INITIAL CLASSIFICATION

The following described lands have been examined pursuant to petitions for classification under the Desert Land Act.

These lands are hereby classified as suitable for agricultural development by desert land entry under the Desert Land Act, 43 CFR, Subpart 2220.

T. 6 S., R. 24 E., Boise Mer.
Sec. 34, SW $\frac{1}{4}$, W $\frac{1}{2}$ SW $\frac{1}{4}$, S $\frac{1}{2}$ SW $\frac{1}{4}$; 280 acres

Blaine County
Shoshone District
Idaho

Reasons for Classification:

1. The anticipated income derived from crops that can be grown under proper conservation management exceeds the cost of delivering water to the land, producing the crops, and the overhead charges related to the farming operation. The lands are physically suitable or adaptable to the use or purposes for which the classification was proposed, as required in the regulations (43 CFR 2410.1-1(a)(1)).
2. A higher and better use of the land can be made with the potential use, agricultural development, than that use which is presently being utilized. With the proposed use showing economic feasibility, the criteria of considering present and potential uses of the land have been considered and complies with it (2410.1-1(a)(2)).
3. With sound acceptable management practices the land will remain in crop production for a sufficient period. As such, the land classification is consistent with Federal programs and policies to the extent that those programs and policies affect the use or disposal of the public land (2410.1-1(a)(4)).

The applicant listed will have preference if all land is POSTED to LAND OFFICE RECORDS classification:

I-2493C Irvin G. Harris
P.O. Box 278
Burley, Idaho 83318.

Land Classified on	2-9-70	CRT
	Date	Initial
Proposed Classif.	D.15	Initial
Records Posted	FEB 10 1970	S.C.M.
	of	Initial

These lands are hereby classified for sale under the Public Land Statute of September 19, 1964 (78 Stat. 993, 43 USC 1421-1427); and unsuitable for entry because the lands do not meet the requirements for entry under the Desert Land Act, 43 CFR, Subpart 2220.

T. 6 S., R. 24 E., Boise Mer.
Sec. 34, SW $\frac{1}{4}$; 100 acres

Blaine County
Shoshone District
Idaho

MICROFILMED

MAY 07 1991

Decision No. 112, 12, 13, 14

1. The anticipated income derived from crops that can be grown under proper conservation management is less than the cost of delivering water to the land, producing the crops, and is offset by charges related to farming operations under the present application. However, the 100 acre tract does contain soil suitable for agricultural crops. As indicated by the soil classification, the lands are physically suitable or adaptable to the uses and purposes as required in the regulations (43 CFR 2410.1-1(a)(1)).
2. Although a higher and better use of the land can be made with the potential use, agricultural development, this cannot be obtained by classification as suitable for desert entry, due to the fact that the petition-application fails to show economic feasibility as required under the regulations. With the inclusion of this land within an existing farm operation, the potential use of the land can be attained. When considered with the present use, this potential is a better use of the land (43 CFR 2410.1-1(a)(2)).
3. By disposal of the land by means of public sale, the classification would be consistent with Federal programs and policies, and would have no adverse effect by being developed for agricultural purposes (43 CFR 2410.1-1(a)(4)).

No preference applicant is established through this decision; and the following petition-application is denied:

I-016966 ✓ Earl W. Frost
190 Ash Street
P.O. Box 70
Kimberly, Idaho 83341

Supporting Statements:

1. The soil capability classification classes within each application are listed below:

<u>Serial Number</u>	<u>Class Use</u>	<u>Class Title</u>
I-016966 ✓	--	154 acres
T-2498 ✓	36 acres	230 acres.

The recommended rotations for these soils, which are mainly Minidoka silt loam, require that soil building crops be grown 50% and 60% of the time on Class IIc and IIIc soils, respectively. Row crops can be grown the remaining portion of the rotation. Soils in the latter classification require careful management to protect the land from erosion.

2. The only available source of irrigation water is subterranean water at a depth of at least 275 feet.

MICROFILMED

MAY 07 1991

Y-016966

I-2498

3. Economic analyses of the proposal have been made, based upon:

- a) Proper crop rotation by the soil quality,
and
- b) Anticipated irrigation and other costs based upon the proposed plan of development.

The analyses indicate that application I-2498 can be expected to have a positive residual and I-016966 a negative residual.

BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF PERMIT NO.)
36-08432 IN THE NAME OF)
HOLLY J. HIEB)

ORDER

This matter having come before the Idaho Department of Water Resources (department), as a result of a response by the permit holder to an order issued by the department, the department makes the following Findings of Fact, Conclusions of Law and Order:

FINDINGS OF FACT

1. On November 9, 1994, the Director of the department issued an Order for Temporary Stay of Development and Notice of Formal Proceedings (order) in connection with certain permits within the Eastern Snake River Plain Aquifer for which proof of beneficial use of water has not been filed with the department.

2. On December 5, 1994, the holder of Permit No. 36-08432 (permit) filed a response to the order with the Director in connection with Condition 2.B.1) of the order to show that the permit holder has a substantial investment in facilities to divert and beneficially use water authorized for diversion under the permit.

CONCLUSIONS OF LAW

1. The permit holder has provided sufficient evidence to demonstrate that substantial investment has been made in facilities to divert and beneficially use the water contemplated under the permit.

2. The Director should allow the permit holder to continue the development authorized by the permit.

ORDER

IT IS THEREFORE, HEREBY ORDERED that the permit holder is authorized to continue with development under terms of the existing permit.

Dated this 12TH day of DECEMBER, 1994.

R. KEITH HECINSON
Director

DEC 29 1994

CERTIFICATE OF MAILING

I HEREBY CERTIFY that on this 14th day of December, 1994, I mailed a true and correct copy, postage prepaid, of the foregoing **ORDER** to the following:

Holly J. Heib
Rt. 2 Box 474B
Rupert, ID 83350

JULIE L. YARBROUGH
Senior Secretary

DEC 29 1994

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO

IN THE MATTER OF APPROVED PERMITS)
FOR THE APPROPRIATION OF GROUND)
WATER FROM THE EASTERN SNAKE RIVER)
PLAIN AQUIFER FOR WHICH PROOF OF)
BENEFICIAL USE HAS NOT BEEN)
SUBMITTED AND IS NOT PAST DUE)

**ORDER FOR TEMPORARY
STAY OF DEVELOPMENT AND
NOTICE OF FORMAL PROCEEDINGS**

The Director of the Idaho Department of Water Resources (Director), having responsibility for the administration of the appropriation of the water of the state of Idaho, the protection of rights to the use of water within the state, the protection of the public interest in the waters of the state and the conservation of the water resources of the state enters the following Findings of Fact, Conclusions of Law and Order for temporary stay; and provides the following notice of formal proceedings:

FINDING OF FACTS

1. On May 15, 1992, the Director issued an order establishing a moratorium on the processing and approval of applications for permit to appropriate water from all surface and ground water sources upstream from the USGS Gauge on the Snake River near Weiser, Idaho. On April 30, 1993, the Director issued an Amended Moratorium Order covering the Eastern Snake River Plain Aquifer. The 1994 session of the Idaho Legislature enacted section 42-1806, Idaho Code, requiring that the moratorium relating to the the Eastern Snake River Plain area shall continue in effect until December 31, 1997.

2. The state of Idaho has experienced seven (7) recent years of drought conditions resulting in lowered ground water levels and decreased discharge from surface water sources. The Idaho Legislature has authorized a study to examine the implications of these changes and the relationships between surface and ground water resources. The study is expected to be completed in approximately two (2) years.

3. Delivery calls have been made by the holders of senior-priority surface and ground water rights against the holders of junior-priority ground water rights from the Eastern Snake Plain Aquifer which could result in the curtailment of diversion and use of water under junior-priority ground water rights including rights which might otherwise be developed under permits which are the subject of this order and notice.

DEC 29 1994

CONCLUSIONS OF LAW

1. Section 42-1805, Idaho Code, provides in part as follows:

In addition to other duties prescribed by law, the director of the department of water resources shall have the following powers and duties:

...

(7) After notice, to suspend the issuance or further action on permits or applications as necessary to protect existing vested water rights or to ensure compliance with the provisions of chapter 2, title 42, Idaho Code, or to prevent violation of minimum flow provisions of the state water plan.

2. Water Appropriation Rule 55.02. of the Department of Water Resources (IDAPA 37.03.08055.02) provides as follows:

02. PERMITS

a. To the extent a permit has not been developed, the director may cancel, or modify permits for which proof of beneficial use has not been submitted in a designated geographical area as an extension of Rule 55.01.

b. Notice of the director's action to cancel or modify permits shall be by:

i. Summary Order served by certified mail upon the affected permit holders in the designated area.

ii. Publication of the order for three (3) consecutive weeks in a newspaper or newspapers of general circulation in the area.

c. Objections to the director's action shall be considered under the department's adopted rules of procedure and applicable law.

3. Rule of Procedure 104 of the Department of Water Resources (IDAPA 37.01.01104) provides in part as follows:

Formal proceedings may be initiated by a document from the agency informing the party(ies) that the agency has reached an informal determination that will become final in the absence of further action by the person to whom the correspondence is addressed, provided that the document complies with the requirements of Rules 210 through 280.

4. Protection of prior rights to the diversion and use of surface and ground water of the Eastern Snake River Plain Aquifer

DEC 29 1994

and the Snake River may require that the further development of water under existing undeveloped permits be suspended indefinitely to assure that the effects and conditions caused by drought, changes in irrigation practices and resulting aquifer recharge, and diversion and use of ground water from the aquifer under prior established water rights are properly evaluated.

5. Section 42-204, Idaho Code, provides in part as follows:

Every holder of a permit which shall be issued under the terms and conditions of an application filed hereafter appropriating twenty-five (25) cubic feet or less per second must, within one (1) year from the date upon which said permit issues from the office of the department of water resources, commence the excavation or construction of the works by which he intends to divert the water, and must prosecute the work diligently and uninterruptedly to completion, unless temporarily interrupted through no fault of the holder of such permit by circumstances, over which he has no control.

ORDER

IT IS THEREFORE, HEREBY ORDERED as follows:

1. The owners of all permits to appropriate ground water within the boundaries of the Eastern Snake Plain Aquifer, as that area is defined by Rule 50 of the rules for Conjunctive Management of Surface and Ground Water Resources (IDAPA 37.03.11), shall, effective immediately upon receipt of this order, temporarily stop further development under the permit until the Director authorizes further development.

2. The owners of all permits for appropriation of ground water within the boundaries of the Eastern Snake River Plain Aquifer shall on or before February 1, 1995, either:

A. File proof of beneficial use to cover the extent of diversion and beneficial use of water that has been accomplished prior to receipt of this order; or

B. File a response with the Director in this proceeding to satisfy the requirements of either subparagraph 1) or 2) below:

1) Document with supporting information that a "substantial investment" has been made, prior to receipt of this order, in facilities to divert and beneficially use water under the permit that merits the granting of additional time to complete all or part of the project. Substantial investment means an actual expenditure or written commitment for development of the project which meets the following requirements:

DEC 29 1994

- a) The actual expenditure or written commitment for the diversion and related equipment must equal or exceed the amount of fifteen thousand dollars (\$15,000) or exceed twenty five (25) percent of the estimated cost of the system for diverting and beneficially using the water, whichever is less; and
- b) The actual expenditure or written commitment must have been made before receipt of this order.

2) Request an indefinite stay in the development period for the project, or any part of the project for which a substantial investment has not been made, until the conditions that resulted in this order have been alleviated if such should ever occur. Upon approval of any such stay, no further development is to occur until such time as the department has issued an extension of time setting a date for completion of the project.

3. Failure to submit either proof of beneficial use or a satisfactory response shall result in cancellation of the permit without further notice.

4. Before receiving approval for either additional time to complete a project under subparagraph 2.B.1) or a stay under subparagraph 2.B.2) above, the owner of the permit shall provide information to demonstrate compliance with the provisions of Sections 42-204, Idaho Code, with respect to commencing and diligently proceeding to develop the project authorized under the permit.

5. This order does not prevent the Director from reviewing continued development of a permit on a case-by-case basis if,

a. The Director determines that protection and furtherance of the public interest justifies continued development of a permit; or

b. The Director determines that continued development and use of water will have no effect on prior water rights because of its location, insignificant consumption of water or mitigation provided by the permit holder to offset injury to other rights.

Dated this 9TH day of NOVEMBER, 1994.

R. KEITH MCGINNISON

DEPARTMENT OF WATER RESOURCES

REQUEST FOR EXTENSION OF TIME

TO PROVIDE ADDITIONAL TIME IN WHICH TO SUBMIT PROOF OF
BENEFICIAL USE FOR A WATER RIGHT PERMIT

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time in which to complete development of water right under the provisions of Section 42-204, Idaho Code.

Permit No. 36-08432
Name(s) of Permit Holder: Holly J. Hieb
Mailing Address: Rt. 2, Box 474 B, Rupert ID, 83350
Date Proof is Due May 2, 1994 Telephone No. 438-2100

Describe what work has been completed toward the development of this water right:

(This must be filled out! If no work has been completed, show "none".)

Well is drilled, pump is purchased, but not installed and some sprinkler equipment is purchased

Costing \$ 30,000

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

Permit was just recently transferred to the present permit holder (Feb. 1994). Present permit holder has not had sufficient time to complete development.

Permit holder(s) request an extension to May 2, 1996

FEE: \$15.00

(Signature)*

*If other than permit holder, Power of Attorney must be supplied.

JUN 10 1994

ACTION OF THE DEPARTMENT OF WATER RESOURCES

IT IS HEREBY ORDERED that the above request for extension of time be APPROVED and the time within which to submit proof of beneficial use is extended to May 2, 1996.

IT IS FURTHER HEREBY ORDERED that the permit be reinstated and the priority advanced to July 6, 1989.

Total number of acres irrigated: 320

CONDITIONS/REMARKS:

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before **May 2, 1994**.
2. Subject to all prior water rights.
3. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
4. Prior to the diversion of water under this permit a flow measurement port or other device as specified by the Department shall be installed to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.
5. Permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
6. Any license issued by IDWR pursuant to the permit or portion thereof for the use of trust water is subject to a term review of 20 years after the date of this approval to determine availability of water for the use and to re-evaluate the public interest at the end of the term.
7. Diversion and use of water under this permit is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.

PROOF ACKNOWLEDGEMENT LETTER

RE: PERMIT NO. 36-08432

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that Section 42-248, Idaho Code, which became affective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner. Failure to maintain current records with the department could result in the assessment of a monetary penalty.

If you have questions concerning the field examination, contact the **SOUTHERN** Regional Office in Twin Falls, at (208)736-3033.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

RE: Water Right No. 36-08432

Dear Permit Holder:

I am in receipt of the Proof of Beneficial Use form submitted in connection with the above referenced water right permit. Before I can complete my review of the proof, I need some additional information.

A drilling permit is required for all wells drilled, deepened or enlarged after July 1, 1987, (Section 42-235, Idaho Code). I have been unable to locate a drilling permit or a well log for the well drilled in 1994 in connection with this permit.

You will need to contact the well driller (Denton Drilling, Paul ID) to obtain a copy of the drilling permit and well log. If a drilling permit was never obtained you will need to apply for an after the fact permit. I have enclosed a drilling permit form and instructions for your convenience.

Please return the requested information within 30 days of receipt of this mailing. Please address your correspondence to my attention.

If you have any questions concerning this matter, please contact me at (208)327-7900.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 36-08432

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1996.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: Water Permit 36-08432

Sirs;

I recently received notice that I must file proof of beneficial use on the above-referenced permit or show cause why additional time should be granted.

I was recently granted an extension of time until May 2, 1996. I am proceeding with development of the project based on this amount of time being available.

As I have met the expense requirements outlined in your order, I request that this extension of time be honored. Bills are attached to verify my expenditures.

RE: Permit No. 36-08432

Dear Permit Holder:

Enclosed is a copy of the approved request for extension of time. The time within which to submit proof of beneficial use is extended to May 2, 1996. Since the extension was received after the proof due date, it was necessary for the department to reinstate your permit and advance your priority date to July 6, 1989.

Please note that the department has granted this extension based on due diligence. It is important that you work diligently toward the completion of this project during the construction period allowed. The department will not be able to grant additional requests based on due diligence.

If you have any questions or if I can be of any further assistance, please feel free to contact me.

Sincerely,

JULIE L. YARBROUGH

LAPSE NOTICE

RE: PERMIT NO. 36-08432

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced permit has lapsed and is of no further force nor effect. The department provided the proper forms to you in our proof due notice dated February 28, 1994. No further construction or additional development is authorized under this permit unless it is reinstated.

The permit can only be reinstated if you submit an acceptable proof of beneficial use or an acceptable request for extension of time to the department within sixty (60) days of the mailing of this lapse notice. An acceptable proof of beneficial use submittal must include the examination fee or a completed field examination report. A request for extension of time must be accompanied by a fifteen dollar (\$15) fee.

Enclosed again for your use are a proof of beneficial use form and a request for extension of time form. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation which may bring title to the water in question.

L. GLEN SAXTON
Chief, Water Allocation Bureau

PROOF DUE NOTICE

RE: PERMIT NO. 36-08432

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1994. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

Conditions of Approval:

- 26A - Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
- 01G - Prior to the diversion of water under this right a flow measurement port or other device as specified by the Department shall be installed to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.
- 046 - Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
- 051 - Any license issued by IDWR pursuant to the right or portion thereof for the use of trust water is subject to a term review of 20 years after the date of this approval to determine availability of water for the use and to re-evaluate the public interest at the end of the term.
- 052 - Diversion and use of water under this right is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.
- 053 - The Director retains jurisdiction of this right and/or subsequent license issued to change, add or remove any requirement as determined to be appropriate.
- 004 - The issuance of this right in no way grants any right-of-way or easement across the land of another.
- 03A - The rate of diversion of water for irrigation under this right and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 36-08432

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as far as possible from surface water channels and casing your well

MICROFILMED

MAY 07 1991

so that groundwater tributary to surface water flows are not diverted will reduce the potential for the watermaster to regulate your water use.

This permit authorizes the appropriation of trust water. Trust water is defined as that portion of a particular hydropower water right which exceeds certain minimum stream flows established by state action, and is held in trust by the State of Idaho for the use and benefit of the people within the state. Conditions pertaining to a term review, annual use fee and jurisdiction of the permit are trust water conditions.

Sincerely,

JIM JOHNSON
Water Rights Supervisor

MEMORANDUM

TO: FILE

FROM: TIM LUKE

RE: APP. NO. 36-8432/Trust Water Processing & Rule 4,5,3. Info

DATE: 4-9-91

The above application is a trust water filing which is being processed sequentially with other trust filings.

The applicants are acquiring most of the land under the Desert Land Entry Act. The applicants state that a well was drilled on the property some time in the 1960's under a previous DLE which had failed. Since there has been no prior development or beneficial use of the groundwater source within the past five consecutive years, the acreage under this application should be counted as trust acreage.

The applicants have submitted information required under Water Appropriation Rule 4,5,3. This information appears to be complete and is acceptable. I recommend continued processing of this trust water filing.

MICROFILMED

MAY 07 1991

Norita K. Klosterman
Application for Permit No. 36-8432
Additional Pertinent Information

Rule 4,5,3,1,1,; Not applicable.

Rule 4,5,3,1,2,; See attached plat of existing wells within radius of $\frac{1}{2}$ mile.

Rule 4,5,3,1,3,; This irrigation system will consist of a deep well(340 feet), deep well turbine pump, aluminum mainline pipe, and wheel move sprinkler lines. This project will have minimal impact of existing water users because the area where it is located is over the Snake River Plain aquifer which is known to be a very sufficient and substantial source of water.

Rule 4,5,3,2,1,; Peak water demand will be approximately 6.4 cfs. This will be reached by running 16 lines, 32 sprinkler heads per line, for a total of 512 heads each discharging 5.63 gpm. Average water demand will be the same 6.4 cfs because at almost all times all lines will be running if the pump is running in order to maximize efficiency. Projected annual volume of water used will be 3 acre-feet per acre. This amount is known to be the requirements in a typical potato-sugar beet-grain rotation in this area.

Rule 4,5,3,2,2,; The Snake River Plain aquifer is a deep unconfined aquifer, known to produce abundant amounts of excellent quality water. The depth to water in the general area of this project is 300 feet. Yields from wells within this aquifer are excellent with very little drawdown in most years.

Rule 4,5,3,3,1,; Of the 320 acres of land to be irrigated under this application 280 acres consist of a Desert Land Entry filing, which has been classified by the Bureau of Land Management as suitable for agriculture. This D.L.E. application is in the final stages of processing and at the present time is pending allowance, awaiting approval of a water permit. The remaining 40 acres described as the SE $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 34, is owned by a private individual. Contact has been made with this individual as to the possibility of leasing this land for irrigation and farming. Initial response was favorable and a lease arrangement seems probable. No further verbal agreements or written agreements have been made at this time with this individual.

Rule 4,5,3,3,2,; See attached copy of Desert Land Entry application and Notice of Classification issued by B.L.M.

Rule 4,5,3,4,1,; Applicant, Norita K. Klosterman, does not possess sufficient financial resources for the development of this project, however a financial commitment for this development has been obtained from Kent L. Klosterman. See attached financial commitment.

MICROFILMED

MAY 07 1991

Rule 4,5,3,4,2,; Cost estimates for the construction of this project are as follows;

Well construction	N/A*
Turbine pump, column, shaft	43,550.00
Powerline construction($\frac{1}{4}$ mile)	11,800.00
Aluminum mainline(10",8",6", 1 mile)	20,600.00
Wheelmove sprinkler lines(16, $\frac{1}{4}$ mile)	91,200.00

Total project costs 167,150.00

*A well is already in place on this D.L.E. from several years ago on a previous D.L.E. that never came to patent. There-
no well construction costs.

Rule 4,5,3,5,1,; Applicant, Norita K. Klosterman, has no reason to believe that this proposed project may be of any concern to any local individuals, governments, tribal reservations, irrigation districts, State Fish and Game Department, or State Health and Welfare Department. The aquifer located under this proposed project is a very substantial one and affects on other individuals and entities is believed will be minimal. This proposed project is not located within an irrigation district, canal company, or tribal reservation.

1. Name (first, middle initial, last)

Klosterman, Norita K.

Address (include zip code)

Box 542, Paul Idaho 83347

hereby applies to enter, under the Desert Land Act for the purpose of reclaiming the lands by permanent irrigation and cultivation within four (4) years from allowance of this application, the public lands described as follows:

TOWNSHIP	RANGE	MERIDIAN	SECTION	SUBDIVISION
T6S	24E	EAST BOISE MERIDIAN	34 34 34	SW 1/4 W 1/2, SE 1/4 NE 1/4, SE 1/4
State of Idaho			containing a total of 280 acres	

2. Enclose filing fee of \$15 plus advance payment of 25¢ per acre, or fraction thereof \$ 70.⁰⁰
Total \$ 85.⁰⁰

3a. Are you 21 years of age or older? ☒ Yes ☐ No

b. Of what State are you a bona fide resident? Idaho

c. Are you a ☒ citizen ☒ native born ☐ naturalized?

d. If naturalized give: Date _____ in the Court of _____
in (city and state)

e. If not a citizen, have you filed a Declaration of Intention to become a citizen of the United States?
☐ Yes ☐ No (If "yes," attach full details)

f. Are you an employee, the spouse, or an agent of an employee of the Department of the Interior? ☐ Yes ☒ No

4a. Have you made any other application under the Desert Land Act? ☐ Yes ☒ No (If "yes," give office and serial number)

b. Have you ever received by assignment any lands under the Desert Land Act? ☐ Yes ☒ No (If "yes," give office and serial number)

c. Have you entered, acquired title, or are you now claiming an entry under any of the nonmineral public land laws since August 30, 1890? ☐ Yes ☒ No (If "yes," state total number of acres)

MAY 07 1991

5. Have you made a personal on-the-ground examination of every legal subdivision of the above described land?
☒ Yes ☐ No

6a. Have you, or to your knowledge has any other person, ever worked any of the subdivision for minerals?

☐ Yes ☒ No (If "yes," give details)

b. Are these lands within any mining claim or other claim of record under the United States mining laws or the mining laws of the State? ☐ Yes ☒ No (If "yes," give details)

c. Do you know of any vein or lode of quartz or other rocks in place, bearing gold, silver, cinnabar, lead, tin, or copper, or any deposit of coal, placer deposits, other valuable mineral deposits, salt deposit, or salt springs? ☐ Yes ☒ No (If "yes," specify)

7a. Is this application for lands that will produce cultivated crops without application of water for irrigation?

☐ Yes ☒ No

b. Do the lands in their natural state produce enough native grass for cutting of hay? ☐ Yes ☒ No

c. Are the lands applied for occupied or improved by yourself or any other person, association, or corporation?

☐ Yes ☒ No (If "yes," specify)

8. Are the lands applied for irrigated or watered, or overflowed at any season of the year?

☐ Yes ☒ No (If "yes," specify)

9. Show in the chart below the soil characteristics of each subdivision (see specific instructions)

a. Total acreage irrigable		240
b. Type of crop to be grown	POTATOES	~~240~~ 80
	SUGAR BEETS	80
	MALT BARLEY	80
c. Water requirements per acre (state whether in miners inches, gallon/minute, or cubic feet/second)		
2 acre feet per acre per year		
d. Source of water (e.g., well, river, irrigation district, water company; give name of organization)		
drilled well		
e. Well data:		
(1) Depth of static water	280	feet
(2) Diameter	16"	inches
(3) Completed cost	8000 ⁰⁰	dollars
(4) Pump requirement	300 horsepower	horsepower
(5) Type of pump	electric turbine	
(6) Cost of pump	32,000 ⁰⁰	dollars
f. Cost of sprinkler system (mainlines, laterals, heads, etc.)	76,000 ⁰⁰	dollars
g. Costs of levelling, ditches, and canals	none	dollars
h. Costs of other installations (e.g., river pump stations, penstocks)	none	dollars
11. Attach a complete plan of irrigation that shows at least the following:		
a. Map showing location of lands applied for by legal description, and an accurate detailed diagram of the entire proposed irrigation system to be used in the permanent reclamation and production of agricultural crops in this proposed entry.		
b. Topography, shown by contour interval of 10 feet or less, if a gravity irrigation system is planned.		
c. Location and source of permanent water supply, including the type, size, dimensions, and location of all facilities for transporting the water from its source to the lands, such as, river pump stations, penstocks, pipelines, holding ponds, etc.		
d. Location, type, size, and gradient in percent, of any water distribution ditches and laterals necessary to irrigate all irrigable portions of each legal subdivision adequately.		
e. Location, type, size, and dimensions of all other installations necessary for the irrigation of the lands, such as, sprinkler systems, mainlines, etc.		
12a. Is there adequate water supply of suitable quality available to you for the irrigation of all the irrigable portions of the lands applied for? ☒ Yes ☐ No		
b. Have you proceeded as far as possible toward acquiring by appropriation, purchase, or contract, a right to the permanent use of sufficient water to irrigate and reclaim permanently all of the irrigable portions of each of the legal subdivisions applied for? ☒ Yes ☐ No (If "yes," you must present as evidence and make a part of this application copies of any commitments you may have, which show the legal source of your proposed water supply.)		

13a. Is reclamation and permanent cultivation of the lands in this application economically sound? ☒ Yes ☐ No

b. Complete and make a part of this application an estimated farm budget showing annual costs and returns that would be involved in the permanent reclamation and cultivation of the lands in this application. Include at least the following items:

Estimated Annual Production Costs:	
Farm automobiles and trucks*	\$ 17,500 ⁰⁰
Machinery and tractors*	21,300 ⁰⁰
Irrigation system*	20,650 ⁰⁰
Farm buildings, fences, and other improvements in operation of farm, not including irrigation system and residence*	6,000 ⁰⁰
Seed, fertilizer, herbicides, insecticides	40,580 ⁰⁰
Water costs	10,800 ⁰⁰
Cash wages to hired labor	11,900 ⁰⁰
Interest on borrowed money (such as short term or operational loans)	12,220 ⁰⁰
Taxes (personal such as on machinery and equipment)	3,000 ⁰⁰
Cost of marketing (trucking, storage, treatment, etc.)	5,000 ⁰⁰

APPENDIX PAGE

INITIAL CLASSIFICATION DECISION

The following described lands have been examined pursuant to petitions for classification under the Desert Land Act.

These lands are hereby classified as suitable for agricultural development by desert land entry under the Desert Land Act, 43 CFR, Subpart 2226:

N. 6 S., E. 24 E., Boise Mer.
Sec. 34, SW $\frac{1}{4}$, NW $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$; 280 acres

Hinidoka County
Shoshone District
Idaho

Reasons for Classification:

1. The anticipated income derived from crops that can be grown under proper conservation management exceeds the cost of delivering water to the land, producing the crops, and the overhead charges related to the farming operation. The lands are physically suitable or adaptable to the use or purposes for which the classification was proposed, as required in the regulations (2410.1-1(a)(1)).
2. A higher and better use of the land can be made with the potential use, agricultural development, than that use which is presently being utilized. With the proposed use showing economic feasibility, the criteria of considering present and potential uses of the land have been considered and complies with it (2410.1-1(a)(2)).
3. With sound acceptable management practices the land will remain in crop production for a sufficient period. As such, the land classification is consistent with Federal programs and policies to the extent that those programs and policies affect the use or disposal of the public land (2410.1-1(a)(4)).

The applicant listed will have preference if all classification:

I-2493 C Irvin C. Harris
P.O. Box 278
Burley, Idaho 83318.

POSTED LAND OFFICE RECORDS	
Land Classified on <u>2-9-70</u>	<u>CRT</u> Date Initial
Proposed Classif. _____	_____ Date Initial
Records Posted <u>FEB 10 1970</u>	<u>SCM</u> Initial

These lands are hereby classified for sale under the Public Land Statute of September 19, 1964 (78 Stat. 933, 43 USC 1421-1427); and unsuitable for desert entry because the lands do not meet the requirements for entry under the Desert Land Act 43 CFR, Subpart 2226:

T. 6 S., E. 24 E., Boise Mer.
Sec. 34, NW $\frac{1}{4}$; 100 acres

Hinidoka County
Shoshone District
Idaho

RECORDED

MAY 27 1991

CLASS. C
2-31 C

1. 100 acre tract

1. The anticipated income derived from crops that can be grown under proper conservation management is less than the cost of delivering water to the land, producing the crops, and the overhead charges related to farming operations under the present application. However, the 100 acre tract does contain soil suitable for agricultural crops. As indicated by the soil classification, the lands are physically suitable or adaptable to the use of purposes as required in the regulations (43 CFR 2410.1-1(a)(1)).
2. Although a higher and better use of the land can be made with the potential use, agricultural development, this cannot be obtained by classification as suitable for desert entry, due to the fact that the petition-application fails to show economic feasibility as required under the regulations. With the inclusion of this land within an existing farm operation, the potential use of the land can be attained. When considered with the present use, this potential is a better use of the land (43 CFR 2410.1-1(a)(2)).
3. By disposal of the land by means of public sale, the classification would be consistent with Federal programs and policies, and would have no adverse effect by being developed for agricultural purposes (43 CFR 2410.1-1(a)(4)).

No preference applicant is established through this decision; and the following petition-application is denied:

I-016936 ✓ Earl W. Frost
190 Ash Street
P.O. Box 70
Kimberly, Idaho 83341.

Supporting Statements:

1. The soil capability classification classes within each application are listed below:

<u>Serial Number</u>	<u>Class III</u>	<u>Class IIIc</u>
I-016936 C	--	154 acres
I-2498 C	36 acres	230 acres.

The recommended rotations for these soils, which are mainly Minidoka silt loam, require that soil building crops be grown 50% and 60% of the time on Class IIIc and IIIc soils, respectively. Row crops can be grown the remaining portion of the rotation. Soils in the latter classification require careful management to protect the land from erosion.

2. The only available source of irrigation water is subterranean water at a depth of at least 275 feet.

MICROFILM

MAY 07 1961

I-016966 C
I-2498 C

Economic analyses of the proposal have been made, based upon:

- a) Proper crop rotation by the soil quality,
and
- b) Anticipated irrigation and other costs based upon the proposed plan of development.

The analyses indicate that application I-2498 can be expected to have a positive residual and I-016966 a negative residual.

Application No. 36-8432

INSTRUCTIONS: IF YOU ARE NOT INTERESTED IN HAVING THE APPLICATION PROCESSED, PLEASE COMPLETE AND RETURN THE ENCLOSED WITHDRAWAL FORM.

IF YOU WISH TO HAVE THE APPLICATION PROCESSED, PLEASE ANSWER THE FOLLOWING QUESTIONS AS THOROUGHLY AS POSSIBLE. FAILURE TO RETURN EITHER THE WITHDRAWAL FORM OR QUESTIONNAIRE IS CAUSE FOR THE DEPARTMENT TO VOID THE APPLICATION.

1a. Are you the current owner of the land or place of use described under this application? Yes _____ No X

b. If you are not the property owner, please describe the arrangement enabling you to develop the proposed project.

Desert Land Entry filing

2a. Has the source of water listed on this application been used to irrigate any of the land described under this same application prior to October 1, 1984? Yes X No _____

b. If yes, please describe the extent of development and number of acres irrigated. (Note: Uses developed after October, 1984 are considered trust water diversions and may be subject to certain conditions. You may be asked to verify uses established prior to October, 1984.)

1960's A portion of these lands were irrigated briefly in the
by another individual.

3. If you answered NO to ques #2a, please state the number of acres you have irrigated with this source after October 1, 1984. 0

4. If you have not irrigated lands under this application, please state the number of acres you plan to complete. 280

5. If the permit is a supplemental filing please identify other water rights which are used on the same land. N/A

Use the reverse side of this form if you wish to add any comments. You may mark changes on the enclosed application to designate any proposed amendments. (Note: Proposed changes which result in an expansion of use will not be considered by the department.)

I hereby assert that the responses provided above are true to the best of my knowledge. I understand that any willful misrepresentations may result in voiding of the application.

RE: APPLICATION FOR PERMIT NO. _____

Dear APPLICANT:

Due to the Swan Falls litigation, Department approval of the enclosed application may have been delayed. The Department is presently reviewing your application and may authorize the proposed development.

The purpose of this letter is to determine: (1) if you are still interested in developing the project, and (2) the extent of development, if any, that has already occurred under the application. Enclosed are two forms requesting information which will help the Department expedite the processing of the application.

1. If you have abandoned or have no interest in continuing with your plans for development of the project, please complete the enclosed withdrawal form and return it to the Department. If you request a withdrawal of the application and the application was not previously advertised, the department will refund your original filing fee.

2. If you wish to continue with your proposed development plans, or have completed all or a portion of the proposed development before October 1, 1984, then you must complete and return the enclosed questionnaire. You may use the questionnaire and enclosed application to make any comments &/or amendments concerning the application. Your completion of the questionnaire will expedite processing and help the department determine if the water diverted under the application is public water or trust water. Approved trust water applications may be subject to additional conditions.

Failure to return either of the above forms within thirty (30) days of the date of this letter is cause for the Department to void the application.

Please be further advised that if any undeveloped portion of your proposed project is greater than 200 acres, or if the application proposes diversion of more than 5.0 cfs, the department will issue a notice requesting additional information as required by Water Appropriation Rule 4,5. (copy enclosed). In particular, rules 4,5,3. through 4,5,3,5. apply to your project if it is more than 200 acres. If necessary, the rule 4,5. information notice will be sent to you after you return the questionnaire.

RECORDED

DATE: February 11, 1991

RE: APP. 36-8432/DLE STATUS

=====

On this date I spoke with Larry Lievsay from the Idaho State BLM office concerning the status of Desert Land Entry Application no. I-20387. This is the DLE application referenced on the above application.

Larry informed me that the lands under the application have been classified as suitable and that the BLM is waiting for a water right application to be approved before allowing entry to the land.

Since the lands have been classified as suitable, the department can proceed with processing of this application. Since the application is a trust water filing, we will proceed with sending the applicants a trust water questionnaire.

Norita K. Klosterman
Rt. 2 Box 474 B
Rupert, ID 83350

Re: Application for permit No. 36-08432

Dear Ms. Klosterman:

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

Because your application proposes to appropriate water which has been identified as "trust water" in the Swan Falls agreement, it will be processed under rules and regulations for water appropriation that have been adopted as required by law.

Under the rules, applications will be processed at a rate which allows development of 20,000 acres per year. The oldest applications will be processed first, provided that applicants are willing and able to proceed.

For this reason, it is not possible to estimate at this time when action will be taken on your application.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Gary Funderburg
Sr. Water Resource Agent
