PROOF DUE NOTICE

RE: PERMIT NO. 36-08147

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1990. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck

RE: SWAN FALLS PROCESSING

DATE: 11-27-89

=====

This application was among those applications reviewed in the regional offices last year and recommended for out of sequence processing. This application includes a statement and sufficient supporting evidence concerning development of the project prior to October 1, 1984.

The department's Policy and Implementation Plan for Processing Water Rights in the Swan Falls Area provides for applications to be processed out of sequence if the development was completed prior to October 1, 1984 and the application filed prior to July 1, 1985. These filings are not required to be processed in sequence with other trust water filings because the effect of these filings have already occurred and because, due to subordination, the filings are not taking water held in trust. These filings are not subject to the staged development policy and public interest criteria of Section 42-203C, Idaho Code.

RE: PERMIT NO. 36-08147

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also

Re: Application for Permit No. 36-8147-1

Dear Mr. Huettig:

On March 25, 1988, the Federal Energy Regulatory Commission (FERC) issued an order satisfying the last condition to make the Swan Falls Agreement effective. The Department is now prepared to proceed with the normal processing of your application. This process includes the preparation of a notice of the application which shall be published once a week for two consecutive weeks in a newspaper printed within the county wherein the point of diversion lies.

The Department wishes to know of any reason why it should not plan to process your above-referenced application. If there is a reason for not processing this particular application or you no longer have any interest in seeking a water right permit under this application, please notify the Department within ten days of the date of mailing this notice.

Please do not hesitate to contact this office if you have any questions regarding this matter.

Sincerely,

A handwritten signature in cursive script that reads "Loren O. Holmes".

Indicate the date water was first diverted and beneficially used under this permit: APRIL 14, 1951

1. As of November 19, 1982, had the sum of at least \$15,000 been spent on the purchase or construction of wells or on equipment primarily used for irrigation purposes to be used to develop the above listed application or permit?

YES X NO

If the answer is "yes", attach copies of cancelled checks or receipts showing the expenditure.

2. As of November 19, 1982, did there exist actual expenditures or written commitments for expenditures totaling at least \$15,000 for the purchase or construction of wells or of equipment primarily used for irrigation purposes to be used to develop the above listed application or permit?

YES X NO

If the answer is "yes", attach copies of cancelled checks or receipts showing the expenditure, or of written commitments for such purchase or construction.

3. Describe the irrigation project contemplated. For example, number of acres, number of wells or headgates, type of application system (gravity, handlines, center pivots, length and size of canals, laterals, mainlines, etc.), number and size of pumps.

Dear Sirs,

I bought this 160 acres from Russell Larson in 1965 and it was irrigated by furrow method. In 1978 I converted it to sprinkler irrigation and have been irrigating another 80 acres with the water.

When I took this 80 out of brush in 1953 I used waste water from land that is adjacent to this land. But now almost all of this land is under sprinkler irrigation so my source of water has dried up. Since more land under sprinkler can be irrigated with the same amount of water I have ample water to irrigate this extra 80 acres. Also when we used furrow irrigation half of the waste water flowed onto this 80 and I pumped it onto this through a sprinkler.

Since all of the sprinkler mainline and wheel moves have been in use since 1978 I ask that Idaho Power would drop this suit.

Sincerely,

Harmon Huetten
