Department of
Water Resources
BILL TO

NOTICE OF AMENDMENT TO A WATER PERMIT NO. 36-08582

Notice is hereby given that MIKE BRANCHFLOWER is the holder of Approved Permit No. 36-08582 with a priority date of 02/20/1991 authorizing the diversion of 0.52 cubic feet per second of water from groundwater in the SWSE, S30, T07S, R15E; County of Gooding, to be used for irrigation of 26 acres within W1/2SE, S30, T07S, R15E.

This Application for Amendment proposes to change point(s) of diversion and change place of use.

The permit holder has applied to the Department of Water Resources for an Amendment to the Permit, to be changed as follows:

Amount: .52 cfs

Period of Use: 04/01 to 10/31

Point of Diversion: SESENW, S2, T08S, R14E; Gooding County.

Place of Use: 26 acres within SENW, S2, T08S, R14E.

Any protest against approval of the amending of Permit No. 36-08582 as set forth above must be filed with the applicant and with the Director, Idaho Department of Water Resources, 222 Shoshone Street East, Twin Falls, ID 83301 on or before December 27, 1993.

R. Keith Higginson, Director

**BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO**

IN THE MATTER OF PETITION FOR	)	
DECLARATORY RULING SUBMITTED BY	)	
MICHAEL G. BRANCHFLOWER AND	)	FINAL ORDER
KATHERINE L. BRANCHFLOWER	)	
_____	)	

This matter having come before the Idaho Department of Water Resources (department), as a result of the filing of a petition for a declaratory ruling, the department makes the following Findings of Fact, Conclusions of Law and Final Order:

FINDINGS OF FACT

1. On February 18, 1997, Michael G. Branchflower and Katherine L. Branchflower (petitioner) filed a Petition for Declaratory Ruling in connection with certain transfer approvals and licenses granted by the department to the petitioner.

2. On May 22, 1996, the department issued license no. **36-08581** with Conditions of Approval no's. 5 and 9 as follows:

This right when combined with all other water rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre for the lands above.

Diversion and use of water under this right is subject to rules that may subsequently be promulgated for the use of existing rights used for supplemental purposes.

Water right no. 36-08581 was not established as a supplemental water right for use with surface water.

Condition no. 5 is general in nature relative to the maximum amount of water authorized for diversion and does not limit use of the right to use as a supplemental source of water.

3. On February 20, 1996, the department issued license no. **36-08560B** with Conditions of Approval no's. 7 and 8 as follows:

Diversion and use of water under this right is subject to rules that may subsequently be promulgated for the use of existing rights used for supplemental purposes.

This right when combined with all other water rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre for the lands above.

The original water right no. 36-08560 was not established as a supplemental water right for use with surface water.

Condition of Approval no. 8 is general in nature relative to the maximum amount of water authorized for diversion and does not limit use of the right to use as a supplemental source of water.

4. On February 20, 1996, the department issued license no. **36-08582** with Conditions of Approval no's. 7 and 8 as follows:

Diversion and use of water under this right is subject to rules that may subsequently be promulgated for the use of existing rights used for supplemental conditions.

This right when combined with all other water rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre for the lands above.

Water Right no. 36-08582 was not established as a supplemental water right for use with surface water.

Condition of Approval no. 8 is general in nature relative to the maximum amount of water authorized for diversion and does not limit use of the right to use as a supplemental source of water.

5. On January 31, 1996, the department issued transfer no. 4375 involving water right no. **36-02517C** with Conditions of Approval no's. 6, 7, and 10 as follows:

The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right.

This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use.

Use of this right is combined with water from the North Side Canal Co. Ltd.

The original water right no. 36-02517 was established as a supplemental water right to supplement surface water from North Side Canal Company shares. Transfer no. 4375 did not change the use of water right no. 36-02517C from supplementing surface water.

6. On January 31, 1996, the department approved transfer no. 4404 involving water right no. **36-07460G** with Conditions of Approval Nos. 6 and 7 as follows:

The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right.

This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use.

The original water right 36-07460 was not established as a supplemental water right for use with surface water.

7. Water right no. **36-07460E** is the remaining portion of right 36-07460D after transfer no. 4052 involving right no's. 36-07460F and 36-07460G was approved on June 20, 1995. Right no. 36-07460E contains the following remark:

Use of this right is combined with water from North Side Canal Co. Ltd.

This remark is based on the recommendation of this right in the Snake River Basin Adjudication.

8. On June 9, 1994, the department issued license no's. **36-08313A** and **36-08313B** with Condition of Approval no. 10 as follows:

The right holder shall fully use all surface water rights appurtenant to the lands identified above prior to using water under this right.

The original water right no. 36-08313 was not established as a supplemental water right for use with surface water.

9. On March 17, 1994, the department issued transfer no. 4053 involving water right no. **36-02517B** with Condition of Approval no. 2 as follows:

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre for the lands above.

The original water right no. 36-02517 was established as a supplemental water right to supplement surface water from North Side Canal Company shares. Transfer no. 4053 did not change the use of water right no. 36-02517B from supplementing surface water.

CONCLUSIONS OF LAW

1. IDAPA 37.01.01402 (Rule of Procedure 402) provides in pertinent part as follows:

402. PETITIONS FOR DECLARATORY RULINGS TO BE DECIDED BY ORDER (Rule 402).

01. Final Agency Action. The agency's decision on a petition for declaratory ruling on the applicability of any statute, rule or order administered by the agency is a final agency action decided by order.

2. The department should respond to the request for declaratory ruling as follows:
 - a. 36-07460E and 36-07460G - The department should rescind Condition of Approval no's. 6 and 7.
 - b. 36-08313A and 36-08313B - The department should rescind Condition of Approval no. 10.
 - c. 36-08560B and 36-08582 - The department should rescind Condition of Approval no. 7.
 - d. 36-08581 - The department should rescind Condition of Approval no. 9.
 - e. The department should not change the remarks or conditions of approval for right no's. 36-02517B and 36-02517C.

ORDER

IT IS THEREFORE, HEREBY ORDERED as follows:

1. Condition of Approval no's. 6 and 7 for right no's. 36-07460E and 36-07460G are **RESCINDED**.
2. Condition of Approval no. 10 for right no's. 36-08313A and 36-08313B is **RESCINDED**.
3. Condition of Approval no. 7 for right no's. 36-08560B and 36-08582 is **RESCINDED**.
4. Condition of Approval no. 9 for right no. 36-08581 is **RESCINDED**.
5. The department will not change the remarks or Conditions of Approval for right no's. 36-02517B and 36-02517C.

DATED this 2nd day of October, 1997.

KARL J. DREHER
Director

WATER RIGHT LICENSE

WATER RIGHT NO. 36-08582

Priority: February 20, 1991

Maximum Diversion Rate:

0.46 CFS

Maximum Diversion Volume:

92.0 AF

This is to certify, that KATHY BRANCHFLOWER
MIKE BRANCHFLOWER

PO BOX 392

WENDELL ID 83355-0392

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated February 20, 1991; and has submitted Proof of Beneficial Use on December 29, 1993. An examination indicates that the works have a diversion capacity of 0.720 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	04/01 to 10/31	0.46 CFS	92.0 AF

LOCATION OF POINT(S) OF DIVERSION:

SENW , Sec. 2, Township 08S, Range 14E
GOODING County

PLACE OF USE: IRRIGATION

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
08S	14E	2	Lot 3(NENW)	1	SENW 22	23

Total number of acres irrigated: 23

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right is for the use of trust water and is subject to review 20 years after the issuance of the permit to determine availability of water and to re-evaluate the public interest.
6. Diversion and use of water under this right is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.

NOTICE OF AMENDMENT TO A WATER
PERMIT

NO. 36-08582

Notice is hereby given that
MIKE BRANCHFLOWER of Wendell,
ID is the holder of Approved
Permit No. 36-08582 with a
priority date of 02/20/1991
authorizing the diversion of
0.52 cubic feet per second of
water from groundwater in the

SE1/4SE1/4NW1/4, S2, T8S, R14E
County of Gooding, to be used
for irrigation of 26 acres
within SE1/4NW1/4, S2, T8S,
R14E.

This Application for Amendment
proposes to change point of
diversion and change place of
use.

The permit holder has applied
to the Department of Water
Resources for an Amendment to
the Permit, to be changed as
follows:

Amount: 0.52 cfs
Period of Use: 4/1 to 10/31
Point of Diversion:
SW1/4SE1/4, S30, T07S, R15E;
Gooding County.
Place of Use: W1/2SE1/4, S30,
T07S, R15E.

Any protest against approval of
the amending of Permit No.
36-08582 as set forth above
must be filed with the Idaho
Department of Water Resources,
222 Shoshone Street East, Twin
Falls, ID 83301 on or before
March 1, 1993.

PHILIP E. BATT
GOVERNOR

KARL J. DREHER
DIRECTOR

RE: In the Matter of Petition for Declaratory Ruling submitted by Michael G. Branchflower and Katherine L. Branchflower

Dear Interested Parties:

The accompanying order is a "final order" issued by the department pursuant to section 67-5246 or 67-5247, Idaho Code.

Section 67-5246 provides as follows:

- (1) If the presiding officer is the agency head, the presiding officer shall issue a final order.
- (2) If the presiding officer issued a recommended order, the agency head shall issue a final order following review of that recommended order.
- (3) If the presiding officer issued a preliminary order, that order becomes a final order unless it is reviewed as required in section 67-5245, Idaho Code. If the preliminary order is reviewed, the agency head shall issue a final order.
- (4) Unless otherwise provided by statute or rule, any party may file a petition for reconsideration of any order issued by the agency head within fourteen (14) days of the issuance of that order. The agency head shall issue a written order disposing of the petition. The petition is deemed denied if the agency head does not dispose of it within twenty-one (21) days after the filing of the petition.
- (5) Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:
 - (a) the petition for reconsideration is disposed of; or
 - (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.
- (6) A party may not be required to comply with a final order unless the party has been served with or has actual knowledge of the order. If the order is mailed to the last known address of a party, the service is deemed to be sufficient.

RECEIVED
OCT 18 1997

(7) A non-party shall not be required to comply with a final order unless the agency has made the order available for public inspection or the nonparty has actual knowledge of the order.

(8) The provisions of this section do not preclude an agency from taking immediate action to protect the public interest in accordance with the provisions of section 67-5247, Idaho Code.

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a final order within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5246(4) Idaho Code.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, any party aggrieved by a final order or orders previously issued in a matter before the department may appeal the final order and all previously issued orders in the matter to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days a) of the service date of the final order, b) of an order denying petition for reconsideration, or c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration, whichever is later. See section 67-5273, Idaho Code. The filing of an appeal to district court does not in itself stay the effectiveness or enforcement of the order under appeal.

Sincerely,

L. GLEN SAXTON, Chief
Water Allocation Bureau

PETITION FOR
RECONSIDERATION

Petitioners, Michael G. Branchflower and Katherine L. Branchflower, through their attorney of record, Kevin F. Trainor of Stephan, Kvanvig, Stone & Trainor, petition this Court to reconsider the Order issued by the Director of the Idaho Department of Water Resources dated October 2, 1997, and served upon these Petitioners by mail on October 14, 1997. This Petition for Reconsideration is addressed only to paragraph 9 of the Findings of Fact and paragraph 2(e) of the Conclusions of Law, and paragraph 5 of the Order as those paragraphs effect Water Right Nos. 36-02517B and 36-02517C.

This Petition for Consideration does not address any other Finding of Fact, Conclusions of Law, or portion of the Order issued by the Director.

DATED this 24th day of October, 1997.

RE: Branchflower/Petition for Declaratory Relief

Dear Scott:

I enjoyed talking with you on July 18th, 1997. As I mentioned to you on the phone, it has been since late April when you and Michael Branchflower met regarding the Petition for Declaratory Relief.

Please give me an idea as to when your recommendations will be acted upon by the Department. Any assistance you can give to move this along, would be greatly appreciated.

If you have any questions for me, please do not hesitate to call.

Sincerely yours,

STEPHAN, KVANVIG, STONE & TRAINOR

RE: Branchflower/Petition for Declaratory Relief

Dear Scott:

As I am sure your file reflects, you wrote my clients Mike and Kathie Branchflower on August 30, 1996. You addressed some specific problems with water measurement, distribution, places of use, and conditions of use.

My notes indicate you met several times with Mike Branchflower and a number of the Department's concerns were resolved.

In part at the Department's suggestion, the Branchflowers filed a Petition For Declaratory Relief in February of this year. Mike and I then met with you on April 23 of this year and reviewed all the remaining issues. At that time you provided us with a copy of your draft Memorandum Response to the Branchflower's Petition. We have been awaiting the decision from the Department since then. As I told you in our numerous phone conversations, the Branchflowers are anxious to resolve this and have some concern that possible legislative actions may effect their water rights if these are not resolved shortly.

If there is any further information you need from us, please let us know. It has been almost five months since we met and reviewed all of these issues and the Branchflowers are anxious to resolve it.

Sincerely yours,

STEPHAN, KVANVIG, STONE & TRAINOR

MEMORANDUM

To: Glen
From: Scott
Date: June 17, 1997

Subject: Response to Branchflower's Petition for Declaratory Relief

In February 1997, the department received a Petition for Declaratory Relief from Michael and Katherine Branchflower in response to my letter to them and a subsequent meeting in Twin Falls between Branchflower, Gary Spackman, and myself. During our meeting, it was evident that Branchflower has transferred and/or developed several ground water rights on lands which had previously been irrigated with Northside Canal water. Several of his ground water rights include conditions which prevent using ground water if the surface water is no longer used. Branchflower's intention was to develop satisfactory ground water supplies so that the often unreliable surface water could be sold or used on other lands. The petition indicates that much of the transferred canal water went to land which already had canal shares, and was therefore supplementing another surface supply. However, these changes may still induce an enlargement of ground water usage.

Some of Branchflower's ground water rights were developed as a sole-source supply and surface water was not appurtenant. These rights were later transferred onto lands that had appurtenant surface water, but the surface water was not used after the ground water supply was developed. Conditions preventing the use of ground water if surface water is not used were included on some transfers. Other rights were developed on land where surface water was appurtenant, but were probably not used conjunctively; surface water was used elsewhere upon development of ground water. Again, conditions limiting sale or non-use of the surface were included.

I have reviewed the water rights identified by Branchflower's Petition:

36-08313B Part of Item 1 in Branchflower's Petition. The application for permit (August 1986) doesn't mention surface water. Permit and amended permit (March 1991) includes "rate of diversion ... shall not exceed 0.02 cfs per acre ..." condition. The right was licensed in June 1994 as supplemental with conditions for 0.02 cfs, 4 afa per acre, and "... fully use all surface water rights ... prior to using water under this right."

Branchflower claims he developed the property intending to use only ground

water, and to lease and/or use surface water on other property until he was able to sell it. Surface water was likely last used on this land in 1989 or 1990, and was thereafter used on other land until it was sold to Thiebault in October 1995.

Although use of the surface water on this land was discontinued prior to licensing or any other notification that it must be used first, the department had issued the conditioned license prior to the sale of the surface water. Therefore, Branchflower should have been aware of such restrictions prior to selling the surface water. However, the condition requiring Branchflower to "... fully use all surface water rights ... prior to using water under this right" does not specifically prevent the sale of surface water.

Since surface water is no longer appurtenant to this property, it is difficult to enforce the above condition. Branchflower requests that the condition be removed. **I support** supplementing it or replacing it with a condition stating that the right may be subject to future conjunctive / supplemental use rules.

No —

- 36-08313A Item 2 of Branchflower's Petition. See review of part B above. The license, issued June 9, 1994, restricts ground water use if surface water is not used. Northside claimed land as a place of use.

Branchflower claims the land was developed with the intent to use the ground water only, and to lease and/or use the surface water on other property until it could be sold. Since about 1989 or 1990, surface water has been leased and used on other property until it was sold in October 1995.

As with part B, since surface water is no longer appurtenant to this property, it is difficult to enforce the above condition. Branchflower requests that the condition be removed. **I support** supplementing it or replacing it with a condition stating that the right may be subject to future conjunctive / supplemental use rules.

No —

- 36-07460G Part of Item 1 of Branchflower's Petition. It appears that part A was split into C & D. The original right does not mention or indicate any use of surface water, and Northside did not claim any land at the original place of use. Part D was moved to land that Northside claimed, so standard comments were added in the adjudication claim/recommendation process, although surface and ground water were probably not ever used conjunctively. Part D was then split into parts E, F, & G. Pam's memo to file states the claim combines water with Northside on original (part D) place of use, which was probably based on review of adjudication records. Part G changes POU to land served by Northside, but I believe Branchflower sold or used the surface water elsewhere upon development of ground water.

The transfer for Part G, approved January 31, 1996, includes these conditions: (1) "... no more than 0.02 cfs ... 4.0 afa per acre...", (2) "This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use." and (3) "The right holder shall use the full allotment of appurtenant surface water rights in conjunction with ground water diverted under this right."

$$\frac{14.2 \text{ cfs}}{900 \text{ acres}} = 0.0158 \text{ cfs/acre}$$

Since the original right was developed as ground water only, and since the right was never used in a supplemental nature, ~~conditions regarding supplemental use should be removed from this right~~ and other portions of 36-07460.

✓ Yes

- 36-07460E Part of Item 3 of Branchflower's Petition. See notes on 36-07460G, Item 1 above. Part E does not have any restricting language, but includes a condition that use is combined with Northside. Part E has always been used as a sole source, and never in conjunction with Northside water, but it was moved to land where surface water was used. Since this part has not been used conjunctively with surface water, and since the original right was not used with surface water, I ~~support removing language~~ suggesting that this right is supplemental to surface water.

from AJ
recommened

✓ Yes

- 36-02517C Part of Item 1 of Branchflower's Petition. The 1961 Application for Permit was for supplemental ground water use. The license does not mention of the supplemental nature of the right. Transfer 4053 (March 1994, part B & C) included the "no more than 0.02 cfs, 4 afa per acre" condition. Transfer 4375 (January 31, 1996, part C) included these conditions: (1) "... no more than 0.02 cfs ... 4.0 afa per acre...", (2) "This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use," and (3) "The right holder shall use the full allotment of appurtenant surface water rights in conjunction with ground water diverted under this right."

Branchflower purchased the original 36-02517 land from Dake in September 1990. He has retained ownership of the surface water, but has never used it on this property. The changes approved by transfer 4053 (part C) were never made. Transfer 4375 authorized moving the ground water to DeVries property, which also had appurtenant surface water. According to the sales agreement between DeVries and Branchflower, upon approval in October 1995 of a separate transfer DeVries had made for commercial use, DeVries received ownership of the ground water and Branchflower received the surface water from DeVries which was immediately sold to Thiebault.

Although the right was initially developed as supplemental, the license does not specifically reflect this nature. Branchflower was not notified by the department that transfer 4375 would include limitations until its final approval in January 1996,

at which time the right was owned by DeVries and surface water was no longer appurtenant to DeVries property. Branchflower was therefore not aware of these conditions until my August 1996 letter to him.

Although Branchflower no longer owns this right, he requests that conditions limiting ground water use due to surface water non-use or sale be removed. I have mixed feelings about this change. On one hand, the surface water was sold and transferred off the property before the parties had notice that they would be required to retain and use it. On the other hand, the transfer likely leads to an expansion of ground water use; although Branchflower used the right as a sole source after 1990, evidence suggests it was used as a supplemental source by the original owners. Overall, I **don't support this change**, and I feel that the conditions should be enforced unless DeVries either (1) obtains ownership of and uses surface water on this property, or (2) shows that the surface water shares that were appurtenant to the property were of such little value and unreliable that the ground water would have been the primary source of irrigation even if the surface water had been retained and used.

✓
Yes

36-02517B Part of Item 3 of Branchflower's Petition. See comments on 36-02517C, Item 1 above. The ground water was originally developed as a supplemental source, but now is used as the sole source. The "... no more than 0.02 cfs, 4 afa per acre" condition is included on the transfer. Branchflower would like to have this condition removed. However, I **don't support this change**; the language does not specifically restrict the non-use or sale of surface water from the appurtenant property, but it does reflect the supplemental nature of the original right.

✓ Yes

36-08560B Part of Item 5 of Branchflower's Petition. The license, approved February 20, 1996, includes conditions "combined 0.02 cfs, 4 afa" and "diversion and use of water under this right is subject to rules that may subsequently be promulgated for the use of existing rights used for supplemental purposes." VAX database shows Northside as "other rights." The September 1990 application for permit states that canal shares will be transferred off, and remarks that "Farm is being converted from gravity to sprinkler irrigation, and from canal water/ground water to strictly ground water."

Branchflower acquired the property in September 1990, the same time he applied for the permit. Although Branchflower remains owner of the appurtenant surface water, he claims he has never used it on this property, and that it is currently being leased and used on other property. He has requests that Northside not be listed as "other rights" and that the "supplemental" condition be removed. Northside is another appurtenant right, but Northside water was never used in conjunction with this right.

Not in
petition

Since Northside water is appurtenant to this land, although it hasn't been used here since ground water was developed, it is still an "other right" and the record should reflect so. The other conditions do not specifically limit Branchflower's use of the surface water at this time, but may as supplemental use rules are promulgated. I ~~don't support~~ removal of this condition. However, I think if evidence supports, the record should be clear that this right has never been used as supplemental to surface water.

- 36-08581 Part of Item 5 of Branchflower's Petition. The license, approved in May 1996, includes conditions "combined 0.02 cfs, 4 afa" and "diversion and use of water under this right is subject to rules that may subsequently be promulgated for the use of existing rights used for supplemental purposes." VAX database shows Northside as "other rights." The February 1991 application remarks that "Well will replace canal shares to provide a constant water flow for sprinkler operation."

The situation is similar to 36-08560B above with Branchflower requesting to have conditions removed. Branchflower remains owner of the surface water, but it has not been used on this property since he purchased it in September 1990, and it was clear from the application that Branchflower did not intend to use the two sources conjunctively. My recommendation is the ~~same as above~~, conditions should remain, but the record should reflect that the ground water right has not been used to supplement a surface source.

Not in
petition

- 36-08582 Part of Item 5 of Branchflower's Petition. The license, approved February 20, 1996, includes conditions "combined 0.02 cfs, 4 afa" and "diversion and use of water under this right is subject to rules that may subsequently be promulgated for the use of existing rights used for supplemental purposes." VAX database shows Northside as "other rights."

Again, the situation is similar to the above two rights. Branchflower used the surface water in 1991, but it has not been used on this property since. Although he still owns the surface water, it is being leased or used on other property. The February 1991 application for permit remarks that "Well will replace canal shares to provide a constant flow of water for sprinkler operation." Branchflower would like these conditions removed, but my recommendation is the ~~same as for the two rights above~~.

ACCOMPANYING SURFACE WATER IS)
TRANSFERRED.)

PETITION FOR
DECLARATORY RELIEF

INTRODUCTION

Petitioners, Michael G. Branchflower and Katherine L. Branchflower have lived and farmed southwest of Wendell, Idaho since 1981. Petitioners first purchased 80 acres from Bessie Lehmann.

Petitioners own and operate a center pivot construction and repair business known as Branchflower Company, and also farm the ground described in this Petition.

Over the years Petitioners have purchased other small farms from 40 acres to 200 acres and currently own and farm approximately 700 acres.

This area is at the end of the surface water delivery system for the Northside Canal Company. Historically delivery of water by the Northside Canal Company has been short, unpredictable and depending on the water year, even non-existent. Petitioners have had several crop failures due to lack of delivery of water by Northside Canal Company.

RECEIVED

DEC 8 1997

Petitioners began to purchase groundwater rights so they would have a reliable water source. Once the groundwater became appurtenant to a particular farm the surface water was no longer used upon that property to which the ground water was appurtenant.

The first such purchase was from Janss Farms (36-07460). Protracted negotiations with Idaho Department of Water Resources were entered during this transfer involving, in part, the Department's concern that a portion of the right may have been abandoned. The transfer was eventually approved with no restrictions.

There had been no restrictions placed upon the use of any of these groundwater rights until January 1996 (36-07460G) that prohibited the "sale, transfer, lease or use on any other place of use."

Petitioners have acted in reliance on Idaho Department of Water Resources groundwater rights as issued by IDWR. That is with no restrictions on "sale, transfer or lease" of the Northside Canal Company shares. Agreements have been made to transfer or lease approximately 350 shares of Northside Canal Company water. This retroactive imposition of restriction by IDWR has caused Petitioners to seek declaratory relief.

PETITION

Pursuant to the Idaho Department of Water Resources Rules of Procedure 400, the Petitioners make the following petition for declaratory relief. The Petitioners are Michael G. Branchflower and Katherine L. Branchflower who are the owners of certain water

rights discussed in this Petition and are transferors of certain water rights discussed in this Petition.

Petitioners request a declaratory ruling from the Department that their ground water rights may be used without the conditions imposed by IDWR in February 1996. The conditions that Petitioners object to are that: a) "surface water rights appurtenant to the place of use not be sold, transferred, leased, or used in any other place of use," and the condition that, b) "surface water rights appurtenant to the land be used prior to using ground water rights."

These Rights include 36-08313B, 36-02517C, 36-07460G, 36-08313A, 36-02517B, and 36-07460E.

This Petition is based upon Idaho Code 42-350 and 42-351 and the factual allegations set out below.

This Petition is made basically in response to a letter from Scott King to Petitioners dated August 30, 1996, a copy of that letter is attached as Exhibit A to this Petition. The Petition will attempt to address the "problems" and "concerns" set forth in Exhibit A, items 1, 2, 3, and 5.

ITEM 1: Water Right 36-08313B, 36-02517C, 36-07460G

Acquisition of Property - Petitioners never owned the ground to which these rights are now appurtenant. Petitioners leased that property in 1994, 1995, and 1996 from Ed Southfield.

Development of Groundwater Right - Petitioners ^{Petitioners?} owned these water rights which were appurtenant to different property before

the rights were split and transferred by Petitioners to DeVries' property, to which they are now appurtenant. The original water rights did not contain any conditions to require use of existing surface water. No prohibitions on transfer of surface water were attached to the water rights before the transfer to DeVries.

Conveyance of Surface Water - There were 80 shares of Northside Canal Company water traded to Petitioners by DeVries. Petitioners have sold these shares to Don Thiebault.

Current Irrigation Method - Groundwater is being used on the property exclusively.

Conditions of Water Right -

All of these 80 shares with the exception of 3.5 shares are appurtenant to ground which was already served by Northside Canal Company shares. These shares with the exception of 3.5 shares were supplemental shares.

36-074606 ?

With regard to Water Right 36-07460J, this claim was created and then modified pursuant to a stipulation filed in the SRBA sub case in January of 1996. The existing water right does not contain a condition prohibiting its use of surface water that is sold or otherwise not used.

x

ITEM 2: Water Right No. 36-08313A

Acquisition of Property - Petitioners purchased 39 acres from the Merrill in May of 1990, and 40 acres from Twambly in October of 1990.

Development of Groundwater Rights - There was no

RECEIVED

groundwater right appurtenant to this ground when Petitioners purchased it. Petitioners had applied for a water right several years prior to purchasing this ground during the moratorium. The Department of Water Resources granted the Water Right 36-08313 with the priority date of 1986. There were no conditions restricting transfer of surface water in this water right when it was issued.

Conveyance of Surface Water - Petitioners have never used canal water on this ground.

Current Irrigation Method - The property is now irrigated with ground water from Water Right 36-08313A.

Conditions of Water Right - The license as now issued requires using surface water rights appurtenant to the lands prior to using the ground water right. Petitioners have historically leased the ground water rights appurtenant to this land since they purchased the land in 1990. Petitioners have leased the surface water every year since purchasing the property. When Petitioners paid off the mortgage on this piece of property the surface water rights were transferred, 40 shares to Greg Thiebault, 23 shares to Bill Gully, 8 shares to Howe, and 8 shares to Prescott. The Thiebault and Gully surface water rights were supplemental to other surface water being used on the land to which it was transferred (all Northside Canal Company water). The 8 shares each to Howe and Prescott are believed to be used for new home sites.

clearly supplemental, but no license conditions

ITEM 3: Water Rights Nos 36-02517B and 36-07460E

Acquisition of Property - Petitioners purchased this

ground from Virgil Dake in September of 1990. There were 207 acres purchased. There were 192 acres of Northside Canal Company water appurtenant to the land.

Development of Ground Water Right - Ground Water Right 36-02517 with a priority date of 1961 was appurtenant to this ground at the time Petitioners purchased it. When Petitioners purchased this ground only the 169 acres below the Northside Canal Company ditch were irrigated. The Canal Company water and ground water was co-mingled. There were no sprinklers on the property. The Petitioners only used Canal water for the 1991 season.

Conveyance of Surface Water - Petitioners transferred a portion of Water Right 36-07460C to this property to run a small pivot on a portion of the ground located above the Northside Canal Company ditch. Petitioners applied for trust water when they acquired the property in 1990, and a water right was issued. Water Right 36-08560 This brought the ground water rate up to 1 inch per acres for the entire 207 acres.

Conveyance of Surface Water - Of the 192 Northside Canal Company shares 180 have been leased to Jerry Doughty since 1992. Petitioners intend to convey these shares to Jerry Doughty when the mortgage is paid. Doughty uses this water as supplemental water to other ground which Northside Canal Company shares are appurtenant.

Current Irrigation Method - The property now is irrigated entirely with ground water rights.

Conditions of Water Rights -

02517B - There are no conditions regarding use of surface

water. 07460E

(07460C) - There are no conditions except to mention the existence of NSCC water. The Northside Canal Company has never delivered to the ground to which this water right is appurtenant.

ITEM 5: Water Right 36-08582 and 36-08560B

Acquisition of Property - This property was purchased from Murphy by Petitioners in February of 1991, 70 acres of property. There was 67.75 shares of Northside Canal Company water appurtenant to the property. There was no ground water appurtenant to the property. The property was located close to the end of the Northside Canal Company's delivery system.

Development of Groundwater Right - Petitioners applied for ground water, two diversion points, two pivots. Water Right 36-08581 and 36-08582. The first Right was .74 cfs 39 acres, the second .46 cfs, 23 acres. 08581 was used on the west side of the property and 08582 was used on the east side of the property. 8560B is .12 for 6 acres.

Conveyance of Surface Water - The surface water has never been used by Petitioners on the west side of the property and was only used by Petitioners in 1991 on the east side. It has been leased to Kent Thiebault, Vern Kohntop, and Bill Braum. It is being used as supplemental surface water for property to which Northside Canal Company shares are already appurtenant.

Current Irrigation Method - Groundwater, pivot and hand lines.

Conditions of Water Right - There are no restrictions on transfer.

ARGUMENT

Petitioners seek declaratory relief for the reason that the current state of these ground water rights make it uncertain whether Petitioners will be allowed to continue using ground water.

Petitioners are aware that the Department's general policy in the past has been to require the use of surface water prior to the use of ground water rights. Petitioners understand that in some cases the transfer of surface water rights can result in enlargement of use.

In the instant case, Petitioners transferred 79 shares of Northside Canal Company water from the Twambly and Merrill farms. 40 shares were sold to Greg Thiebault. All of these shares are appurtenant to the ground which already uses Northside Canal Company water. Twenty-three shares have been sold to Bill Gully. These shares also are being used to supplement and are appurtenant to ground already serviced by Northside Canal Company water.

Eight shares were sold to a Mr. Prescott in the spring of 1996 for a homesite. Eight shares were sold to Mr. Howe in the spring of 1996 for a homesite. It is possible that these shares may be an enlargement of use.

The location of all the ground for which Petitioners applied for and received ground water rights is at the end of the Northside Canal Company delivery system. Historically the Canal

Company has either not delivered the water to this ground or it has delivered water sporadically and in insufficient quantities so that it cannot always be put to beneficial use. Petitioners need to be able to divert water under their ground water rights with the security that the water diversion will not be curtailed under the Department's interpretation of Idaho Code 42-351 or that these water rights will not be avoided pursuant to Idaho Code 42-350.

Petitioners seek declaratory relief pursuant to Department's rules 400 in the form of a declaration from the director granting Petitioners the ability to continue to divert water pursuant to ground water right nos. 36-08313B, 36-02517C, 36-07460G, 36-08313A, 36-02517B, and 36-07460E.

DATED this 14 day of February, 1997.

RECEIVED
FEB 18 1997
Department of Water Resources

Michael & Katherine Branchflower
PO Box 392
Wendell, ID 83355

Dear Mr. & Mrs. Branchflower:

This letter documents a variety of water measurement and distribution problems and concerns regarding your ground water diversions located in the Wendell area. It appears that some of your diversions exceed authorized water right limits. Other diversions are in violation of specific conditions requiring that groundwater be used only when appurtenant surface water rights are not available. Finally, you may be irrigating lands not authorized by water rights. The department may issue notices of violation for illegal diversion of water at these sites. One transferred right lists an incorrect description of the diversion location, and you must apply for a transfer to change the point of diversion to match the well actually used. Finally, diversions from two dairy wells must also be measured and reported to the department.

Please read this letter carefully. If you disagree with any part of it, please contact me as soon as possible.

Four water rights are used to irrigate the NW quarter of section 11, Township 8 South, Range 14E. Department records show that you own three of the four water rights, and that Irene Vander Vegt is owner of 36-07460J. -?

Water Right	Flow Rate (cfs)	Acres	
36-08313B	0.32	16	(NWNW)
36-02517C	0.17	20	(NENW)
36-07460G	0.19	12	(NENW)
36-07460J	1.23	69	(SWNW-36, SENW-33)

The map you submitted in 1995 indicates that a pivot is centered in the NW quarter, and operates full circle, irrigating approximately 33 acres per 40 acre quarter-quarter. You do not have adequate water rights to cover the full use of this pivot as only 16 acres are authorized in the NW of the NW quarter of section 11, but it appears you are irrigating about 33 acres.

Transferred water rights 36-02517C and 36-07460G were approved with conditions stating that:

C:\hr-bran.wpd

EXHIBIT A

Exhibit

This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use.

And

The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.

Water right 36-08313B was approved with the following condition:

The right holder shall fully use all surface water rights appurtenant to the lands identified above prior to using water under this right.

Water right 36-07460J does not contain specific conditions requiring surface water use. The North Side Canal Company has confirmed that the 160 surface water shares appurtenant to this land have been recently sold and are no longer used at this location. According to the above conditions, you can no longer use these rights for irrigation of this ground if the appurtenant surface water rights are sold or otherwise not used when available. If this analysis is incorrect, please notify me as soon as possible. Otherwise, the department will issue a notice of violation for illegally diverting water.

Water right 36-08313A authorizes the use of two wells to irrigate 60 acres with a diversion rate of 1.20 cfs. Gary Spackman measured a total of 1.73 cfs from the two wells, which exceeds the authorized amount by 0.53 cfs. You also reported irrigation of 64 acres during 1995; four acres were not authorized for irrigation. The licence stipulates that "The right holder shall fully use all surface water rights appurtenant to the lands identified above prior to using water under this right." The North Side Canal Company has confirmed that the surface water shares appurtenant to this land have been recently sold and are no longer used at this location. According to the above condition, you can no longer use this right for irrigation of this ground if the appurtenant surface water rights are sold or otherwise not used when available. As above, if this analysis is incorrect, please notify me as soon as possible. Otherwise, the department will issue a notice of violation for illegal diversion of water.

It appears that transferred rights 36-02517B & 36-07460E are used together and list the same diversion (well) located in lot 3 (NWNENW quarter of) section 2, Township 8 South, Range 14 East, and authorize a total diversion rate of 0.34 cfs for irrigation of 33 acres. Gary Spackman measured a flow rate of 1.28 cfs, which exceeds the authorized amount by 0.94 cfs. You have also reported irrigation of 38 acres, which exceeds the authorized amount by 5 acres.

Gary Spackman measured a total flow rate of 4.61 cfs from the two wells used for transferred right 36-07377A. This right authorizes only 4.36, and you are exceeding this amount by 0.25 cfs.

#5 { Water rights 36-08582 and 36-08560B together authorize diversion of 0.58 cfs to irrigate 29 acres. Gary Spackman measured 0.68 cfs, which exceeds the authorized amount by 0.10 cfs. You also reported irrigating 35 acres, which exceeds the authorized amount by 6 acres.

#6 { In your 1995 ground water measurement report, you imply that the well located in the NESESW quarter of section 3, Township 8 South, Range 14 East is used to divert groundwater for water right numbers 36-15219B, 36-08252E, 36-08063C, and 36-07460B. However, 36-07460B does not include this location as a point of diversion, but instead lists a well in the NENESW quarter of section 3. To legitimately use the well in the NESESW quarter for water right no. 36-07460B, a transfer must be approved changing the point of diversion of this right. Currently, only 36-15219B, 36-08252E, and 36-08063C can legitimately be diverted from the well in the NESESW quarter to irrigate a total of 33 acres.

A comparison of water right limits to actual measured diversions for the above well shows that the measured flow rate is 0.34 cfs higher than the water rights authorize. Gary Spackman measured 914 gpm (2.04 cfs), but the authorized flow is only 1.70 cfs, including the 36-07460B right.

#7 { Recently transferred rights 36-07377B and 36-07547B, co-owned by yourself and DeVries, authorize a total of 0.20 cfs and 59.6 acre-feet annually for stockwater and commercial uses (a dairy). Conditions of this transfer require that diversions under these rights must be measured and reported. If flowmeters have not yet been installed on the wells used for this dairy, they should be installed as soon as can reasonably be expected. Enclosed are reporting forms for these wells.

If you have any questions about these matters, please let me know. I can be reached by mail at the above address or by phone at (208) 327-7897.

Sincerely,

Scott King

RE: WATER RIGHT NOS. 36-08582 AND 36-08560B

Dear Water Right Holder(s):

The above referenced water rights are in the process of being licensed. However, before licenses can be issued, your permits must be amended to depict your water rights as they have been developed.

The enclosed Applications for Amendment contain information that will be included on the licenses when they are issued. The amendment for water right 36-08582 reflects a change in the location of the place(s) of use description. The amendment for water right 36-08560B reflects a change in the location of the point(s) of diversion. Please review carefully and if you concur, sign the amendments and return with the \$100.00 (\$50.00 each) filing fee within 14 days.

The last page of the Application for Amendment form contains a list of CONDITIONS/REMARKS proposed for the licenses when they are issued. These conditions/remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is (208) 327-7946.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

WELL DRILLER'S REPORT

State law requires that this report be filed with the Director, Department of Water Resources within 30 days after the completion or abandonment of the well.

1. WELL OWNER Name <u>Mike Branch Pioneer</u> Address <u>P.O. Box 352, Wendell, ID 83255</u> Drilling Permit No. <u>36-92-S-0297-000</u> Water Right Permit No. <u>36-08582</u>	7. WATER LEVEL Static water level <u>65</u> feet below land surface. Flowing? ☐ Yes ☒ No G.P.M. flow _____ Artesian closed-in pressure _____ p.s.i. Controlled by: ☐ Valve ☐ Cap ☐ Plug Temperature <u>85.4</u>°F. Quality _____ Describe circulation of temperature zones below.																																																																												
2. NATURE OF WORK ☒ New well ☐ Deepened ☐ Replacement ☐ Well diameter increase ☐ Modification ☐ Abandoned (describe abandonment or modification procedures such as liners, screen, materials, plug depths, etc. in lithologic log, section 8.)	8. WELL TEST DATA ☐ Pump ☐ Bailer ☐ Air ☐ Other _____ <table border="1"> <thead> <tr> <th>Discharge G.P.M.</th> <th>Pumping Level</th> <th>Hours Pumped</th> </tr> </thead> <tbody> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> <tr><td> </td><td> </td><td> </td></tr> </tbody> </table>	Discharge G.P.M.	Pumping Level	Hours Pumped																																																																									
Discharge G.P.M.	Pumping Level	Hours Pumped																																																																											
3. PROPOSED USE ☐ Domestic ☒ Irrigation ☐ Monitor ☐ Industrial ☐ Stock ☐ Waste Disposal or Injection ☐ Other _____ (specify type)	8. LITHOLOGIC LOG <table border="1"> <thead> <tr> <th rowspan="2">Bore Diam.</th> <th colspan="2">Depth</th> <th rowspan="2">Material</th> <th colspan="2">Water</th> </tr> <tr> <th>From</th> <th>To</th> <th>Yes</th> <th>No</th> </tr> </thead> <tbody> <tr><td>15</td><td>0</td><td>2</td><td>Top Soil</td><td> </td><td> </td></tr> <tr><td>15</td><td>2</td><td>6</td><td>Gray Loam</td><td> </td><td> </td></tr> <tr><td>10</td><td>6</td><td>58</td><td>1" Pl</td><td> </td><td> </td></tr> <tr><td> </td><td>58</td><td>64</td><td>Bl. loam</td><td> </td><td> </td></tr> <tr><td> </td><td>64</td><td>66</td><td>Red loam</td><td> </td><td> </td></tr> <tr><td> </td><td>66</td><td>67</td><td>Red broken loam</td><td> </td><td> </td></tr> <tr><td> </td><td>67</td><td>68</td><td>Gray loam</td><td> </td><td> </td></tr> <tr><td> </td><td>68</td><td>69</td><td>Light tan ss</td><td> </td><td> </td></tr> <tr><td> </td><td>69</td><td>70</td><td>Bl. loam</td><td> </td><td> </td></tr> <tr><td> </td><td>70</td><td>93</td><td>Broken bl. loam</td><td> </td><td> </td></tr> <tr><td> </td><td>93</td><td>106</td><td>Bl. loam</td><td> </td><td> </td></tr> </tbody> </table>	Bore Diam. Department of Water Resources

A. GENERAL INFORMATION

Permit No. 36-08582

1. Owner: Mike & Kathy Branchflower Phone No. 536-2594

Current Address: Box 392 Wendell, ID 83355

2. Accompanied by: Owner EXAM DATE: 7-20-94

Address: Same Phone No. Same

Relationship to Permit Holder: Owner

3. Source: Groundwater tributary to None

B. OVERLAP REVIEW

1. Other water rights with the same place of use: ^{MTS} ~~36-8560 (Permit)~~ 36-8700 (Application)

2. Other water rights with the same point of diversion: ~~36-8700 (Application)~~

C. DIVERSION AND DELIVERY SYSTEM

1. Point(s) of Diversion:

Ident No.	Gov't Lot	1/4	1/4	1/4	Sec.	Twp.	Rge.	County	Method of Determination/Remarks
			SE	NW	2	8S	14E	Garding	Ortho Photo Quad Map

2. Place(s) of Use:

Indicate Method of Determination ASCS Aerial Map

TWP	RGE	SEC	NE				NW				SW				SE				Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
8S	14E	2					1				22								23

FEB 23 1996

3. **Delivery System Diagram:** Indicate all major components and distances between components. Indicate weir size/ditch size/pipe i.d. as applicable.

Scale: 1" = 100 Scale

☒ Copy of USGS Quadrangle Attached Showing location(s) of point(s) of diversion and place(s) of use (required).

☒ Aerial Photo Attached (required for irrigation of 10+ acres)

☒ Photo of Diversion and System Attached

4.

Well or Diversion Identification No.*	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size
	Unknown	25	Unknown	Unknown	Unknown

*Code to correspond with No. on map and aerial photo

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date

2. Measurements: No flow measurements were taken since during the exam, only the handlines were running. A theoretical flow rate is used for flow estimation

FEB 23 1996

E. NARRATIVE/REMARKS/COMMENTS

228-40
MTS

The ^{only} water rights that overlap this water right ^{is} are currently ~~either~~ in the ~~permit~~ or the application phase. A Field exam revealed 36-08560 does not overlap this permit

A 25 Hp submersible pump is used to supply water through a buried mainline system for the pivot and handlines. Handlines are only used to pick up the corner near the point of diversion. The pump was installed by Eaton Drilling and Pump Service in Wendell Idaho. At the time of the exam, only the pump horsepower was available.

Have conditions of permit approval been met? ☒ yes ☐ no

FEB 23 1996

F. FLOW CALCULATIONS

_____ Additional Computation Sheets Attached

Measured Method:

$$Q = \frac{8.8(25)(.70)}{75 + 2.31(60)} = .72 \text{ cfs}$$

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 23(4.0) = 92 \text{ afa}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days In Irrigation Season}) \times 1.9835 = .46(215)/1.9835 = 196.17 \text{ afa}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 92 \text{ afa}$$

2. Volume Calculations for Other Uses:

$$Fcc = 1 \text{ cfs}$$

$$\text{System} = .72$$

$$\text{Legal} = .46$$

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)
	From	To		
Irrigation	4-1	10-31	.46 cfs	92 afa
Totals:			.46 cfs	92 afa

2. Recommended Amendments

☐ Change P.D. as reflected above ☐ Add P.D. as reflected above ☐ None
☒ Change P.U. as reflected above ☐ Add P.U. as reflected above ☐ Other

GROUNDWATER MEASUREMENT REQUIREMENT ANALYSIS

FILE: 36-28582
DATE: _____
BY: _____

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8) \times (\text{H.P.}) \times (\text{EFF.})}{\text{TDH}}$

Q = CFS
H.P. = Total Brake Horsepower of pumping plant (including booster)
EFF. = Pumping plant efficiency (ASSUME 70% OR 0.70)
TDH = total dynamic head = [(LIFT) + (PSI X 2.31)]
LIFT = depth to water in FEET from land surface to pumping water level
PSI = pumping pressure measured in psi near pump (if open discharge assume zero [0])

$$Q = \frac{(8.8) \times (25) \times (0.70)}{[(75) + (60 \times 2.31)]} = 72$$

LIFT FROM:	PSI FROM:	NOTES ON PUMP:
measurement ()	measurement ()	Motor Make, Serial or ID
owner ()	owner ()	
area estimate (✓)	estimate (✓)	Pump Make, Serial or ID, rating
well logs (✓)	owner gage ()	
Booster (Y) (N)		
REMARKS		

ANNUAL VOLUME ANALYSIS

POTENTIAL Acre Feet/Acre/Annum = $\frac{(\text{DAYS IN SEASON}) \times (1.98) \times (Q)}{(\text{RECOMMENDED ACRES IRRIGATED})}$

(season)	(days)	
3/15 - 11/15	246	
4/1 - 11/1	215	POTENTIAL = $(72) \times (1.98) \times (214)$
4/15 - 10/15	184	
3/1 - 12/1	276	(23)

POTENTIAL = 13.26

REQUIRED Acre Feet/Acre/Annum = 4
(AF/Ann/Ac irrigation requirement from chart for area)
NOTE that this is NOT Consumptive use

IF POTENTIAL IS GREATER THAN REQUIRED THEN NO MEASUREMENT NECESSARY (X)
IF POTENTIAL IS LESS THAN REQUIRED THEN MEASUREMENT IS NECESSARY ()

NOTICE OF AMENDMENT TO A WATER
PERMIT
NO. 36-08582

Notice is hereby given that MIKE BRANCHFLOWER is the holder of Approved Permit No. 36-08582 with a priority date of 02/20/1991 authorizing the diversion of 0.52 cubic feet per second of water from groundwater in the SWSE, S30, T07S, R15E; County of Gooding, to be used for irrigation of 26 acres within W1/2SE, S30, T07S, R15E.

This Application for Amendment proposes to change point(s) of diversion and change place of use.

The permit holder has applied to the Department of Water Resources for an Amendment to the Permit, to be changed as follows:

Amount: .52 cfs

Period of Use: 04/01 to 10/31

Point of Diversion: SESENW, S2, T08S, R14E; Gooding County.

Place of Use: 26 acres within SENW, S2, T08S, R14E.

Any protest against approval of the amending of Permit No. 36-08582 as set forth above must be filed with the applicant and with the Director, Idaho Department of Water Resources, 222 Shoshone Street East, Twin Falls, ID 83301 on or before December 27, 1993.

Gentlemen:

Enclosed you will find a legal notice which we wish to have published in your newspaper. We have inserted the required publication dates. If time allows, please submit a galley proof for review before publication.

We have attempted to submit this legal as camera ready. Please call me at your earliest convenience and prior to your staff re-typing the legal if it does not meet your specifications so I can possibly make adjustments.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

In order to receive payment, an affidavit of publication must be submitted to the Department along with the publication bill.

Very truly yours,

Mary Baldwin
Sr. Secretary

Re: Applications for Amendment, 36-08582 & 36-08313

Dear Mr. Branchflower:

The Department of Water Resources acknowledges receipt of your applications for amendment of a permit.

This office has scheduled advertising the applications in the Gooding County Leader on 12/8 & 12/15/93. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

James E. Stanton
Sr. Water Resource Agent

PROOF ACKNOWLEDGEMENT LETTER

RE: PERMIT NO. 36-08582

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls, at (208)736-3033.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

RE: Permit No. 36-08582

Dear Permit Holder:

Returned is the Proof of Beneficial Use form submitted to this office in connection with the above referenced permit. Unfortunately it is unacceptable as filed. Condition #2 of your permit to appropriate water states you must install a flow measurement port or other device to measure the rate of diversion. It does not appear you have complied with this condition.

If you have installed a flow measurement port, please indicate this on the proof. If you have not installed the port, you may return the proof form and request, in writing, a waiver of the condition. You have until January 26, 1994, to submit an acceptable proof of beneficial use.

If you have any questions, or if I can be of any further assistance, please feel free to contact me.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 36-08582

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1994. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

BRANCHFLOWER, MIKE
FEE EXPLANATION & CALCULATION MEMO

On January 29, 1993 Mike Branchflower filed two transfer applications, one application to amend a permit and four applications for permit. The transfer applications and the application for amendment replaced three previously filed transfer applications that had not yet been advertised. Fees in the total amount of \$150 had been paid for the three previous transfer applications on 10-30-92 in receipt #S015131 (copy attached).

I gave Mr. Branchflower credit for the \$150 paid for the nonadvertised transfer applications, calculated and collected fees as follows:

2 transfer applications @ \$50	= \$100
1 amendment application @ 20	= 20
2 permit applications @ 30	= 60
2 permit applications @ 45	= <u>90</u>

TOTAL FEES DUE = \$270

LESS CREDIT 150

AMOUNT COLLECTED ON 1-29-93 = \$120

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 36-08582

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

This permit authorizes the appropriation of trust water. Trust water is defined as that portion of a particular hydropower water right which exceeds certain minimum stream flows established by state action, and is held in trust by the State of

RECORDED

JAN 21 1992

Idaho for the use and benefit of the people within the state.
Conditions pertaining to a term review, annual use fee and
jurisdiction of the permit are trust water conditions.

Sincerely,

PAMELA SKAGGS
Technical Records Specialist

RE: Application for Permit #36-08582

Dear Applicant:

During final review of the above referenced application, it has come to the attention of the Department that both this application and Permit #36-08581 are overlapping existing water rights.

We are not sure of your intent in filing additional applications on small parcels of acres already included within existing rights, but are concerned that perhaps you are taking unnecessary or inappropriate actions to reflect your actual use and development plans. There is no problem at this time with processing the application, but you should be aware that there could be future conflict between overlapping water rights during the licensing phase of your water rights. The Department would not wish to see you expend time and money developing a water right in error.

We suggest you undertake a comprehensive review of all water rights pertaining to your land and confirm that they reflect your actual use and development plans. If you require any assistance in this matter, please feel free to contact the Department.

Sincerely,

PAMELA SKAGGS
Technical Records Specialist

JAN 21 1992

MEMORANDUM

TO: FILE

FROM: TIM LUKE

RE: APP. NO. 36-8582/Trust Water Processing

DATE: 12-19-91

The above application is a trust water filing which has been forwarded to the state office for final review and processing.

Upon review of this application, I notice that the right overlaps exisiting groundwater rights as well as surface water canal shares. When reviewing the application and the attached place of use overlap report, one may become very confused as to the intent of this filing. It appears to me that the proposed use is already covered by exisiting groundwater rights or permits.

Since advertising has already been completed, I would recommend continued processing of the application. However, the applicant should be advised of the overlap and potential duplication of filings. Since this is either an unnecessary filing or some type of supplemental filing, the acreage shall not be counted as trust acreage. Trust conditions though are applicable.

Re: Application for Permit No. 36-08581 & 36-08582

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right applications for permit. The applications have been assigned the above referenced identification numbers. Please refer to these numbers in all further correspondence.

This office will be advertising the applications in the Gooding County Leader on 5/1 & 5/8/91. A period of ten days following the second publication will be allowed for the submittal of protests.

If the applications are protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the applications are not protested, they will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.
