INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights. Required claims may be filed by a new owner.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. Please contact your nearest IDWR office, or call 1-800-451-4129, if you would like more information or need help completing this form. Please attach additional sheets to the form if you require additional space to describe or explain any of the items on the form.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at **Item 1**. If you or the seller believes there are water rights for the property but the numbers are unknown, you may wish to contact IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
2. The information described at **Item 2** is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner of the water right and/or adjudication claim at **Item 3**.
4. The name, mailing address, and telephone number of the new owner(s) is entered at **Item 4**. Please indicate the relationship between multiple owners by using the connector 'and', 'or', or 'and/or'. If an 'and' is used, all parties must sign this form. If an 'and/or' or 'or' is used, all parties may sign. However, only one of the named parties is required to sign.
5. At **Item 5**, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
6. You may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at **Item 6**.

Please provide as much detail as possible concerning your water right: include the number of homes, irrigated acreage if more than 1/2 acre is irrigated, type and number of stock if your right is for stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights *proportionately*.

7. The new owner(s) must sign the form in the space(s) provided at **Item 7**. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

RE: Permit No. G-29950

Kirk and Fenton S. Hays
Rt 1
Wendell, Idaho

Dear Sirs:

Our field engineer's report on his inspection of proof of completion of works and application of water to beneficial use under the terms of Permit No. G-29950 shows the well is (~~478~~) capable of conveying 50 miner's inches, or 1.0 c.f.s. of water for the irrigation of 80 acres.

Upon receipt of the statutory fees, totaling \$ 9.00, we will issue the Certificate of Completion of Works and the License, and Certificate of Water Right confirming the right, with priority of July 14, 1961, to the use of 1.0 second feet of subterranean water with the point of diversion in the SE 1/4, Sec. 26 for irrigation of 80 acres in the SE 1/4, Sec. 26, T. 7 S., R. 14 E., B.M. Your well produces 65.5 miner's inches but your permit was issued for only 50 so that is all we can issue the license for.

Very truly yours,

Gentlemen:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the GOODING LEADER, all submitted in proof of completion of works and beneficial use on Permit No. G-29950.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

RE: Permit G-29950
Fenton S. Hays

Phillip M. Becker
Box 456
Gooding, Idaho

Dear Mr. Becker:

This office does not require notice on
completion of 1/5 of the work.

If he has completed all of the work and made
beneficial use of the water, he may notify us and we
will forward forms for advertising. This is not due
until July, 1966, however.

Very truly yours,

CARL E. TAPPAN
