Dear Mr. Burstedt:

Our office acknowledges receipt of Assignments of Permit for the above referenced water rights. However, in reviewing the files I find that the Permits have been licensed.

In Idaho, a licensed water right is considered real property and is acquired when the property to which it is appurtenant to is purchased. Proof to owning the property is proof of owning the water right license.

Therefore, I have put the Assignments of Permit into the files for future reference only and no other action will be taken. I have also enclosed copies of the licenses for your records.

If you have any questions please feel free to contact our office.

Our Department does not have a procedure for recording any change of ownerships once a license has been issued. We do wish to remind you that a licensed water right, unless specifically withheld from the sale of the land, will remain with the land described in such license, regardless of who now owns the property.

We will insert copies of your letter in the three above referenced licenses for informational purposes only.

Dear Mr. Roberts:

We reviewed the assignments submitted in connection with the above referenced water licenses. We wish to advise you that we do not have means by which we can officially accept and record assignments on water licenses.

We will place a copy of the assignment and this letter returning your original assignment in each of the files for whatever purpose they may serve.

Once a water right is perfected and identified by a water license, any interest in the water right is vested in real property, and whoever holds title or mortgage on the real property will have interest in the right.

In order for the State of Idaho to record assignments on licensed rights, we would need a title insurance policy or an abstracted title to assure ownership interests.

If we can be of further assistance, please contact us.

Re: Permit No. G-31532

Howard H. Harper
Drawer D
Twin Falls, Idaho

Dear Mr. Harper:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with those rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department, stating that you have been issued a permit and are now submitting proof of beneficial use. Previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply it upon request at any time.

Very truly yours,
