RE: Water Right 36-08387

Dear Mr. & Mrs. Borchard:

On January 31, 1994, you filed with this court a *Standard Form 3 Consent to Substitution of Party* notifying the court that you had acquired the property appurtenant to water right 36-08387 from Goedhart and Goedhart.

During the process of completing the partial decrees for Basin 36, the court discovered that this water right was never reported in the form of a Director's Report. When I check with the Idaho Department of Water Resources, I was told that no claim for this water right was filed in the Snake River Basin Adjudication.

Therefore, no further action will be taken on water right 36-08387 at this time and the court file will be closed. If you need additional information regarding this water right or if you need information about filing a claim, please contact the Idaho Department of Water Resources at 208-736-3033.

Sincerely,

Gentlemen:

Re: Permit No. 36-8387

This office acknowledges receipt of the assignment conveying the above referenced permit to you. The assignment has been entered into the department's records.

Also, the department received the proof of beneficial use form. The next step is for the department to conduct the field inspection of your system to review and to confirm the extent of beneficial use being made of the water. The examiner will attempt to contact you to schedule a convenient time to conduct the examination.

Please contact the department if you have questions.

Sincerely,

RITA I. FLECK

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P36-08387

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

FROM: TIM LUKE

RE: SWAN FALLS PROCESSING

DATE: 10-27-89

This application has been forwarded to the state office by the regional office for out of sequence approval. Evidence submitted to the regional office includes a summary of past service billings to the applicant by Idaho Power Co.

A statement by the applicant on the application claims that the well had been drilled and used for irrigation of lands under application since 1972. The department's 7.5 min. 1974 orthophotoshows the land irrigated with a center pivot sprinkler system. Review of the department's 1986 remote sensing data confirms irrigation in that year as well. Furthermore, review of the water rights data base shows no other water rights appurtenant to this land (except one license for 15 acres in NESE sec. 10).

Based on the available evidence, it appears that this application may be approved out of sequence. The application however is considered a trust water diversion by reason of its late priority (i.e.; filed after 7-1-85). Trust water conditions therefore must be added to the permit. ✓

Re: Application for Permit No. 36-08387

Dear Mr. Ruffing:

On March 25, 1988, the Federal Energy Regulatory Commission (FERC) issued an order satisfying the last condition to make the Swan Falls Agreement effective. The Department is now prepared to proceed with the normal processing of your application. This process includes the preparation of a notice of the application which shall be published in the Gooding County Leader on 9/6 & 9/13/89. A period of ten days following the second publication will be allowed for the submittal of protests.

The Department wishes to know of any reason why it should not plan to process your above-referenced application. If there is a reason for not processing this particular application or you no longer have any interest in seeking a water right permit under this application, please notify the Department within ten days of the date of mailing this notice.

Additional information required before final regional review of the application includes evidence of development prior to October 1, 1984 such as ASCS area photos predating 1984 with signed statement from ASCS agent or power bills predating October 1, 1984 for meter specifically servicing well.

Please do not hesitate to contact this office if you have any questions regarding this matter.

Re: Application for permit No. 36-08387

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

Because your application proposes to appropriate water which has been identified as "trust water" in the Swan Falls agreement, it will be processed under rules and regulations for water appropriation that have been adopted as required by law.

Under the rules, applications will be processed at a rate which allows development of 20,000 acres per year. The oldest applications will be processed first, provided that applicants are willing and able to proceed.

For this reason, it is not possible to estimate at this time when action will be taken on your application.

Please feel free to contact this office if you have any questions regarding this procedure.

James E. Stanton
