exempt it from review of Section 42-203C. The file
should remain on the process list with no further action taken
until such time as it comes up for processing as a result of
its priority date.

RE: EXISTING RIGHTS FOR LANDS UNDER APP#37-8376

DATE: 23-DEC-1988

=====

I found two previous rights using the same point of diversion listed in this application. 36-2424A irrigates 80 acres in the area under consideration. 36-2424B irrigates 61 acres in the same area.

These lands are also listed in decreed rights for the Northside Canal Company.

Re: Application for permit No. 37-08376

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

Because your application proposes to appropriate water which has been identified as "trust water" in the Swan Falls agreement, it will be processed under rules and regulations for water appropriation that have been adopted as required by law.

Under the rules, applications will be processed at a rate which allows development of 20,000 acres per year. The oldest applications will be processed first, provided that applicants are willing and able to proceed.

For this reason, it is not possible to estimate at this time when action will be taken on your application.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Loren O. Holmes, P.E.
Southern Region Manager
