Dear Mr. Harper:

Our Department does not have a procedure for recording any change of ownerships once a license has been issued. We do wish to remind you that a licensed water right, unless specifically withheld from the sale of the land, will remain with the land described in such license, regardless of who now owns the property.

We will insert copies of your letter in the three above referenced licenses for informational purposes only.

If you have any questions regarding this matter, please contact us.

Very truly yours,

Fred Eisenbarth

Dear Mr. Roberts:

We reviewed the assignments submitted in connection with the above referenced water licenses. We wish to advise you that we do not have means by which we can officially accept and record assignments on water licenses.

We will place a copy of the assignment and this letter returning your original assignment in each of the files for whatever purpose they may serve.

Once a water right is perfected and identified by a water license, any interest in the water right is vested in real property, and whoever holds title or mortgage on the real property will have interest in the right.

In order for the State of Idaho to record assignments on licensed rights, we would need a title insurance policy or an abstracted title to assure ownership interests.

If we can be of further assistance, please contact us.

Dear Mrs. Harper:

We acknowledge receipt of the depositions and affidavit of publication in the
North Side News submitted as proof of com-
pletion of works and beneficial use on Permit G-30623.

Before a certificate and license of water right can be issued, a field
examination must be made by a representative from this department. We
cannot tell just when this examination will be made, but our field examiner
will try to contact you at the time he makes the examination so that you
may show him the system.

Re: Permit No. G - 30623

Lucille L. Harper
Drawer "D "
Twin Falls, Idaho

Dear Mrs. Harper:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- 30623 are due not later than Aug. 27, 1967

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated - - all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Very truly yours,

Mr. Harley M. McDowell,
Idaho Land & Appraisal Service,
Box 2161,
Boise, Idaho.

Dear Mr. McDowell:

We enclose Permit No. G-30623 in which we direct your attention to the limitations and conditions as given on the fourth page under approval of the State Reclamation Engineer.

~~We also enclose~~ Departmental Receipt No. G-7283 which was issued covering payment in the amount of \$6.50 for the filing fee of the above mentioned permit was handed to you.

Well logs are an important part of your recorded water right and State Statutes require that well drillers' supply logs on all wells, whether irrigation, domestic, drain or stock wells, to be filed in the Department of Reclamation. In view of the rapidly increasing demand for ground water, the lowering of the ground water level, and the creation of critical ground water areas, it is important that you, as owner, make sure a log on your well is filed in this office.

Very truly yours,

GEO. N. CARTER
State Reclamation Engineer
