

- (8) Remarks System was originally gravity irrigation, but has been improved in the 60's for more efficient operation. Waste water comingles with canal shares. The high rate of diversion is needed because irrigation can occur only when the golf course not crowded with players. The soil is shallow and sandy with many blowouts, so it takes a lot of water to keep the grass in good condition.

Scale: 2 inches equal 1 mile.

Map should show the location of the point of diversion and the place of use of the water by 40-acre subdivisions, section, township and range of the public land survey system.

Re: Claim No. 36-4271

Dear Mr. Frederickson:

The Department of Water Resources has completed the advertising of your claim to a water right, and no further action is authorized under Section 42-243 and 42-244, IDAHO CODE. Your claim will be retained in our files and will be available at any time for use by you or the court.

The filing and advertising of the claim does not confirm the water right claimed, but will serve to record and preserve the information or evidence added at any time. Please refer to the claim identification number when corresponding with this office.

If, at a later date, you find that you have additional information or supporting evidence that you would like to have included with the claim, you may have that information or evidence added at any time.

We are enclosing a copy of your claim for your records. If you have questions or if this office can be of further assistance, please feel free to contact us.

Very truly yours,

Allen Merritt, P.E.
Water Resources Engineer
