Total number of acres irrigated: 30

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right is for the use of trust water and is subject to review 20 years after the issuance of the permit to determine availability of water and to re-evaluate the public interest.
6. Diversion and use of water under this right is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.
7. The Director retains jurisdiction of the right issued to change, add or remove any requirement as determined to be appropriate.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Original handlines were replaced with present system when additional ground was added to the farm. System took on present form in 1986. Original pump still used. System was licensed for 95 acres, but now waters 122 acres. Permit 36-8205 is for 30 acres. So 8 acres of ground is not covered by water rights. Change apparently occurred before start of SRBA, so the land may be claimable expansion of Lic. 36-7171. Land owner should be informed; adjudication section notified. Since system capacity exceeds existing filings, app. for permit has been Not to exceed 2.43 cfs for all rights combined on this well. prepared.

covered by permit 36-8595 @ 1.6 cfs, 8 ac

Dear Mrs. Williams;

During my recent licensing inspection of your well in the NE¹/₄ Sec. 31 T. 8S R. 25E, I found that a total of 133 acres are being irrigated from this well. License 36-7171 covers 95 acres, and Permit 36-8205 covers 30 acres. This leaves 8 acres that are being irrigated without water rights.

Under the two existing filings, 2.38 cfs of water flow can be licensed. The flow meter on the well showed a diversion rate of 2.43 cfs, however. Although the additional acres could be covered under an adjudication claim, the additional water flow cannot be. We therefore recommend that you file an application for a water permit to cover the expanded use of this well. We have prepared an application for your use. If this is acceptable, the application should be signed and returned to this office with a filing fee of \$30.

If you have any questions, please feel free to contact this office.

Sincerely,

James E. Stanton

RE: PERMIT NO. P36-08205

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

If development is complete, you may submit proof of beneficial use immediately.

MEMORANDUM

TO: FILE/APPLICATION NO. 36-8205

FROM: TIM LUKE

RE: SWAN FALLS PROCESSING

DATE: 3-13-90

=====

The applicant has returned the trust water questionnaire which appears to claim that the 30 acres under this application was developed prior to October of 1984.

The Department's remote sensing report has the land classified as irrigated in 1986. The 1976 7.5 minute orthophoto and 1980 infrared aerial photo available at the Department both show that the land was not irrigated in those years. Review of 1984 NHAP photography at the state SCS office in Boise indicated that the land was not irrigated in 1984 as well.*

Based on the available historical aerial photo data, the land under this application does not appear to have been developed prior to October, 1984. The application therefore represents a trust water appropriation and the entire 30 acres are trust acres.

* On 3/13/90, I reviewed NHAP photo 255-50 dated 9/12/84. Photo provided no evidence of irrigation.

RE: APPLICATION FOR PERMIT NO. 36-8205

Dear APPLICANT:

Due to the Swan Falls litigation, Department approval of the enclosed application may have been delayed. The Department is presently reviewing your application and may authorize the proposed development.

The purpose of this letter is to determine: (1) if you are still interested in developing the project, and (2) the extent of development, if any, that has already occurred under the application. Enclosed are two forms requesting information which will help the Department expedite the processing of the application.

If you have abandoned or have no interest in continuing with your plans for development of the project, please complete the enclosed withdrawal form and return it to the Department. If you request a withdrawal of the application and the application was not previously advertised, the department will refund your original filing fee.

If you wish to continue with your proposed development plans, or have completed all or a portion of the proposed development before October 1, 1984, then you must complete and return the enclosed questionnaire. You may use the questionnaire and enclosed application to make any comments &/or amendments concerning the application. Your completion of the questionnaire will expedite processing and help the department determine if the water diverted under the application is public water or trust water. Approved trust water applications may be subject to additional conditions.

Failure to return either of the above forms within thirty (30) days of the date of this letter is cause for the Department to void the application.

Re: Amended Application for Permit No. 36-08205

Dear Mr. Williams:

This office acknowledges receipt of the above referenced amended application for permit.

The amended application will still qualify for the "trust water" classification in the Swan Falls agreement and we are unable to estimate at this time when action will be taken on the application.

Under the rules, applications will be processed at a rate which allows development of 20,000 acres per year. The oldest applications will be processed first, provided that applicants are willing and able to proceed.

Also, please supply this office with a legal document showing evidence that you have the capacity to act on behalf of the estate of Bynum W. Williams.

Very truly yours,

Douglas Jones, E. I. T.
Water Resources Engineer
