Dear Mr. Tominaga:

We received your August 1 request to issue license 36-2672 for 2 cubic feet per second of water. However, a license is issued to show the amount of water actually being diverted and put to beneficial use. Your pump was only found by our field examiner to be producing 1.26 cubic feet per second of water. If you feel this is not the actual amount of water that is being pumped you should send us any reasons you have for feeling this amount is in error. Another field examination will be made to check the output of your well if you have presented sufficient evidence.

A license will be issued as proposed in our letter of July 25, 1973 unless we hear from you before September 6, 1973, so if you have any questions please let us know.

The maximum quantity diverted shall not exceed 480 acre feet per year.

Beneficial use: Irrigation of 120 acres within the

Dear Mr. Tominaga:

One of the conditions of approval of your water Permit No. G-33398/36-2672 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before January 10, 1972. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Re: Permit No. G-33398 (New No. 36-2672)

Mr. Joe Tominaga
Route 2, Box 137
Paul, Idaho 83347

Dear Mr. Tominaga:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department; previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply them upon request at any time.

Very truly yours,

Donald W. McEldowney
Appropriation Supervisor
