System Description (continued)

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

This system consists of three valves from the P/O; each controlling the irrigation, domestic, or stockwater supply of water. The domestic mainline runs straight to the owner's house while the stockwater mainline forms a T with each branch running to a trough. The irrigation mainline is a 4" buried mainline with 5 risers on it. The owner has two handlines that run off this mainline in opposite directions. Both lines have 21 rainbird heads put together. Normal operation includes operating all 21 heads at the same time. The owner also has 4 225 (approx.) gallon pressure tanks. The stockwater is for 4 horses.

D. FLOW MEASUREMENTS

☐ Additional Data Sheets Attached

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
Psi gauge						
* Pitot tube						

2. Measurements:

Using the psi gauge & pitot tube, the average pressure at the nozzle heads was 65 psi. All the heads were Rainbird WS 30 with 9/64" diameters.

Using Table 9 in App. A of field exam handbook, 9/64" diameter with 65 psi corresponds to 4.76 gpm. 21 sprinklers x 4.76 gpm = $\frac{100 \text{ gpm}}{448.8 \text{ gpm}} = .22 \text{ cfs}$

E. FLOW CALCULATIONS

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = (5.0)(4.0) = 20.0 \text{ cfa}$

$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = (.22)(214)(1.9835) = 94.5 \text{ cfa}$

$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 20.0 \text{ cfa}$

2. Volume Calculations for Other Uses:

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Legal limit	.10 (cfs)	Legal limit	20.0 cfs
Exam fee paid up to	.20	Capacity of system	94.5 cfs
Found during exam	.22	using the div rate found during exam	

No Overlap.

The owner also had a sprinkler system for his lawn that was tied into the domestic line.

With only 4 horses, I can only recommend .01 cfs for stockwater. The owner's pressure gauge was about 80 psi when both lines were running. Unfortunately, the owner did not know what the static water level was and there was no well log available on this permit.

I recommend the beneficial amounts described in Section I of this report.

I. RECOMMENDATIONS**1. Recommended Amounts**

PROOF DUE NOTICE

RE: PERMIT NO. 36-08522

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

RE: PERMIT NO. P36-08522

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

RE: SWAN FALLS PROCESSING
APPLICATION NO.S 36-8535, 36-8537, & 36-8522

DATE: 5-18-90

Three separate applicants who have filed applications which are identified by the numbers above have requested that these filings be processed out of sequence. The applicants claim in each case that the development represented by the applications were developed prior to October of 1984. Each application contains a domestic component and irrigation component of 4 to 5 acres.

In reviewing the applications, I believe there is sufficient evidence showing irrigation of the lands prior to October, 1984. I therefore recommend that the applications may be processed out of sequence. Due to the late filing dates though, trust conditions are applicable to each of these filings. Advertising will be completed by the state office.

Re: Application for Permit No. 36-08522

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

Because your application claims development prior to October 1, 1984, advertising and processing will occur at our State Office. Before we can forward your application, we need the following additional information: evidence of development prior to October 1, 1984 such as ASCS area photos predating 1984 with a signed statement from an ASCS agent or power bills predated October 1, 1984 for meter specifically servicing pump and/or any other convincing evidence.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Douglas Jones, E. I. T.
