INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Section 42-1409(7), Idaho Code. This statute provides that new property owners notify the Department of Water Resources (IDWR) of any change in ownership of a water right during an adjudication of water rights, and if a claim for the water right has not been filed to file the needed claim(s).

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures or if you have questions about completing this form please contact your nearest office of IDWR or you may call 1-800-451-4129 (toll-free).

The first line of the form asks for the date of closing so IDWR will have a record of the effective date of the property transfer.

The second line of information requires the legal description of the property being transferred. This information is **ESSENTIAL** and should be available from the documents that will be present at the time of closing. The first two lines of the legal description **MUST** be completed. IDWR's records are based upon legal descriptions using township, range, section and fractions of a section descriptions, and this information must be included on the form. If you also have available a legal description based upon a townsite or subdivision and lot and block number, please also include this additional information. A lot and block legal description is **NOT** a substitute for the township, range, section and fraction of a section description.

After completing the legal description, if all water is supplied by a public service water supply you may check the first box; complete the name, address and telephone information for yourself, the new owner; sign the form in the space provided and return the form to the IDWR office nearest you.

If there are water rights associated with the property, the seller should be able to provide you with the water right number(s). The water right number(s) for the property are to be put in the space provided at the second box on the form. If you or the seller believe there are water rights for the property but the numbers are unknown, then you may wish to call or come into an office of IDWR for assistance in identifying the water rights for the property involved. If claims for the property have not been filed you will be so advised by IDWR.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF PERMIT
NO. 36-7471 IN THE NAME
OF CHARLES E. TAYLOR

CONTINUATION ORDER

This matter having come before the Idaho Department of Water Resources (IDWR) as a requirement of Section 42-203D, Idaho Code, the department Finds, Concludes and Orders as follows:

FINDINGS OF FACT

1. Permit No. 36-7471 (permit) issued to Charles E. Taylor (permit holder) authorized the diversion of 3.20 cfs of water from a groundwater source for the irrigation of 160 acres of land. It also authorized diversion of 0.09 cfs for stockwater and domestic use.
2. Section 42-203D, Idaho Code, directs IDWR to review all permits issued prior to July 1, 1985, which propose to divert water held in trust by the state of Idaho pursuant to subsection (5) of section 42-203D, Idaho Code, to determine whether they comply with the provisions of Section 42-203C, Idaho Code. The review is not required for permits to the extent beneficial use was complete prior to July 1, 1985.
3. Information submitted by the permit holder shows that 160 acres authorized to be irrigated by Permit No. 36-7471 were not irrigated as proposed prior to July 1, 1985.
4. Water diverted and used on or after July 1, 1985 for the irrigation of land under the terms of this permit is trust water.

MICROFILMED
JUN 12 1989

5. The permit was readvertised in accordance with Water Appropriation Rule 4,2,3,1. and was not protested.

6. Proposed development of water under the permit satisfies the presumption of Water Appropriation Rule 5,2,1. that it will not cause either an individual or cumulative significant reduction.

CONCLUSIONS OF LAW

1. The permit will appropriate trust water.

2. IDWR has reviewed the permit under Section 42-203D, Idaho Code and has determined that the permit complies with Section 42-203C, Idaho Code since the diversion and use of water under the permit will not individually or cumulatively cause a significant reduction.

3. The Director should enter an order reauthorizing development in compliance with the provisions of Section 42-203D, Idaho Code.

ORDER

IT IS, THEREFORE, hereby ORDERED that development under Permit No. 36-7471 is reauthorized and CONTINUED as provided in Section 42-203D, Idaho Code, subject to the following additional conditions and limitations:

1. Proof of construction of works and application of water to beneficial use shall be submitted to IDWR on or before October 1, 1990.

2. Any license issued by IDWR pursuant to the permit or portion thereof for the use of trust water is subject to a term review 20 years after the date of this continuation order to determine availability of water for the use and to re-evaluate the public interest at the end of the term.

MICROFILMED

JUN 12 1989

3. Diversion and use of water under this permit is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.

4. The Director retains jurisdiction of the permit and/or subsequent license issued to change, add or remove any requirement as determined to be appropriate.

5. All conditions of approval contained on the original permit are incorporated into and made a part of this order.

6. Permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

*RE: Receipt of 1996 Reporting Fee
Change of Water Right Ownership*

Dear Mr. and Mrs. Armstrong:

Thank you for your letter of May 20 and the accompanying reporting fee for 1996. We have accepted your letter in lieu of the standard report form for this period. For 1997, you will be reporting directly to the Magic Valley Ground Water District (GWD) on a form which will be provided to you. Staff from the GWD will also be contacting you in the future to collect additional information about your water system.

While reviewing your file, I noticed that you had requested in 1995 to update water right ownership information for water right license 36-07471 which you had purchased from Charles Taylor. At that time, the Department had responded that we had no statutory means to change the owner of record for a licensed water right (see attached May 10, 1995 letter).

On July 1, 1996, new legislation was passed which requires all water right records to show most current ownership. Because you have already submitted the required information, we are now able to process your request to update the ownership information for license 36-07471. We will presume that the Warranty Deed you provided in 1995 still reflects the current ownership, unless we are notified differently.

Please contact me at 208-327-5406 if you have any questions.

Sincerely,

Cindy Hodges

RE: Water Right No. 36-07471

Dear Mr. & Mrs. Armstrong:

I recently received a 'New Property Owner Notice of Change of Water Right Ownership' form on the above referenced licensed water right that was forwarded to the department from the Snake River Basin Adjudication District Court.

No claim has been filed on this right in the Snake River Basin Adjudication. A license on this right was issued by this department on November 27, 1992 (see copy enclosed).

In Idaho, decreed, licensed, and claimed water rights are considered real property; therefore, proof of owning the land is proof of owning the water right unless extenuating circumstances exist. Water right statute does not provide a means for changing owner of record for licensed water rights; although, I have placed your correspondence in the water right file.

If you have any questions, please feel free to contact me directly at (208) 327-7944.

Sincerely,

Cindy Zimmerman

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Stockwater for 10 range. No domestic use (There is a small, unoccupied trailer on the property). No animals were present during the exam, but the NW/NE S. 6 showed ample evidence of recent pasturage.

Mr. Taylor sold the N $\frac{1}{2}$ NW $\frac{1}{4}$ Sec. 6 in the past; it is not watered.

There are two fields in the NE/NE Sec. 6. The field in the west part is watered at this time. However, Mr. Taylor said that he may water the northeast field in the future.

System was measured with 9 heads on, as line was on the narrower part of the field. System can run 10 heads according to Mr. Taylor. Recommend flow from 10 heads be allowed.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 36-07471

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a measuring device to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the measuring device must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the SOUTHERN Regional Office in Twin Falls at (208)734-3578.

Sincerely,

Rita Fleck

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before October 1, 1990. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. We are now computing the amount of your irrigation use for the current season. If there are changes in crops or changes in pumps at an installation, notification from you would assist in determining your use. We have estimated the amount of your billing for the current season to be \$ 100.00.

Since all of your previous seasons billings including the final bill were paid before the past due date no advance for the current season is required in accordance with Schedule 24, Irrigation Service.

It is our desire to have service available when needed and it will be very helpful if you will notify us a week in advance of the day you wish to start pumping. The Company will connect service and disconnect service once each calendar year without charge during normal business hours. For all other customer requested connections or disconnections the Customer will pay the actual expense incurred whether or not the additional connect or disconnect is performed during normal business hours.

Your irrigation pump will be turned off for the season some time after October 15, as time allows, unless you make other arrangements at your Idaho Power Company's local office. Billings will continue until the actual turn off is made.

Our exchange agreement with the Bonneville Power Administration requires that we report qualifying irrigation kilowatt hours to BPA for a twenty year period. Failure to report the correct kilowatt hours could effect the availability of the exchange credit in the future. Please fill out and return the enclosed farm card when you make your request for irrigation service.

We appreciate that the spring season is a busy one for you and we will welcome every opportunity to be of help in connection with the use of our service.

Very truly yours,

S. D. Craven

RE: PERMIT NO. _____

Dear PERMIT HOLDER:

Due to the Swan Falls litigation, development proposed by the enclosed permit may have been delayed. The Department is presently reviewing the permit and may authorize completion of development proposed under the permit.

The purpose of this letter is to determine: (1) the extent of development under the permit, and (2) your continued interest in developing or completing development under the permit.

Enclosed are two forms which will help the Department expedite the reprocessing of the permit.

Please complete and return the enclosed questionnaire if you wish to continue with your plans of development or have completed all or a portion of your development before July 1, 1985.

Please complete the enclosed relinquishment form and return it to the Department if you have abandoned or have no interest in continuing with your plans for development of the project.

If the entire project was not completed prior to July 1, 1985, and you still wish to proceed with your plans of development, then you must submit a \$20.00 re-advertisement fee to the Department as required by Water Appropriation Rule 4,2,3. and Section 42-221F, Idaho Code.

Failure to return the questionnaire and pay any required re-advertisement fee within thirty (30) days of the date of this letter is cause for the Department to cancel the permit.

If the incomplete portion of your project is for irrigation of more than 200 acres, the Department will issue a notice requesting additional information as required by Water Appropriation Rule 4.5. (copy enclosed).

Dear Mr. Taylor:

Re: Permit No. 36-7471

Enclosed is a copy of the approved request for extension of time. The time within which to submit the statement of beneficial use postcard is extended to June 1, 1989.

In connection with the development of a water right under this permit, the Department wishes to call to your attention an Idaho Supreme Court decision issued in November 1982 which likely could affect your future use of water.

The decision in the case of Idaho Power Company vs the State of Idaho, et al stated in part that Idaho Power Company's use of water for power generation purposes at the Swan Falls dam on the Snake River is not subordinated to upstream depletion by later-in-time uses. The question of whether Idaho Power's 8,400 cfs water right at Swan Falls dam has been diminished by subsequent development, however, was remanded back to district court for determination. The findings of the district court could restrict water availability or require compensation to Idaho Power Company for uses developed later in time than Idaho Power Company's water right at Swan Falls dam.

Sincerely,

RITA I. FLECK

Dear Mr. Taylor:

One of the conditions of approval of your water Permit No. 36-7471 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before June 1, 1979. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise, the permit will lapse and be of no further force or effect.

Dear Wateruser:

The enclosed Order changes the measuring device condition of approval on your water right permit.

The changed condition should be less restrictive and provide more flexibility to you in the development of your water right system. The specifications related to the size and location of the access port will be available upon request from the Department, as soon as the Department's measuring equipment is obtained.

If you have questions regarding this matter, please contact this office or our regional offices.

Sincerely,

L. GLEN SAXTON
