

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

APPROVED

1. Name of applicant Larrey &/or Retha Anderson Phone 733-6756 or 825-5763

Post office address Route #1, Eden, ID 83325

2. Source of water supply Groundwater which is a tributary of _____

3. Location of point of diversion is SE $\frac{1}{4}$ of SE $\frac{1}{4}$ of Section 1 Township 10S

Range 18E B.M. Jerome County, additional points of diversion if any: _____

4. Water will be used for the following purposes:

* .44
Amount 0.20 cfs for Heating purposes from Jan 1 to Dec 31 (both dates inclusive)
(cfs or acre-feet per annum)

Amount *0.49 cfs for Recreation purposes from Jan 1 to Dec 31 (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

5. Total quantity to be appropriated:

a. 0.20 0.93* cubic feet per second and/or b. _____ acre-feet per annum.

6. Proposed diverting works: * Data corrected or added 10-11-83

a. Description of ditches, flumes, pumps, headgates, etc. Well & pump

b. Height of storage dam _____ feet, active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet, materials used in storage dam: _____

Period of year when water will be diverted to storage _____ to _____ inclusive.
(Month/Day) (Month/Day)

c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.

7. Time required for the completion of the works and application of the water to the proposed beneficial use is 5 years (minimum 1 year - maximum 5 years).

8. Description of proposed uses:

a. If water is not for irrigation:

(1) Give the place of use of water: SE $\frac{1}{4}$ of SE $\frac{1}{4}$ of Section 1 Township 10S

Range 18E B.M.

(2) Amount of power to be generated: _____ horsepower under _____ feet of head.

(3) List number of each kind of livestock to be watered _____

(4) Name of municipality to be served _____, or number of families to be supplied with domestic water _____.

(5) If water is to be used for other purposes describe: _____
recreation use in commercial
heating of homes, buildings; water slide, swimming pools.

b. If water is for irrigation, indicate acreage in each subdivision in the tabulation below:

[illegible]

Total number of acres to be irrigated _____

c. Describe any other water rights used for the same purposes as described above. _____

9. a. Who owns the property at the point of diversion Applicants

b. Who owns the land to be irrigated or place of use _____

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing _____

10. Remarks Present plans call for heating of 3 homes, 2 swimming pools, and a water slide. Knowledge of available water temperature is very limited in this area, so a larger than normal flow is requested in case it is needed. Also, additional non-consumptive uses may be developed if sufficient water is found.

11. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

Scale: 2 inches equal 1 mile.

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

Larry Anderson

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 36-8233, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before January 1, 19 89.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other: Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

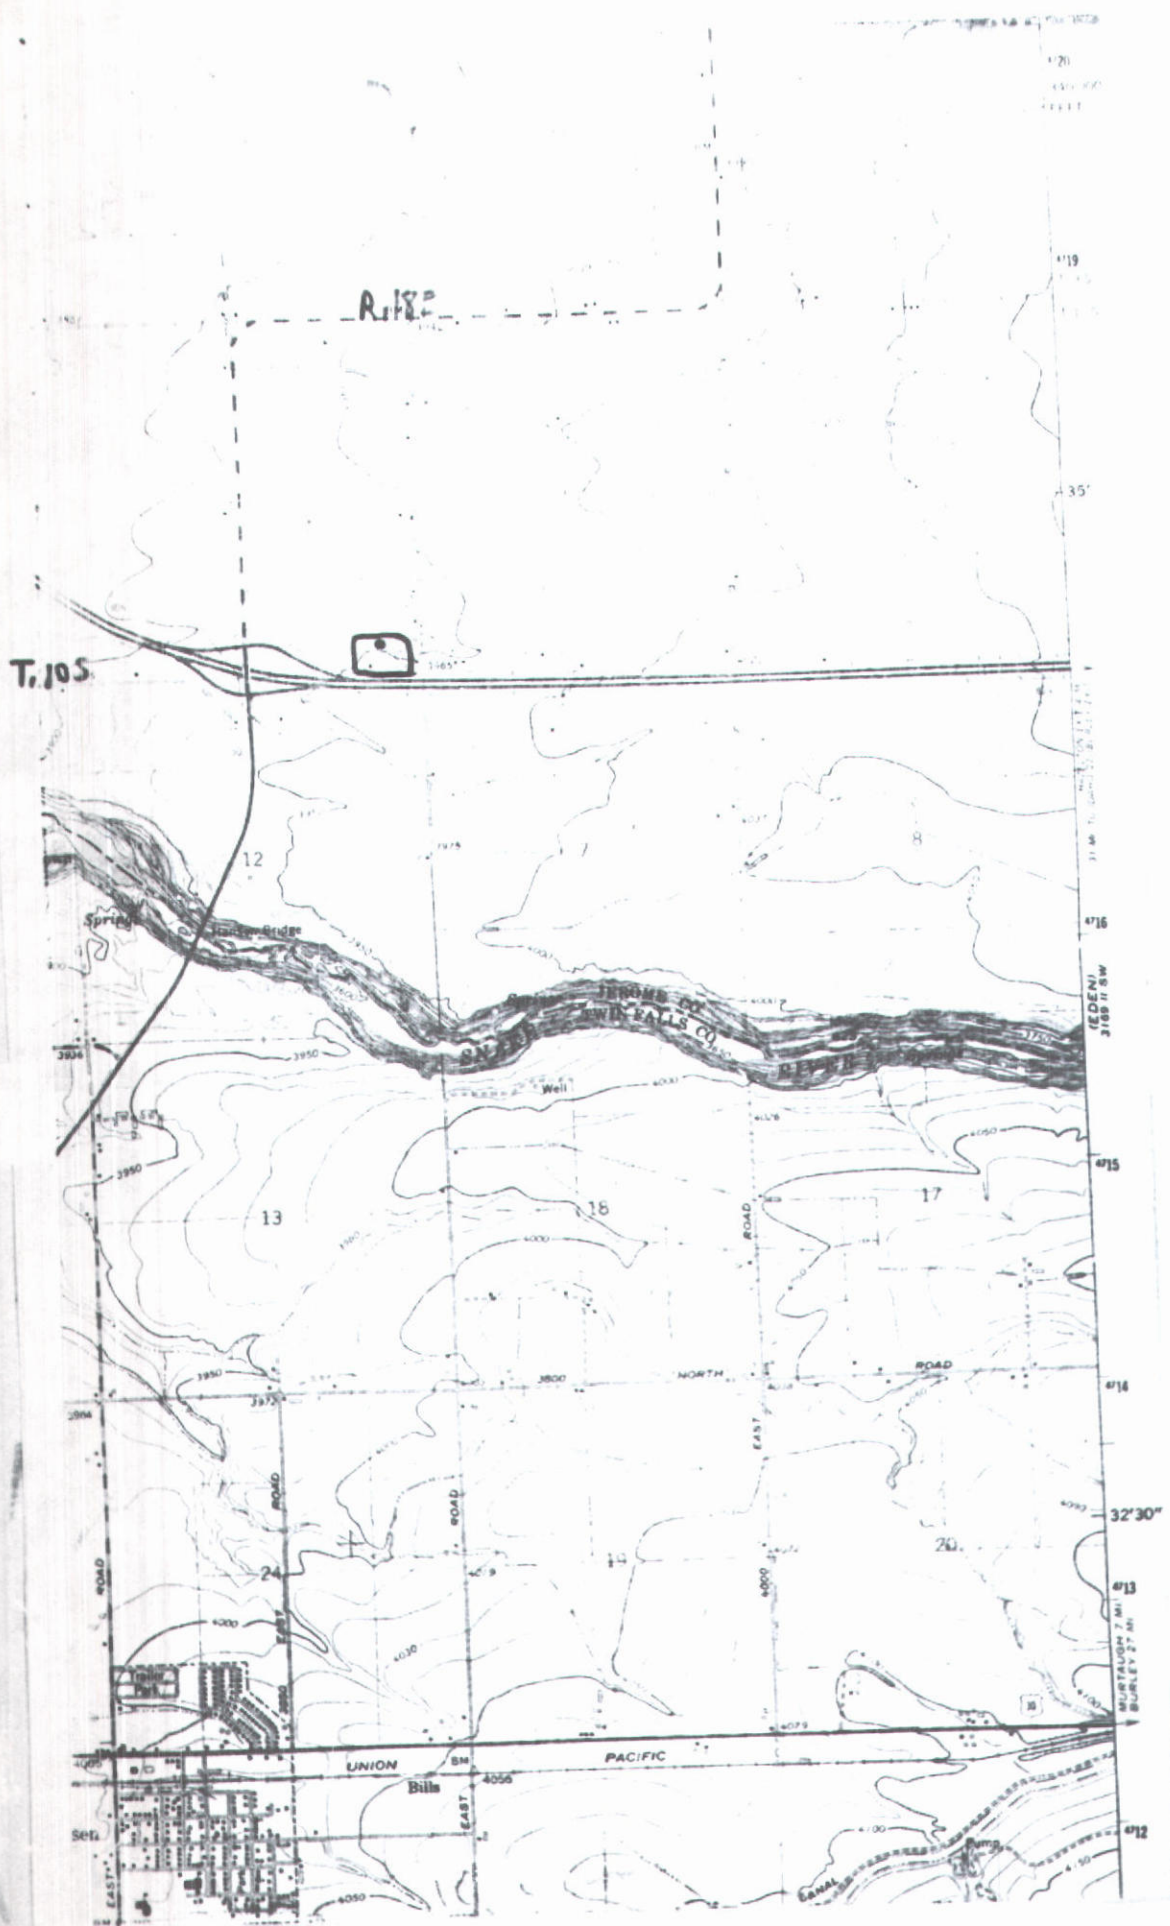

An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

Return flow if discharged to a subsurface system must be authorized by a separate injection well permit, and return flow if discharged to a surface water system shall meet Idaho Water Quality Standards.

Use of water under this permit shall be non-consumptive.

Witness my hand this 26th day of January, 1984.

L. Glen Saxton
Chief, Operations Bureau

Energy Needs - Larry Anderson

1 house hall,

3 homes, 3 trailers, 2 insulated shop buildings = 19200 sq ft at 47 Btu/sq ft = $\frac{808400}{14}$ Btu

1 greenhouse = 45 Btu/sq ft $\times$ 4000 sq ft = 180000 Btu/hr

total flow = $847000 / (500 \times 10^\circ \text{ temp change}) = \frac{198}{164} \text{ gpm} = \underline{\underline{0.99}} \text{ cfs}$

1 water slide of $\frac{25}{1200}$ cu ft volume / 2 hr recharge time = 9352 gal/hr = 156 gpm = 0.35 cfs

1 swimming pool of 3888 cu ft volume / 8 hr recharge time = 3636 gal/hr = 61 gpm = 0.14 cfs

total = $\frac{0.99}{0.99} \text{ cfs} + 0.35 \text{ cfs} + 0.14 \text{ cfs} = 0.93 \text{ cfs}$

formula used for $\Delta T = 5 - 80^\circ - 10^\circ \text{ approach temp} = 109$ where $S = 100^\circ \text{ F}$

INSTALLATION INFORMATION

CALQFLO® FLOWMETERS CF-300 Series

GENERAL

Individual meters are manufactured for use with a particular size pipe or tubing. Make certain you install the meter only on the pipe or tubing size for which it is intended.

Be sure to protect the flowmeter from impurities that will tend to accumulate in the pitot and tapered tube areas. Make the installation after the filter and before the heater in swimming pool and similar applications.

MAKING THE INSTALLATION

Be certain to install the flowmeter with at least the minimum dimensions * called for in the installation drawing. An installation with less than the required dimensions will result in improper meter operation.

At the top center of the pipe, drill a 5/8" to 11/16" diameter hole (3/4" to 13/16" hole for 3" through 8" meters). Carefully remove all burrs from inside and outside of pipe. Insert the pitot tube (with gasket in place) in the hole and tighten clamps alternately, a little at a time. **IMPORTANT:** Before tightening clamps make certain that the arrow on the meter indicates the correct direction of the flow; the flowmeter will not function properly if incorrectly positioned.

MAINTENANCE

Normally, little flowmeter maintenance is required. However, if deposits develop in the tapered tube loosen clamps and remove meter from pipe. Then remove the red cap plug and float from the tapered tube. Cleaning should be done with a swab and a mild, non-abrasive detergent solution. Should a particle become lodged in the pitot tube use small diameter wire to remove it. Insert the wire from the tapered tube side. **Do not** use a drill, it will damage the calibrated tube and cause an improper flow indication. After cleaning make certain the float is properly replaced in the tapered tube. (See the facsimile in the "Installation Drawing" Section.) Apply two wraps of teflon tape to the cap plug, and be careful not to cross thread when replacing it in the meter body.

METER PERFORMANCE:

Maximum Temperature 195°F
Maximum psi 400†

MICROFILMED

JAN 21 1992

† PRESSURE AND TEMPERATURE

Pressure and temperature limits are inversely proportional. At the maximum suggested pressure the temperature should approach 70°F; at the maximum suggested temperature the pressure should approach zero psi. We cannot guarantee our flowmeters will not be damaged either at or below the suggested limits simply because of many factors which influence meter integrity, stress resulting from meter misalignment, damage due to excessive vibration, and deterioration caused by contact with certain chemicals to name a few. These situations and others tend to reduce the strength of the materials from which the meters are manufactured.

right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

Re: Permit No. 36-8233 (Larrey and/or Retha Anderson)

Dear Mr. Anderson:

I have received your September 23, 1985 letter in connection with the above-referenced permit. A review of the file shows that submittal of proof of beneficial use to the Department is not due until January 1, 1989 for the permit. If development of the use of water is complete, you could submit the proof of beneficial use statement at any time. Enclosed is a beneficial use form for your potential use.

Upon receipt of the beneficial use statement, the Department will schedule and conduct a field examination of the system. The last document issued by the Department is a license and is issued after the field exam. It is difficult to know when an exam will be conducted since the Department has a backlog of exams to conduct.

Department records show that you have also filed Application for Permit No. 36-8232 which has been held in our Southern Regional office in Twin Falls due to the Swan Falls water right controversy. The region has advised that processing of that application can now continue due to the Swan Falls settlement negotiations.

If you have additional questions, please contact this office or our office in Twin Falls at 1041 Blue Lakes Blvd. N., telephone 734-3578.

Sincerely,

A handwritten signature in cursive script, reading "L. Glen Saxton", is written over the typed name.

Dear Mr. Clifton:

Department of Water Resources

Responding to your letter of September 11, 1985, regarding completed work on our September 11, 1985 work was started on the 11th of September, 1985. To our knowledge, the work was completed and the project is now in the hands of the appropriate authorities for review and approval.

During the time we were working on the project, we were able to complete the work on the 11th of September, 1985. The project was completed on the 11th of September, 1985. We have no other work to be done on this project at this time.

Please let us know what the next steps are in the process.

In a related matter, we have been working on the project for some time. We are currently working on the project and we are hoping to complete it by the end of the year. We are currently working on the project and we are hoping to complete it by the end of the year. We are currently working on the project and we are hoping to complete it by the end of the year.

Thank you for your letter.

Department of Water Resources

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF PERMIT NO. 36-08233	)	
	)	ORDER OF
IN THE NAME OF LARREY OR RETHA ANDERSON	)	REINSTATEMENT
	)	

This matter having come before the Idaho Department of Water Resources (Department), the Department finds as follows:

FINDINGS OF FACT

1. On January 6, 1984, the Director of the Department of Water Resources issued Permit No. 36-08233 with a condition of approval that proof of construction of works and application of water to beneficial use be submitted on or before January 1, 1989.

2. On October 31, 1988, the Department sent a proof due notice to the permit holder.

3. On January 6, 1989, the Department sent a lapse notice to the permit holder since the permit holder did not submit either proof of beneficial use or a request for extension of time to the Department.

4. On December 17, 1991, the permit holder submitted Proof of Beneficial Use to the Department.

5. Section 42-218a.2., Idaho Code, authorizes the Department to reinstate a lapsed permit, with the priority date advanced to the date that proof of beneficial use was received, upon submittal of evidence clearly establishing the extent of beneficial use prior to the proof due date and a showing of reasonable cause why the proof was submitted late.

6. The permit holder has submitted evidence to confirm that water has been put to beneficial use prior to the proof due date. Evidence includes a photo of the system taken by our field examiner during an earlier proof process in 1986 confirming that the system had been completed prior to the proof due date.

7. The permit holder has stated that he does not remember receiving the proof due notice possibly due to the large volume of mail he receives in his business.

RECEIVED
JAN 21 1992

CONCLUSIONS OF LAW

1. The permit holder has submitted proof of beneficial use along with supporting evidence which establishes that water was in fact beneficially used as identified on the permit.

2. The permit holder has shown sufficient cause why the proof of beneficial use was not submitted in a timely manner.

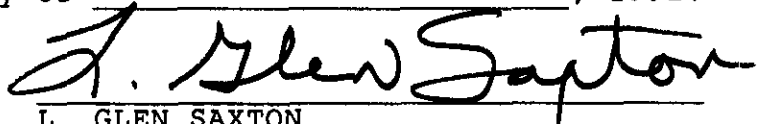

3. The permit can be reinstated with the date of priority advanced to the date proof of beneficial use was received by the Department.

ORDER

IT IS HEREBY ORDERED that Permit No. 36-08233 is reinstated.

IT IS FURTHER ORDERED that the date of priority of this permit is advanced to December 17, 1991.

Dated this 24th day of December, 1991.

L. GLEN SAXTON
Chief, Water Allocation Bureau

JAN 21 1992

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

APPROVED

1. Name of applicant Larry &/or Betha Anderson Phone 733-4756 or 825-5763

Post office address Route #1, Eden, ID 83325

2. Source of water supply Groundwater which is a tributary of "

3. Location of point of diversion is SE % of SE % of Section 1 Township 10S

Range 18E S.M. Jerome County, additional points of diversion if any:

4. Water will be used for the following purposes:

* .44
Amount 0.00 cfs for heating purposes from Jan 1 to Dec 31 (both dates inclusive)

Amount 0.43 cfs for Recreation purposes from Jan 1 to Dec 31 (both dates inclusive)

Amount for purposes from to (both dates inclusive)

Amount for purposes from to (both dates inclusive)

5. Total quantity to be appropriated:

a. 0.44 0.93 cubic feet per second and/or b. acre-feet per annum.

6. Proposed diverting works: * Data corrected or added 10-11-83 p

a. Description of ditches, flumes, pumps, headgates, etc. Well & pump

b. Height of storage dam feet, active reservoir capacity acre-feet; total reservoir capacity acre-feet, materials used in storage dam:

Period of year when water will be diverted to storage to inclusive.
(Month/Day) (Month/Day)

c. Proposed well diameter is inches; proposed depth of well is feet.

7. Time required for the completion of the works and application of the water to the proposed beneficial

use is 5 years (minimum 1 year - maximum 5 years).

8. Description of proposed uses:

a. If water is not for irrigation:

(1) Give the place of use of water: SE % of SE % of Section 1 Township 10S

Range 18E S.M.

(2) Amount of power to be generated: horsepower under feet of head.

(3) List number of each kind of livestock to be watered

(4) Name of municipality to be served , or number of families to be supplied with domestic water .

(5) If water is to be used for other purposes describe: Recreation use in commercial
heating of homes, buildings, water slide, swimming pools.

b. If water is for irrigation, indicate acreage in each subdivision in the tabulation below:

[illegible]

Total number of acres to be irrigated _____

c. Describe any other water rights used for the same purposes as described above. _____

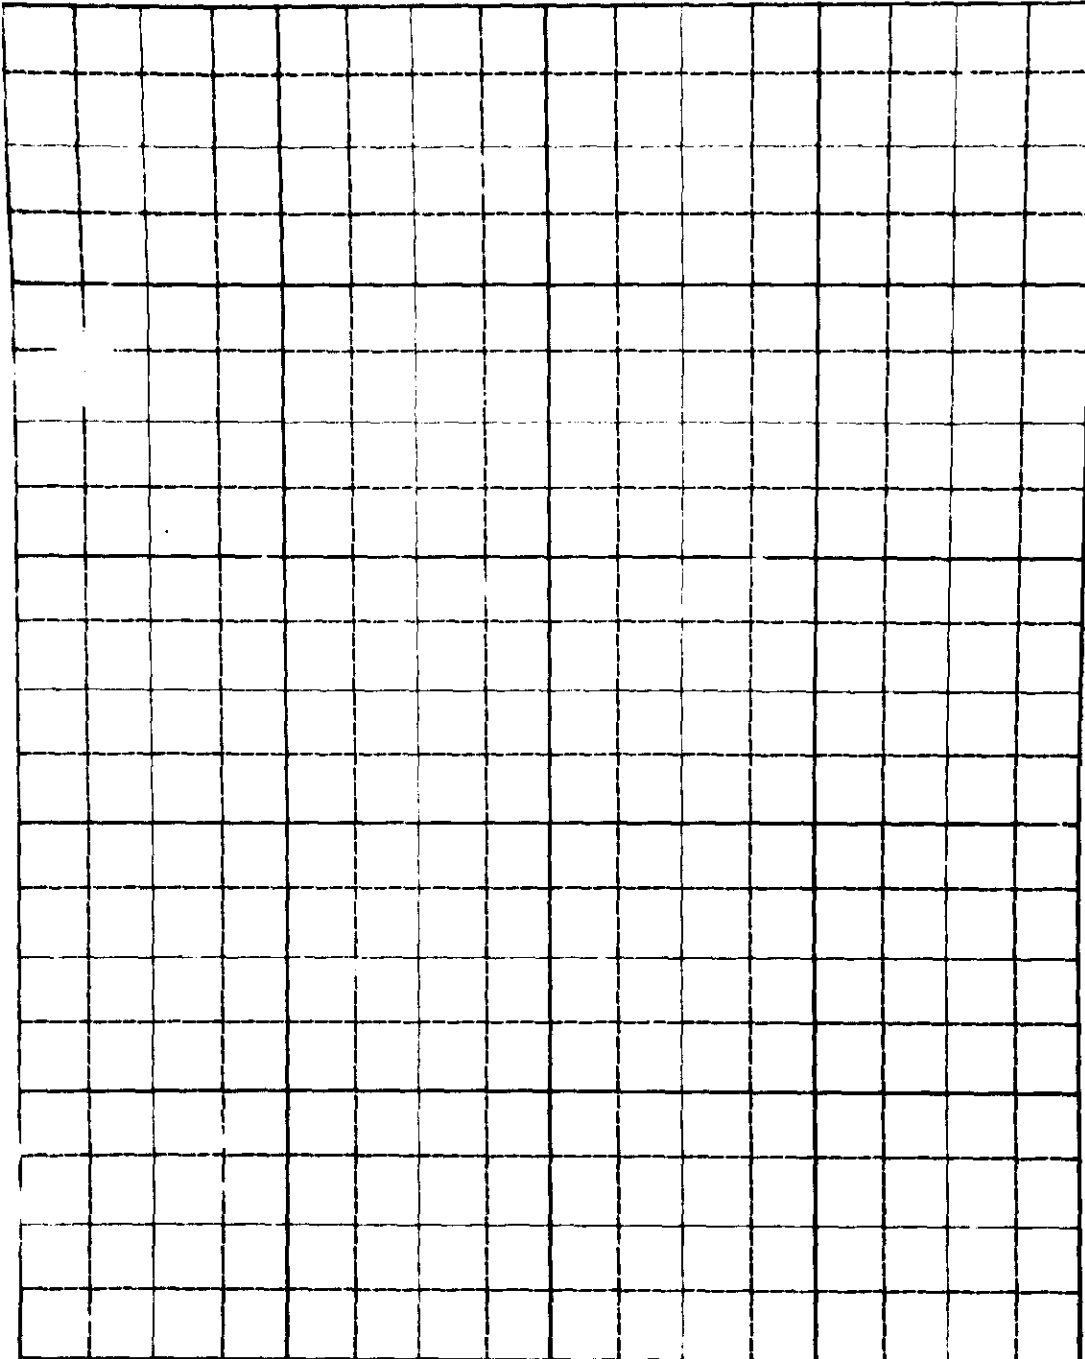

9. a. Who owns the property at the point of diversion Applicants

b. Who owns the land to be irrigated or place of use _____ "

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing

10. Remarks Present plans call for heating of 3 homes, 2 swimming pools, and a water slide. Knowledge of available water temperature is very limited in this area, so a larger than normal flow is requested in case it is needed. Also, additional non-consumptive uses may be developed if sufficient water is found.

11. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

Scale: 2 inches equal 1 mile.

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 36-8233, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before January 1, 19 89.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other: Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

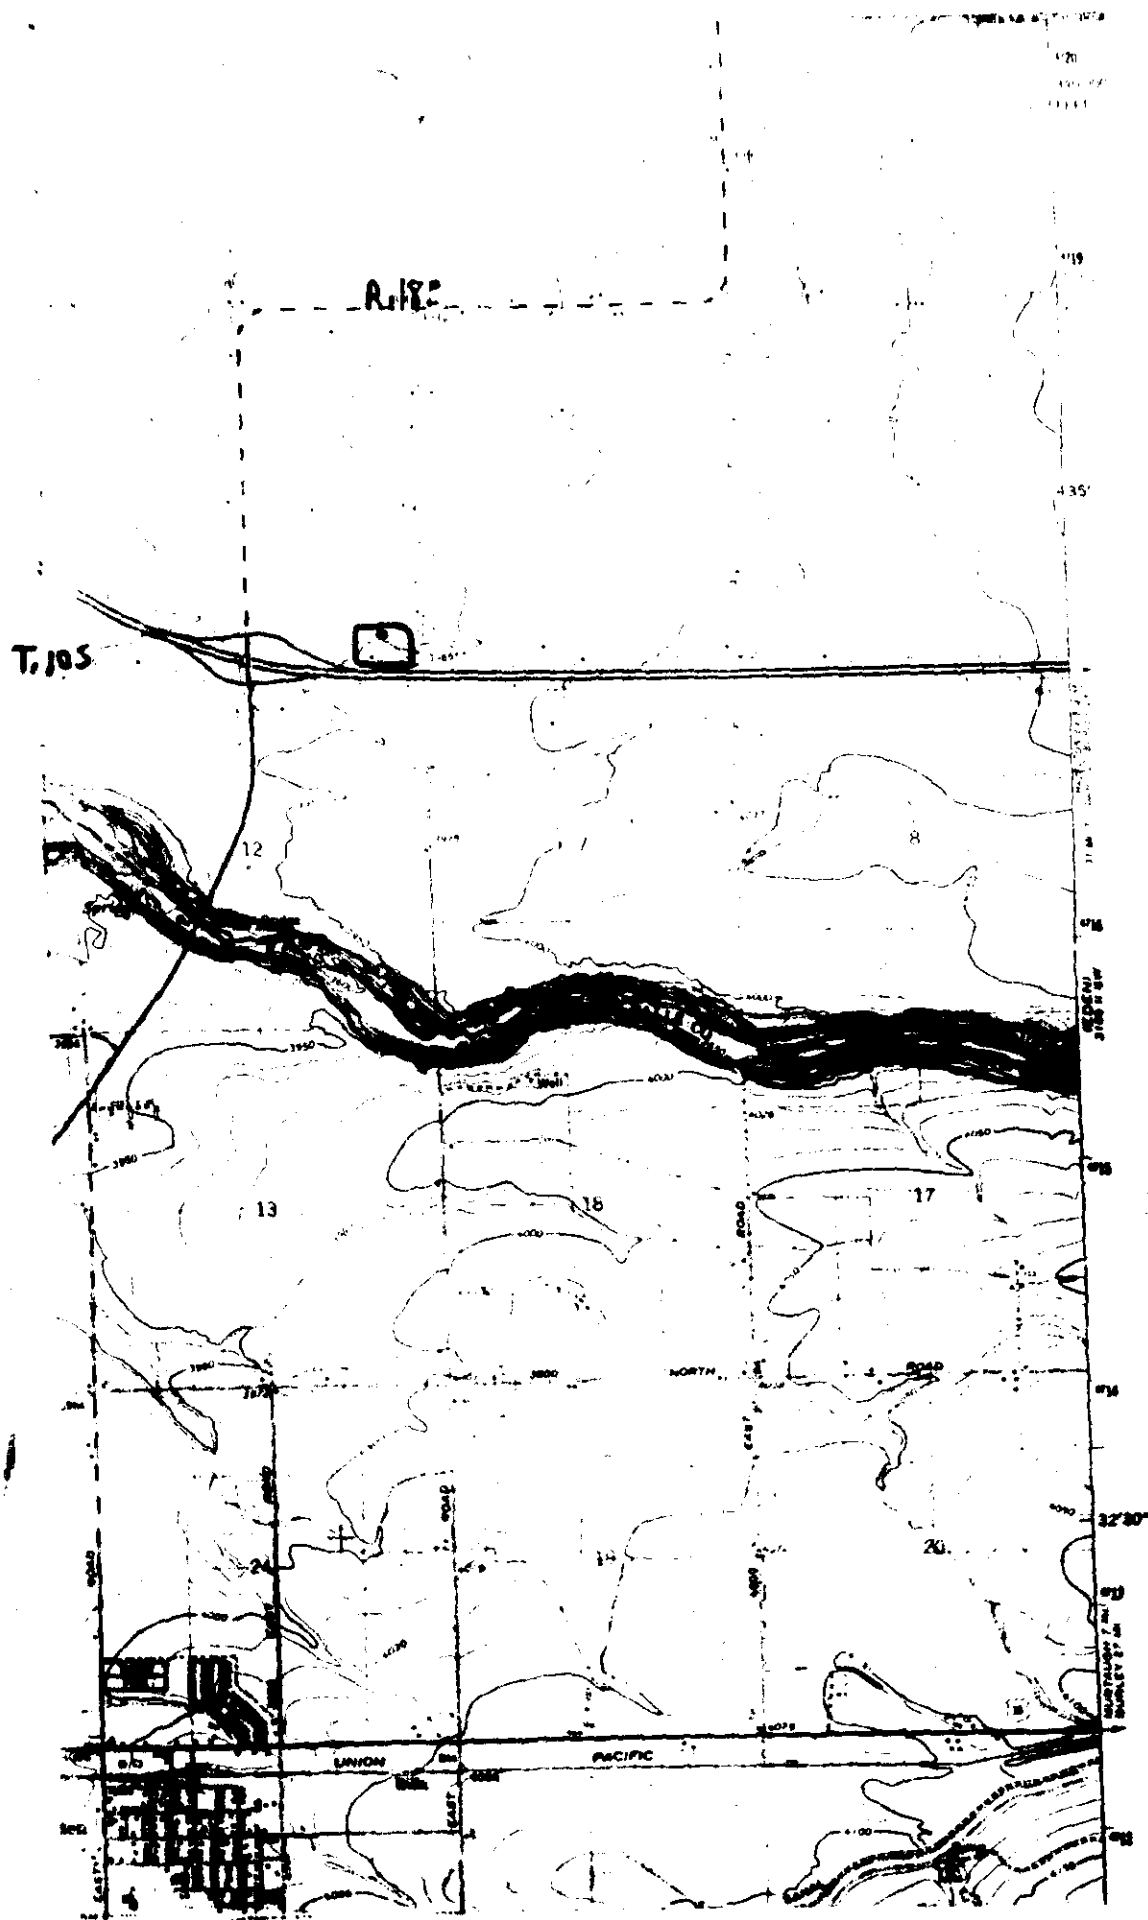

An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

Return flow if discharged to a subsurface system must be authorized by a separate injection well permit, and return flow if discharged to a surface water system shall meet Idaho Water Quality Standards.

Use of water under this permit shall be non-consumptive.

Witness my hand this 26th day of January, 1984.

A. Glen Saxton
Chief, Operations Bureau

Energy Tech - Larry Anderson

1 house hall,

3 lanes, 3 tracks, 2 insulated sleep hallways = 19200 sq ft at 47 lbs per sq ft = $\frac{902400}{4}$ lbs

1 granular = 45 lbs x 4000 sq ft = 180000 lbs/hr

total flow = $902400 / (500 \times 10^{\circ} \text{ temp drop}) = \frac{180}{100} \text{ gpm} = \frac{0.99}{100} \text{ cfs}$

1 water slab of $\frac{25}{1200}$ cu ft volume / 2 hr melting time = 9352 gal/hr = 156 gpm = 0.35 cfs

1 remaining pad of 3888 cu ft volume / 8 hr melting time = 3636 gal/hr = 61 gpm = 0.14 cfs

total = $\frac{0.99}{100} \text{ cfs} + 0.35 \text{ cfs} + 0.14 \text{ cfs} = 0.93 \text{ cfs}$

formula used for $\Delta T = 5 - 80^{\circ} - 10^{\circ} \text{ approach temp} = 109$ where $S = 100^{\circ} \text{ F}$

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 36-08233

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. Enclosed is an order advancing the priority of the permit since the proof was received after the proof due date. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls at (208)736-3033.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

DEPARTMENT OF WATER RESOURCES
PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources will consider this form as a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee or a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 36-08233 Telephone No. 733-6756

2. Name(s) of Permit Holder(s): Larry & on Rethy Anderson

3. Post Office Address: RT. 1, Eden, ID 83325

4. Source of Water: Groundwater

a. If ground water, well driller's name: Boley & Henry Date drilled: 1984-85

b. Pump horsepower: 5 Pressure (psi): 0 or 30 Dynamic pumping level (ft.): 400

5. Extent of Use:

Domestic _____ (No. of households) Irrigation _____ (No. of acres)

Stockwater _____ (No. and type of stock) Other _____

Recreation in swimming pool, hot tub, water slide. Heating of main building.

6. Total rate and/or volume for which proof is submitted 0.09 cfs _____ acre/feet

7. Refer to the approval conditions on your permit and respond accordingly:

Measuring device: Required? Yes ☒ No Installed? Yes ☒ No

OR

Flow Measurement Port: Required? Yes ☒ No Installed? ☒ Yes No

8. Fee Enclosed: \$ 50.00 (See License Examination Fee Schedule)

9. Person to contact to accompany the Department representative during the field examination:

Same Name Telephone No.

Address

10. The above information is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the state of Idaho.

INTER-DEPARTMENT MEMO --- 1

FROM Jim Stanton

DATE 12-17-91

TO Boise

SUBJECT Reinstatement of Lapsed Permit 36-08233, Larrey Anderson

Mr. Anderson originally filed proof on this permit in 1986. Terry Blau examined this system in 1987, finding recreational and some heating use at Anderson's RV Camp. Mr. Anderson told Terry that he planned additional heating use of this well, so on Terry's recommendation he withdrew the proof of use. Notice was later sent reminding Mr. Anderson of the 1-1-1989 proof due date. No proof was filed, so the permit lapsed.

Today Mr. Anderson filed late proof, stating that the same uses originally found by Terry have continued. No additional development was done. The property is being sold, so Mr. Anderson requests that the permit be reinstated as soon as possible. He did not recall receiving the proof notice, possibly due to the large volume of mail he receives in his business. I explained about loss of the original priority date in these circumstances. This appears to be just an honest mistake, as I know that he has continued to operate his RV camp all this time (although I have no personal knowledge of water use on the property). A photo of the system, taken by Terry, is attached.

INSTALLATION INFORMATION

CALQFLO® FLOWMETERS CF-300 Series

GENERAL

Individual meters are manufactured for use with a particular pipe or tubing. Make certain you install the meter only on the correct tubing size for which it is intended.

Be sure to protect the flowmeter from impurities that will tend to accumulate in the pitot and tapered tube areas. Make the installation after the filter and before the heater in swimming pool and similar applications.

MAKING THE INSTALLATION

Be certain to install the flowmeter with at least the minimum dimensions * called for in the installation drawing. An installation with less than the required dimensions will result in improper meter operation.

At the top center of the pipe, drill a 5/8" to 11/16" diameter hole (3/4" to 13/16" hole for 3" through 8" meters). Carefully remove all burrs from inside and outside of pipe. Insert the pitot tube (with gasket in place) in the hole and tighten clamps. Tighten a little at a time. **IMPORTANT:** Before tightening clamps be certain that the arrow on the meter indicates the correct direction of the flow; the flowmeter will not function properly if incorrectly positioned.

MAINTENANCE

Normally, little flowmeter maintenance is required. However, if deposits develop in the tapered tube loosen clamps and remove meter from pipe. Then remove the red cap plug and float from the tapered tube. Cleaning should be done with a swab and a mild, non-abrasive detergent solution. Should a particle become lodged in the pitot tube use small diameter wire to remove it. Insert the wire from the tapered tube side. **Do not** use a drill. It will damage the calibrated tube and cause an improper flow indication. After cleaning make certain the float is properly replaced in the tapered tube. (See the facsimile in the "Installation Drawing" Section.) Apply two wraps of teflon tape to the cap plug, and be careful not to cross thread when replacing it in the meter body.

METER PERFORMANCE:

Maximum Temperature 195 °F
Maximum Pressure 100 PSI

MICROFILMED

JAN 21 1992

PRESSURE AND TEMPERATURE

Pressure and temperature limits are inversely proportional. At the maximum suggested pressure the temperature should approach 70 °F; at the maximum suggested temperature the pressure should approach zero psi. We cannot guarantee our flowmeters will not be damaged either at or below the suggested limits simply because of many factors which influence meter integrity: stress resulting from meter misalignment, damage due to excessive vibration, and external thermal conductivity contact with certain chemicals to name a few. These situations and stresses may compromise the strength of the materials from which the meters are manufactured.

LAPSE NOTICE

RE: PERMIT NO. 36-08233

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced water permit has lapsed. This office did not receive either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time. You were provided the proper form in our proof due notice to you dated October 31, 1988.

Your permit cannot be reinstated unless you submit proof of beneficial use or submit an extension of time request showing reasonable cause for delay. Either the completed proof of beneficial use submittal (including the examination fee or a completed field examination report) or the extension request form together with the \$15 fee must be received by this department within sixty days of the date of mailing of this lapse notice or the permit will no longer be of any force or effect.

A proof of beneficial use form and a request for extension of time form are again enclosed for your use. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a governmental agency or by litigation which might bring title to the water in question.

PROOF DUE NOTICE

RE: PERMIT NO. 36-08233

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1989. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

MAR 26 1987

INTER DEPARTMENT MEMO

DATE 2/26/87

Department of Water Resources

Subject: Withdrawal of Proof

In the process of doing the field exam on this permit and 36-8232 it was discovered that although proof had been filed on both permits there was still some additional development Mr. Anderson wanted to make on 36-8233. The development to date includes use in swimming pool, hot tub, water slide and some heating Mr. Anderson plans to use the geothermal water to heat the rest of the buildings. Since he plans to do this before proof is due on this permit it was decided that he would withdraw proof on this permit until project is completed.

ES. Lila Blau Fee of \$100.00 has been pd. to allow for.

CERTIFIED MAIL

June 19, 1986

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 3, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers or geologists certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing of certified water

night examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water in which the examination fee is based can be less than the permitted amount, at less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

Re: Permit No. 36-8233 (Larrey and/or Retha Anderson)

Dear Mr. Anderson:

I have received your September 23, 1985 letter in connection with the above-referenced permit. A review of the file shows that submittal of proof of beneficial use to the Department is not due until January 1, 1989 for the permit. If development of the use of water is complete, you could submit the proof of beneficial use statement at any time. Enclosed is a beneficial use form for your potential use.

Upon receipt of the beneficial use statement, the Department will schedule and conduct a field examination of the system. The last document issued by the Department is a license and is issued after the field exam. It is difficult to know when an exam will be conducted since the Department has a backlog of exams to conduct.

Department records show that you have also filed Application for Permit No. 36-8232 which has been held in our Southern Regional office in Twin Falls due to the Swan Falls water right controversy. The region has advised that processing of that application can now continue due to the Swan Falls settlement negotiations.

If you have additional questions, please contact this office or our office in Twin Falls at 1041 Blue Lakes Blvd. N., telephone 734-3578.

Sincerely,

A handwritten signature in dark ink, reading "L. Glen Saxton", is written over the typed name.

SEPTEMBER 1, 1985

DEAR PERMIT HOLDER:

ACCORDING TO OUR RECORDS, YOU ARE THE HOLDER OF A WATER PERMIT ON WHICH PROOF OF BENEFICIAL USE OF WATER WAS NOT SUBMITTED BEFORE JULY 1, 1985, WHICH INDICATES YOUR PROJECT IS NOT COMPLETE. THEREFORE, YOU NEED TO BE AWARE OF CHANGES IN IDAHO LAW, EFFECTIVE JULY 1, 1985, WHICH IMPACT ALL WATER PERMITS ISSUED BY THIS DEPARTMENT.

SPECIFICALLY, PURSUANT TO SECTION 42-203D, IDAHO CODE, THE DEPARTMENT MUST REVIEW ALL PERMITS FOR WHICH DEVELOPMENT OF WATER USE WAS NOT COMPLETED ON OR BEFORE JULY 1, 1985, TO DETERMINE IF THEY MEET THE NEW REQUIREMENTS OF CHAPTER 2, TITLE 42, IDAHO CODE. RULES AND REGULATIONS GOVERNING THE RE-EVALUATION OF PERMITS ARE NOT YET FINALIZED. HOWEVER, IF YOU COMPLETED THE DEVELOPMENT UNDER YOUR PERMIT BEFORE JULY 1, 1985, YOU SHOULD SUBMIT A PROOF OF BENEFICIAL USE STATEMENT, STATING THAT THE PROJECT WAS COMPLETED BEFORE JULY 1, 1985 SO THAT YOUR PERMIT WILL NOT BE SUBJECT TO THE REVIEW REQUIREMENTS OF SECTION 42-203D, WHICH READS AS FOLLOWS:

42-203D. REVIEW OF PERMITS - OPPORTUNITY FOR HEARING. - (1) THE DEPARTMENT SHALL REVIEW ALL PERMITS ISSUED PRIOR TO THE EFFECTIVE DATE [JULY 1, 1985] OF THIS SECTION, EXCEPT TO THE EXTENT A PERMIT HAS BEEN PUT TO BENEFICIAL USE PRIOR TO JULY 1, 1985, TO DETERMINE WHETHER THEY COMPLY WITH THE PROVISIONS OF CHAPTER 2, TITLE 42, IDAHO CODE. IF THE DEPARTMENT FINDS THAT THE PROPOSED USE DOES NOT SATISFY THE CRITERIA OF CHAPTER 2, TITLE 42, IDAHO CODE, THEN THE DEPARTMENT SHALL EITHER CANCEL THE PERMIT OR IMPOSE THE CONDITIONS REQUIRED TO BRING THE PERMIT INTO COMPLIANCE WITH CHAPTER 2, TITLE 42, IDAHO CODE. IF THE DEPARTMENT FINDS THAT THE PERMIT SATISFIES THE CRITERIA ESTABLISHED IN CHAPTER 2, TITLE 42, IDAHO CODE, THEN THE DEPARTMENT SHALL ENTER AN ORDER CONTINUING THE PERMIT. (2) THE DEPARTMENT SHALL PROVIDE AN OPPORTUNITY FOR HEARING IN ACCORDANCE WITH SECTION 42-1701A, IDAHO CODE, AND SECTIONS 67-5209 THROUGH 67-5215, IDAHO CODE, FOR EACH HOLDER OF A PERMIT THAT IS PROPOSED EITHER TO BE CANCELLED OR MADE SUBJECT TO NEW CONDITIONS.

YOU MAY OBTAIN PROOF OF BENEFICIAL USE FORMS FROM THE DEPARTMENT. IF YOU HAVE ANY QUESTIONS, PLEASE LET US KNOW.

SINCERELY,

L. GLEN SAXTON
CHIEF, OPERATIONS BUREAU

RE: PERMIT NO. 36-P233

DEAR PERMIT HOLDER:

ENCLOSED IS A COPY OF YOUR APPROVED APPLICATION FOR PERMIT. WE DIRECT YOUR ATTENTION TO THE CONDITIONS OF APPROVAL ON THE FOURTH PAGE.

BE SURE TO NOTE THE SPECIAL CONDITION REQUIRING YOU TO INSTALL A MEASURING DEVICE, OR AN ACCESS PORT TO PROVIDE FOR THE INSTALLATION OF MEASURING EQUIPMENT BY THE DEPARTMENT. ENCLOSED PLEASE FIND A LIST OF MEASURING DEVICE OPTIONS, AND SPECIFICATIONS FOR THE INSTALLATION OF THE ACCESS PORT.

THE 1982 IDAHO LEGISLATURE ADDED A REQUIREMENT THAT AS A PERMIT HOLDER YOU MUST COMMENCE THE EXCAVATION OR CONSTRUCTION OF DIVERTING WORKS WITHIN ONE YEAR OF THE DATE THE PERMIT WAS ISSUED, AND YOU MUST PROCEED DILIGENTLY UNTIL THE PROJECT IS COMPLETED. THE ENCLOSED BLUE CARD MUST BE COMPLETED AND RETURNED TO THIS OFFICE AS SOON AS YOU COMMENCE CONSTRUCTION, NO LATER THAN ONE YEAR FROM THE DATE THE PERMIT WAS APPROVED.

WE HAVE ENCLOSED INSTRUCTIONS ENTITLED "MAKING PROOF OF BENEFICIAL USE". PLEASE READ THE INSTRUCTIONS CAREFULLY SINCE YOU MUST TAKE FURTHER ACTION TO DEVELOP THIS PERMIT INTO A LICENSE.

Gentlemen:

Enclosed you will find a legal notice which we wish to have published on the dates indicated (once a week for two consecutive weekly issues) in your newspaper. We have allowed ample time for you to submit a sales proof to this office for review before the first publication date. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. Your cooperation is appreciated.

Please send the affidavit of publication and publication billing to this office before DECEMBER 12, 1983.

Yours truly,

Mary A. Newby
Secretary

Encl.
