RE: Water Right 36-07460AD (Transfer 5352)

Dear Mr. & Mrs. Goedhart:

Enclosed is the copy of your approved Transfer of Water Right for the above referenced claim (Transfer 5352). Please be sure to thoroughly read the Conditions and Remarks listed on the transfer. Also, please be advised that the accompanying transfer approval should be considered and treated as a **preliminary order** of the department issued pursuant to section 67-5243, Idaho Code. Enclosed are instructions for responding to **Preliminary Orders** if you are in disagreement with the approved transfer.

Please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address of the owner of a water right to the department. Notice of the change must be provided to the department within 120 days of the change. Change reporting forms are available from any office of the department.

Please feel free to contact the department if you have questions.

Sincerely,

for L. GLEN SAXTON, Chief
Water Allocation Bureau

Responding to Preliminary Orders Issued by the Idaho Department of Water Resources

The Idaho Department of Water Resources (Department) issues water right permits, licenses, and transfers as preliminary orders pursuant to section 67-5243, Idaho Code. A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with a preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

MEMORANDUM

TO: File 36-07460AA

FROM: Pam Skaggs/State Office

SUBJECT: Transfer 5352

DATE: June 14, 1999

Transfer 5352 changes the points of diversion, place, nature and season of use under a portion of Right 36-07460AA, splitting the right into Parts AC and AD. The applicant has purchased 3.3 acres of this water right to provide water for an expansion to an existing dairy.

Season of use was adjusted to year round for dairy uses and diversion volume limited to the consumptive use volume associated with the 3.3 acres of irrigation. No expansion occurs through this transfer; the net result is a reduction of diversion volume.

Recommended conditions include water quality, county zoning, multiple points of diversion/measuring devices, land application and standard transfer conditions.

SUBJECT: Review and Recommendation

This transfer converts another portion of the Branchflower right from irrigation to uses in an existing dairy. The dairy is presently partially covered by license 36-07276 and permit 36-08774 pending licensing. The transfer is based on drying up 3.3 acres of the Branchflower right to allow expanded use at the dairy of an additional 100 cows or 9.9 afa. The transfer was filed based on allowing 3.0 afa diversion volume for each acre dried up.

The transfer was advertised without protest.

RECOMMENDATION

I recommend the transfer be approved subject to the following conditions:

- No new wells authorized to be drilled under this approval.
- The combined limit of 36-07276, 36-08774 and the right associated with this transfer should be coordinated with the licensing of 36-08774 which is pending review by Cindy Zimmerman. This right should add 9.9 afa to the mix. The combined diversion rate should be that which was found during the field exam for 36-08774 (0.13 cfs) since this application indicates no increase in current diversion rate.
- 2 points of diversion within SW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 16, Twp.07S, Rge.17E, B.M.

Re: Application for Transfer No. 5352 (36-07460AH)

Dear Applicant(s):

The Department of Water Resources acknowledges receipt of your Application for Transfer.

Since the applications proposes a change in County for the point of diversion, this office has scheduled advertising the applications in both the North Side News and Gooding County Leader for 12/17 & 12/24/98. A period of ten days following the second publication will be allowed for the submittal of protests with the final protest date on January 5, 1999.

If an application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

The department's review process may have to include field investigation and verification of the claims which is required as part of the Snake River Basin Adjudication.

State Office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

James E. Stanton

SUBJECT: App. for Transfer, Hugo & Mary Goedhart

Today I spoke with Mrs. Goedhart in response to my Wednesday letter. She said that they would purchase the additional 0.2 acres worth of water from Mike Branchflower. I have therefore made the necessary changes on the application to reflect this. She still needs to supply us with an amended water deed from Branchflower, so this will need to be received before the application is ready for final review. This is another transfer on the Branchflower right, and should be approved. The applicants hope to sell their dairy and retire, but have not yet lined up a buyer.

RE: Application For Transfer Filed 9-18-98

Dear Mrs. Goedhart;

In reviewing your proposed transfer, I have reached several conclusions; the attached sheet summarizes my findings. Assuming that you will be servicing 710 milking cows and 50 dry animals 12 months a year, you will need to dry up 3.3 acres to provide the required volume of water. This also assumes that rainbird sprinklers will be used for cow washing no more than 3 months a year. Based on data that I previously gave you, you have purchased 3.1 acres worth of water from Mr. Branchflower for this transfer. Based on this new analysis, you are therefore 0.2 acres short of drying up sufficient land for the needed water.

Keep in mind that these numbers are theoretical for your particular dairy, as your actual water usage has never been measured. Since you are not large enough to be monitored by the West Measurement District, your actual usage may never be known. Although we have tried to make our computer program as accurate as possible, there are enough variables in these calculations so that an absolute volume requirement cannot be determined. The water volume covered by your present application is within 1/2 acre foot of the theoretical requirement, which is within 1.3% of the total requirement. This difference is insignificant by any reasonable accuracy standards, although I certainly cannot say how it might be viewed in the future.

We can continue to process your application as presently filed, or you can purchase another 0.2 acres worth of water from Mike so it can added to what you already have. Let me know how you wish to proceed. Either way, I plan to recommend your application for approval. I apologize for any inconvenience the use of my earlier data may cause you.
