Re: Permit No. 26577

C. L. Boyd
Rt 1
Hazelton, Idaho

Dear Mr. Boyd:

Our field engineer's report on his inspection of the application of water to beneficial use under the terms of Permit No. 26577 shows the pump, pipe line & sprinklers is capable of conveying 75 miner's inches, or 1.5 c.f.s. of water for irrigation of 95 acres.

Upon receipt of the statutory fees of \$ 10.00 - based at the rate of \$2.00 for each 40-acre subdivision - we will issue the License and Certificate of Water Right, confirming the right with priority of February 19, 1957 to the use of 1.5 second feet of surface water with the point of diversion in the SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 18, T. 10 S., R. 21 E., B.M. from unnamed stream (waste water) for irrigation of 95 acres in the E $\frac{1}{4}$ SW $\frac{1}{4}$, W $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 18, T. 10 S., R. 21 E., B.M.

Very truly yours,

CARL E. TAPPAN

Dear Mr. Boyd:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the FIRST SEGREGATION NEWS, all submitted in proof of completion of work and beneficial use on Permit No. 26577.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Very truly yours,

Re: Permit No. 26577

C. L. Boyd

Dear Sir:

We have your letter of January 21st requesting information about the signing of your proof of beneficial use.

It is permissible for you to sign on behalf of the partnership, however, the name of the permit holder should be changed on your notice of proof to C. L. Boyd and W. A. Boyd, Estate.

When the estate is probated, it will be necessary for us to have a copy of the distribution the court makes of the estate.

We are returning your notice of proof, Form 10, for some corrections. You have January 21, 1964 as the date set for submitting proof of application of water to beneficial use. This does not allow time for the required four weeks publication of the notice prior to the signing of the proofs by yourself and two witnesses. The date will have to be advanced to allow for this. Also consider a date which will be most convenient for all parties involved.

Your land list on the notice includes the NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Sec. 18. This is not shown on our records. It probably should be the NW $\frac{1}{4}$ SE $\frac{1}{4}$, as your completion of works certificate includes the SE $\frac{1}{4}$ NE $\frac{1}{4}$, NE $\frac{1}{4}$ SW $\frac{1}{4}$, S $\frac{1}{2}$ SW $\frac{1}{4}$, N $\frac{1}{2}$ SE $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 18, T. 10 S., R. 21 E.

Please make the necessary corrections on the enclosed notice and return to us for processing.

DEPARTMENT OF RECLAMATION

Re: Permit No. 26577

Date:

Aug. 1, 1963

W. A. & C. L. Boyd
Hazelton, Idaho

Dear Mr. Boyd:

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. 26577 is due not later than October 17, 1963. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

We enclose Form 10, in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof. This form, in duplicate, is to include the time of day, the date, the name of the town, the address of the Notary Public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use or lands which are irrigated - by legal land description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set and at the place named, before the Notary Public, as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by field inspection to have been irrigated at the time of proof.

Re: Permit No. 26577

Dear Mr. Boyd:

Your letter of November 3rd has been received. From your description it has been estimated that you may be able to pump 150 inches of water through the eight inch pipe to point where the land can be irrigated by gravity. Your certificate of completion of works will be issued in the near future.

Your permit shows that you requested two additional years to make proof of beneficial use of the water or until October 17, 1963.

As you were informed previously, waste water rights are often not a steady source of water, however in some places are very good. The right to the water in all natural water ways depend upon the priority.

You should complete your right by proving beneficial use of the water when the proof is due. The date can be extended if necessary.

Re: Permit No. 26577
W. A. & C. L. Boyd

Mr. C. L. Boyd
Hazelton, Idaho

Dear Mr. Boyd:

We received Form 6, Proof of Completion of Works under your permit to appropriate 4.28 cubic feet per second of water from an unnamed stream in SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 18. You show that your works are capable of conducting to the place of intended use 1 ft. 6 in feet of water, which is available to irrigate 80 acres of land.

Is 80 acres all you intend to irrigate? If 80 acres is the limit, then the quantity could be 80 miners inches or 1.6 cubic feet per second. In case you intend to irrigate additional ground, the amount could possibly be larger. That would depend upon your works.

Kind advise at your earliest convenience.

Very truly yours,

GEO. N. CARTER

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Boise, Idaho

Re: Permit 26577

Aug. 1, 1961

W. A. & C. L. Boyd
Hazelton, Idaho

Dear Sirs:

Under the terms of your permit No. 26577 you are required to complete your diversion works on or before Oct. 17, 1961. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion of Works will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

GEO. N. CARTER

Gentlemen:

In our letter of October 23rd we interpreted your statement under remarks on your Permit No. 26577 thinking the same was a filing to cover a Desert-Land Entry filing and not patented or deeded land. Therefore, we were in error in stating that the Idaho District Land Office would require two copies of the Permit since the land pertaining to this Permit is patented or deeded land.

We sincerely regret this error and the inconvenience we have caused you and are enclosing your check in the amount of \$2.00 you sent us for the fee for making the two copies.

Gentlemen:

We enclose Permit No. 26577 and direct your attention to the limitations and conditions as given on the fourth page under approval of the State Reclamation Engineer.

You will recall that departmental receipt No. 28214 for the \$6.00 filing fee was handed you when in the office recently.

We note that under "Remarks", you state that this water is to be used in connection with Carey Act and Desert Entry lands. For your information, will state that the Idaho District Land Office will require two copies of this Permit, one certified, to be used in connection with your desert land entry.

It has been our custom to make these two copies, one certified, the charge for which is \$2.00. Upon receipt of this fee we will make same and send them directly to the Land Office.

Dear Mr. Boyd:

I have your letter of October 4, 1956.

The public character of waste water, that is, whether it is public water subject to appropriation is uncertain especially when it is within an irrigation district or on a Bureau of Reclamation Project.

You do not have to file on your own waste water but we would suggest filing on other waste to protect against similar appropriations by others.

I will be out of the office most of next week and although the office will be open, the Deputy State Reclamation Engineer (Mr. R. N. Humphrey) and the Supervisor of Water Distribution (Mr. Roy W. Thompson) who know the most about water rights will also be out of the office all of the week of October 8.
