Case No. 39576)

ORDER AMENDING IRRIGATION PERIOD OF USE ELEMENT
IN PARTIAL DECREE AND INCORPORATING INTO PARTIAL
DECREE AN EXPRESS STATEMENT REGARDING GENERAL
PROVISIONS, *NUNC PRO TUNC*

A *Partial Decree* was entered for the above-captioned irrigation water right on December 29, 1997. The period of use element was decreed as "irrigation season." In *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998), the Idaho Supreme Court remanded with the directive to include specific dates for the period of use element. Following remand, IDWR filed a *Supplemental Director's Report, Reporting Area 3, IDWR Basin 36, Regarding Revision of Period of use (For Irrigation Water Uses) and Conjunctive Management General Provisions*, which included an irrigation period of use recommendation for this water right. No objections were filed to this recommendation and the time period for filing objections has now expired.

THEREFORE, IT IS ORDERED that the period of use for the irrigation element of the above-captioned water right is hereby amended and decreed as:

PERIOD OF USE: 03-15 11-15

IT IS FURTHER ORDERED that the *Partial Decree* for the above-captioned water right is hereby amended and decreed to contain the following:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the court at a point in time no later than the entry of a final unified decree. I.C. section 42-1412(6).

This order is being entered *nunc pro tunc* as of the date the *Partial Decree* was issued and is not intended to modify any subsequent administrative changes for the water right, if any, which occurred following entry of the *Partial Decree*.

RULE 54(b) CERTIFICATE

With respect to the issues determined by the above judgment or order, it is hereby CERTIFIED, in accordance with Rule 54(b), I.R.C.P., that the court has determined that there is no just reason for delay of the entry of a final judgment and that the court has and does hereby direct that the above judgment or order shall be a final judgment upon which execution may issue and an appeal may be taken as provided by the Idaho Appellate Rules.

The Purpose of the *Order* is to set forth beginning and ending dates for the irrigation period of use for this water right. As stated in the face of the *Order*, this action was necessary following the decision of the Idaho Supreme Court in *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998). This *Order* also incorporates into the *Partial Decree* an express statement that the *Partial Decree* is subject to such general provisions necessary for the definition or for the efficient administration of the water right. This express statement is necessary to comply with the requirements of Idaho Code section 42-1412(6). This *Order* in combination with the *Partial Decree* that was issued for this water right on December 29, 1997, sets forth all of the elements of your water right. Gentlemen,

I have a well in Sec 17 T 75 R 23 E. B. M.
and a pump which delivers 151 Idaho Weir's Incher
by your measurement. With this I ~~am~~ irrigating
about 170-175 acres with line water and about
20 acres with drainage water. I am not
growing any row crops—just pasture & hay
and could utilize some more land with this water.
By extending my mainline $\frac{1}{4}$ mile I could reach
another 20 acres of which about 65 acres is
formable. I should like to have a permit to
use the water from this well to irrigate the
 $5\frac{1}{2}$ of B.E. $\frac{1}{4}$ of sec 8 T 75 R 23 E. B. M. in
addition to the land I am now irrigating.
Please let me know if I may
follow. Thank you.

Very truly yours,
Vance T. Smith

P.S. This additional price is B.E. M.
land for which I can secure
permission to irrigate

Dear Mr. Smith:

Returned herewith is your map which should accompany Permit No. G-27616. Also enclosed are two forms for amending the point of diversion.

The points of diversion shown on the permits are $NW\frac{1}{4}SE\frac{1}{4}$, Section 17 on G-27825 and $SW\frac{1}{4}NE\frac{1}{4}$, Section 17 on G-27616. No amendment is necessary if the well is located within the 40-acre tract shown on the permit. The point marked in red on the enclosed map could be in the ~~SE~~ corner of the $SW\frac{1}{4}NE\frac{1}{4}$ or the NE corner of the $NW\frac{1}{4}SE\frac{1}{4}$, or it could be east of the corner. You should decide which is correct and amend the point of diversion to the proper 40-acre tract for both permits, as necessary.

There is a recording fee of \$1.00 for each amendment to a permit.

Dear Sir,

Enclosed you will find a map showing my purchased & desert entry land in Arizone County. I have drilling permits for both well sites shown. However after surveying the area with a transit I find that it is more economical and feasible to get all my water from the well site shown in red. There will be about 250 acres to irrigate in this total area.

Will you therefore help me to prepare the necessary amendments to show a withdrawal of 250 inches from the well site in red & to show the well site for the desert entry to be at the same location & thus satisfy the desert entry requirements. Thank you.
