Dear Mr. and Mrs. Frazier:

Returned is Form A (Proof of Beneficial Use) which was submitted to the Department on May 16, 1985 in connection with the above-referenced water right. The proof is not applicable to 36-7745 since a license has already been issued.

In checking our water right records, I note that Permit No. 36-8049 is also in your name. Proof of Beneficial Use is not applicable to this permit either, however, since you have already submitted proof for it.

SUBJECT Re-Measurement of Water Use For Field Exam on Permit 36-7745, Joe L. Frazier

On this date, accompanied by Mr. Frazier & his farm operator, I made a second measurement of his well as he requested. The same Badger meter was used as was installed when the first measurement was made. All possible lines were on this time. ~~As there was no one else present during the first measurement, I had no way of knowing what lines were on then.~~ This second measurement was 5000 gallons per 140.9 seconds, or 4.74 cfs. We can allow 4.5 cfs, which is what the applicant filed on originally. I originally found 292 acres irrigated, and Mr. Frazier confirmed that this is still correct. There are no other changes on my initial results.

Field Exam for Permit 36-7745, Joe L. Frasier

In response to your memo of 12-4-79, I have talked with Mr. Frasier on this exam. The field exam will be re-done next summer using our Annubar instead of the Badger meter now installed in the main line. Considering the questionable reliability of flow meters, this seems the best way to handle this exam. And less than $\frac{1}{2}$ " / acre does seem pretty low.

& 5 handlines utilize 2500 gpm
or about 5.5 cfs. From mid July
through August this equipment runs
on a constant basis.
- 2- 3.05 cfs is below the normal
Magic Valley usage for 292 acres.
Normal water right & usage is 80 acres
and 1.0 cfs or about 3.7 cfs for
292 acres. In my case, the soil is
very sandy - in fact mostly blow sand -
and requires more than the normal
usage rate due to soil structure, high
percolation rate & high evaporation rate.

I request that you reconsider your decision
and allow me 4.5 cfs as applied for. Your
consideration is appreciated.

Sincerely,
Joe Dyer

as in early September they had
said I'd probably have the permit

be about 10/20.

Could you expedite?
