Dear Mr. Vandever:

A representative of this Department has made an examination of the works covered by your Permit No. 36-7108 and has found the following:

Quantity of water diverted: 1.94 cfs

Amount of water that can be recognized as beneficially used under Idaho law: 1.94 cfs

The maximum quantity diverted shall not exceed 644 acre feet per year.

Beneficial use: irrigation of 161 acres within the SW 1/4 NW 1/4 Sec. 18, NW 1/4 NE 1/4, NW 1/4 (Lot 5) Sec. 19, Twp. 10 S, Rge. 22 E

Point of diversion: SW 1/4 Sec. 18, Twp. 10 S, Rge. 22 E, B.M.

Priority date established: January 12, 1970

If you do not concur with these findings, please advise us within 10 days; otherwise, a license will be issued as set forth in this letter.

Dear Mr. Yeates:

O
P
Y Thank you for your letter of May 27, 1970, indicating your interest in Water Permit No. 36-7108. The matter of mortgages on permits has been under review by this office for some time, in conjunction with the Attorney General's Office. As a result of that review, we have been advised by the Attorney General that a mortgage agreement could not be used by this office as a basis upon which to withhold action on a permit, if such action was requested by the recorded permit holder. I am enclosing a copy of a letter to me from the Attorney General's Office, which explains the basis of that opinion.

Based on that letter, I would suggest the following:

- (1) That the Farmers Home Administration secure an assignment of a permit for the term of the mortgage in those cases where an unlicensed permit is involved in the mortgage, which would invest legal title to the permit to FHA.
- (2) In those cases where a licensed permit is involved, I would suggest that you obtain and file a copy of a conveyance or assignment of that licensed right with this office. We would then place that conveyance in the water right file and, prior to any change application being made, you would be notified for your concurrence.

If you have any questions as to the procedure that I have suggested, or if you have a suggestion as to some other procedure that we might follow to be of assistance to you, please feel free to contact me.

Very truly yours,

MEMORANDUM

TO: DON McELDOWNEY

FROM: DALE

SUBJECT: Permit No. 36-7108

I discussed the potential problem of declining water levels in the area of Permit No. 36-7108 with Jack Frink of the U. S. Bureau of Reclamation. According to him water levels in the North Side Pumping Division dropped an average of 10 to 12 feet in the period 1956 to 1963. Some wells suffered a decline of up to 25 feet in this period. Jack attributes about 2/3 of the decline to pumpage of ground water in the area and the remainder to a long term dry period during the same time.

According to all data that either of us can find for the area water levels have remained stable or increased slightly since 1963. I would not expect any changes in this pattern in the near future.

The undersigned, Jack J. Johnson, owner of Farm Unit B, Tract F in Section 14 and 23, Township 10 South, Range 21 E. B. M. in Jerome County, Idaho, and William E. Gochneur, owner of Farm Unit B, Tract C in Section 14, Township 10 South, Range 21 E. B. M. in Jerome County, Idaho, does hereby submit his protest to the granting of the above described permit to appropriate public waters of a groundwater source filed heretofore with the Department of Reclamation by Billie L. Vandever, under Application for Permit 36-7108.

That the undersigned has located upon Farm Unit F and B. a domestic well for the use of their family and for stock water and has had the same for the past 13 years. That each spring this well which is drilled to a depth of approximately 500 feet, is at a low point and sufficient water is sometimes not available. The area where the domestic well is located is near to and in the same groundwater table area as the proposed well of the applicant. The present studies of the U.S. Bureau of Reclamation indicate that insufficient water is now available in the area and no excess water is available in the quantities that have been applied for by the application.

That this protest is respectfully filed by the said, Jack J. Johnson and William E. Gochneur, joint user of the domestic well on Farm Unit B. Tract C. in Section 14, and the protestants did not have notice of said application until March 23, 1970.

The undersigned has located on farm unit E a domestic well for the use of his family and livestock water and has had the same since April 15, 1957 said well was drilled to a depth of 410 feet and the water level was 337 feet. The pump was placed at a depth of 365 feet, in 1965 the pump had to be lowered to 385 feet because the water level had dropped lower than 365 feet. The area where the domestic well is located is near to and in the same ground water table and area as the proposed well of the applicant. The present studies of U.S. Bureau of Reclamation indicate that sufficient water is not available in the quantities that have been applied for by the applicant.

Dear Sir;

I would like to pretest the issuing of the permit for drilling a deep irrigation well on Range 10S -22E Boise Meridian, Section 18 and 19, Tracts H, J,K,A, and Lot 5. Approximately 155 acres owned by Billie L. Vandever, R.F.D. # 1, Heyburn, Idaho, for the following reasons:

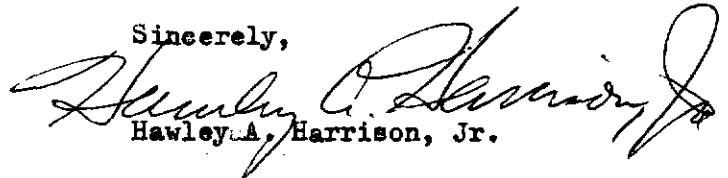

In March, 1957 I drilled a domestic well on tract C, Section 17 and 18 to the depth of 375 feet with a static water level of 333 feet and the pump set at 343 feet. In June 1958 the pump setting was lowered 21 feet to 364 feet because of a lowering of the static water level. In June 1963 the pump setting was again lowered to 374 feet because of a lowering of the static water level. I also lease Tract G, Section 18, adjacent to the land described above. The well on it is approximately the same depth and pump setting the same. Any further deterioration of the static water level will necessitate the expense of drilling these wells deeper and a possible loss of domestic water.

The other land owners in this immediate area have experienced the same lowering of the water table. These farms are all homesteads in the Bureau of Reclamation Northside pumping division project with approximately 48 years remaining in the repayment period.

An underground water survey should be made to assure an adequate supply of both domestic and irrigation water before this permit is issued.

Your consideration of this important subject will be greatly appreciated.

Sincerely,

Hawley A. Harrison, Jr.
