MEMORANDUM

Date: August 26, 2003
To: Transfer 69120
From: ameritt
Re: sufficiency memo

Evaluation of Sufficiency of Information Submitted (Transfer 69120 in the name of UR Farms)

This transfer initially proposes to dry up 18.7 acres of land (56 afa of CU water) which is a portion of a PPU of 372 acres known as the Larsen Farm. This farm is irrigated using rights 36-7044, 36-2676 and 36-7158 from ground water. The water proposed to be converted from irrigation is proposed to be used for stockwater and commercial uses at an existing dairy currently partially covered under license 36-8549. The transfer proposes to move the water across the ESPA approximately 33 miles down gradient toward the west to the site of the dairy facility where the water will be combined with the existing right. The transfer will tie all rights in a common system served by one existing well and one proposed well at the site. The water being transferred is assumed to be totally consumptive.

The application has been augmented by a mitigation plan involving reducing the intended volume to be transferred from the Larsen property but making it up by and drying up of initially 14 acres on the Beckley property (near Dietrich) approximately 17 miles NE of the dairy facility site. These acres are a portion of the place of use of right 37-7331 recently decreed in the SRBA. The decree for 37-7331 notes that the right is combined with AFRD 2 and BWCC shares however further review based on submittal of the stock certificates for Beckley shares in BWCC during review of Busman transfer T68993 show that the shares are associated with adjoining land but the land involved in the transfer is primarily supplied water from right 37-7331.

Authority to File:

A portion of the subject land being dried up involved in transfer is owned by John and Vivian Larsen. The file contains an agreement for purchase and sale of these subject lands from John and Vivian Larsen to Del Kohtz. The file also contains an agreement between Del Kohtz for purchase of the Larsen right.

The subject land on the Beckley property involved in the mitigation plan is owned by R.K. and Bonnie Beckley. The file contains an option agreement between Beckley and Del Kohtz for purchase of a portion of right 37-7331. Purchase of Land not included. The file also contains an agreement between Del Kohtz and UR Farms for purchase of the Beckley right.

Water Right Validity:

All rights involved in the transfer from the Larsen property have been recently decreed in the SRBA with dates of partial decrees ranging from 12/ 1996 to 1/1998. Forfeiture does not appear to be an issue. Included with the application are documents evidencing the recent use of the irrigation rights in years 1996 through 2000.

The right involved in the transfer from the Beckley property for mitigation has been partially decreed. The file includes an evaluation of the consumptive nature of the right with use as recent as 2002. Forfeiture does not appear to be an issue.

Enlargement of Use:

MICROFILMED

DEC 31 2003

*Saved
A012*

MEMORANDUM

Due to the irrigation rights being changed to commercial and stockwater needs an analysis of the historical use information has been made for both the Larsen farm and the Beckley farm. Based on this analysis the consumptive use allowable to be transferred from the Larsen farm should be limited to no more than 2.69 afa per acre of dried up land (Total of 50.3 afa for 18.7 acres) for conversion of nature of use. The consumptive use for the fields involved in the transfer on the Beckley property should be limited to no more than 2.81 afa per acre (Total of 39.3 afa for the 14 acres) to be used for mitigation for the right being moved from the Larsen property and a portion to makeup for volume needed at the dairy as originally requested.

Injury to Other Water Rights:

Included with the application is a proposed mitigation plan prepared by Brockway Engineering. The plan is based on modeling of the ESPA. The plan involves a stepped increase of use at the dairy up to the allowable amount (56.1 afa in total being move to the dairy) after several years. Additionally the plan includes an immediate none use of a portion of the Beckley right (14 acres) with a stepped increase of allowable use over several years up to an allowable 3.5 acres with a permanent none use of 10.5 acres. (10.5 acres includes 2.1 acres dried up for moving to the dairy and 8.4 acres remaining at the Beckley property and not used for mitigation) The plan acknowledges the historical use of the Larsen rights and historical use on the Beckley property.

Local Public Interest:

No major issue identified. Transfer is based on total consumption of water however it is likely a small portion of water diverted will be returned to aquifer.

Beneficial Use/Conservation of Water Resources:

No Issue Identified.

The application has been advertised and protested by Clear Springs. Negotiations continue regarding withdrawal of the protest.

Other issues:

Proposed use is within WD 130 and the watermaster needs to provide comments based on the present submittal.

Once database is cleared to allow inclusion of split portions of original Larsen and Beckley rights, it is intended to supplement file with an amended application signed by appropriate owners of UR Farms acknowledging the mitigation rights use in preparation of any approval.

To: Peppersack, Jeff
Cc: Skaggs, Pam
Subject: RE: UR Farms T69120

Yes it probably makes sense to list the mitigation rights under a different heading. Maybe Pam can fix that when she rennumbers that one right in the approval. As far as the 10.5 acres I've corrected the document on a012 and the comments in workflow.

As soon as Mary scans the stuff can we forward it???

Allen,

I took a look at your draft and checked it against your previous table of Beckley splits. It all looks well done. I have one comment regarding the combined totals on page 1 of the approval. The combined totals that you show under the "summary of water rights after the approved change" are the combined totals for the actual dairy use, but do not account for the mitigation/irr amounts under the Beckley rights. I think you have shown the mitigation rights under a separate heading in past transfers to avoid the confusion. Perhaps that would work in this case.

One other minor item, in your evaluation memo you note that permanent dry up under the Beckley rights is 9.5 acres with 3.5 future irrigation. Shouldn't the permanent dry up be 10.5 acres ($10.5 + 3.5 = 14$ acres).

Jeff

<< File: Draft T69120 TransferApproval ADM 11-4-03.RTF >>

I have created the draft approval for your review. It is also on A012. I am giving the file to Mary to scan the amended application and additional misc stuff.

Note that right 37-21143 will need to be changed to a basin 36 right number prior to final approval.....I've highlighted the areas needing changed in the draft approval.

Enjoy!

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Stockwater use is for 50 range and 350 dairy cattle.
6. Commercial use is for a dairy operation.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

001 03 1995

E. NARRATIVE/REMARKS/COMMENTS

A 6" well, with a 5.0 hp submersible pump & motor, diverts water to 6 corrals, where 350 dairy cows, milking & 50 cows, dry, are confined for feeding & watering. Water is also diverted to a dairy barn & milking parlor, herring bone, for milking twice daily. The cows are washed manually prior to milking; the wash water is recycled for washing the milking parlor floor. A storage tank adjacent to the milking parlor holds the wash water for later use.

Volume recommendations are based essentially on the calculations of the Windows 3.1 Dairy Lotus program. The recommended rate of diversion, .09 cfs, is based on the theoretical capacity of the pump & motor, and as listed on the permit.

No beef cattle are currently being confined in the corrals. The water needed for the additions (100 head) dairy cows is less (16.7 afa) than the amount needed (17.4 afa) for stock water for 300 dairy & 400 range cattle (listed on permit).

No overlaps were found. A well located at the house has gone dry & does not presently furnish water.

Have conditions of permit approval been met? ☒ yes ☐ no

03/12/25

Additional Computation Sheets Attached

$$Q = \frac{(5.0)(8.8)(0.7)}{[(2.31 \times 40) + 253']} = .09 \text{ cfs}$$

1. Volume Calculations for Irrigation:

$$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = N, A,$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 =$$

$$V_{BB} = \text{Smaller of } V_{IB} \text{ and } V_{DB} =$$

30) - 2. Volume Calculations for Other Uses: Stock water Use: (Table #6 & Lotus Dairy Program)
400 (dairy cows, milking) : 16.0 gfa
Commercial Use: (Lotus Dairy Program) : - Equipment Washing: .24 gfa - Floor washing: .1 gfa
 Cattle washing (hand): .4 gfa Total = .9 gfa
50 (dairy cows, dry) X 12 (spd) X 365 (days)
= (stockwater) (219,000)
(325,850) = .7 gfa
Totals: Stockwater: 16.7
Commercial: .9
17.6

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 36-08549

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls at (208)736-3033.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 36-08549

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1994. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 36-08549

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Sincerely,

JIM JOHNSON
Water Rights Supervisor

Re: Application for Permit No. 36-08549

Dear Mrs. Nutch:

The Department of Water Resources acknowledges receipt of the water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the North Side News on 8/1 & 8/8/90. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks. Please see attached list for additional information requirement.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Douglas Jones, E. I. T.
Water Resources Engineer

ACTION OF DEPARTMENT OF WATER RESOURCES

This Permit is APPRO. 2Date 129/90

If approved, this permit authorizes the construction of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85°F or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

REQUEST FOR EXPEDITED ISSUANCE OF A DRILLING PERMIT

U R Farms, Applicant, requests issuance of a drilling permit prior to approval of a water right to withdraw water from the well.

The request is made for the following reason(s):

We want to get the well drilled now while a driller is available.

Applicant understands that the drilling permit does not constitute a water right and does not authorize diversion or use of water from the well.

Applicant acknowledges that by accepting a drilling permit and commencing construction he accepts all risk that the well may not ultimately be approved for use.

ADDITIONAL INFORMATION REQUIREMENTS
FOR APPLICATIONS IN THE NAME OF A CORPORATION,
COMPANY, OR PARTNERSHIP

In reviewing the application for compliance with the requirements of the Department's Rules and Regulations for Water Appropriations, we have determined that the following information is required to make the Application complete for processing.

- 1) If the Application is filed in the name of a corporation, the names and addresses of its directors and officers shall be provided. If the application is filed by or in behalf of a partnership or joint venture, the application shall provide the names and addresses of all partners and shall designate the managing partner, if any. (Rule 3,3,2,1)

Because the required information does not appear in the legal notice, we are proceeding with advertising of your Application. If the required information is received within ten days of the second publication date, no additional delay should be incurred in processing.
