Dear Mr. Stacey:

Regarding the Application No. 36-7301 for William J. Slade, there is still a small problem in the amount of water. When the amount was computed, there was an error: the amount should have been 1.12 rather than 1.42.

In order to make the change in amount, it will be necessary to have your signature. If you can make arrangements to come in the office, we will make the necessary correction.

Very truly yours,

Re: Permits No. 36-7254 & 36-7301

Mr. William J. Slade
1700 Dora Avenue
Yuma, Arizona 85364

Dear Mr. Slade:

Upon receipt of your letter of December 5, 1973, we have again reviewed our files in connection with the above referenced permits.

As you may recall, the Department cannot issue a water license in excess of 1 inch per acre, or 0.02 cfs. Therefore, Permit 36-7301 was issued for only 1.12 cfs due to the existence of Permit 36-7254 pertaining to the irrigation of the same land. As originally allowed, Permit 36-7254 proposed to irrigate the 320 acres of land in the $W\frac{1}{2}$ of Sec. 36 from one well in the $SE\frac{1}{4}NW\frac{1}{4}$ of Sec. 36. The field examination revealed that only the $NW\frac{1}{4}$ of Sec. 36 was being irrigated from this well.

The solution to this problem is to amend your permit 36-7254 to include the well located in the $NW\frac{1}{4}SW\frac{1}{4}$ of Sec. 36 so that the irrigation of the $SW\frac{1}{4}$ of Sec. 36 can be included on that proposed license. The license could then be issued for 3.2 cfs of water. You then would have licenses for the diversion of 1 miners inch for each acre of land being irrigated in the $W\frac{1}{2}$ of Sec. 36, Twp. 8 S, Rgc. 15 E, B.M.

We are enclosing a partially completed application for amendment for your consideration. Upon receipt of the signed amendment and a \$10.00 filing fee, licenses will be issued as follows:

Permit 36-7254

Quantity: 3.20 cfs

Priority: August 9, 1972

Point of diversion: $SE\frac{1}{4}NW\frac{1}{4}$ and $NW\frac{1}{4}SW\frac{1}{4}$, Sec. 36, Twp. 8 S, Rgc. 15 E

Beneficial use: Irrigation of 285 acres within the $W\frac{1}{2}$ of Sec. 36, Twp. 8 S, Rgc. 15 E

The maximum quantity diverted shall not exceed 1,140 acre feet per year when combined with License G-24652 (36-2241) and License 36-7301.

Dear Mr. Stacey:

Regarding the Application No. 36-7301 for William J. Steele, there is still a small problem in the amount of water. When the amount was computed, there was an error; the amount should have been 1.11 rather than 1.42.

In order to make the change in amount, it will be necessary to have your signature. If you can make arrangements to come in the office, we will make the necessary correction.

Very truly yours,

TO: Bob Haynes
FROM: Don McEldowney
SUBJECT: Application 36-7301
DATE: March 14, 1973

We have reviewed the Application above referenced which was submitted for staff review. In running an analysis of other water rights, we find that there are involved in this project, the following:

Water License 36-2241 which provides for 1.50 cfs for 75 acres or one inch per acre.

Permit 37-7254, which was issued for 320 acres and 3.2 cfs. However, because of an overlap between 36-2241 and 36-7254, the effect of the approval on 36-7254 was that the permit was approved at the ratio of 245 acres and 3.2 cfs or .65 inches per acre.

Application 36-7301, overlaps part of Permit 36-7254. As proposed, this application, in itself, provides for 117 inches and for 160 acres or .73 inches per acre. If approved, the combination of these two would provide for 1.38 inches per acre.

Therefore, we recommend that you contact the applicant and advise him that the maximum we could approve under Application 36-7301 would be 1.12 cfs which would provide for an additional .35 of an inch per acre, which brings a total on the lands covered by Application 36-7301 to 1.0 inch per acre.
